The Geopolitics of Melting Mountains Alexander E. Davis, 2023-05-12 The book addresses the urgent need for rethinking the geopolitics and ecology in the Himalaya by emphasising the entanglements between these two factors Most international relations analyses of the Himalaya emphasize the central role of the region's states and their great power struggles By reducing the region to its state actors however we miss the intense more than human diversity of the region and the crucial role that the mountains play in the global environment In doing so the book makes a major contribution to international relations theory by drawing on insights from international political ecology It first theorises international political ecology and examines the Himalaya as a global region before moving looking at the international aspects of political ecology in the Himalaya through key areas of the mountains where international politics and ecology are deeply inextricably linked It presents three detailed case studies of different environmental and political issues in the Himalaya icecaps the India China Pakistan boundary dispute in the western Himalaya foothills and forests the Nepal Bhutan Sikkim borderlands and rivers the
