L. Bursill-Hall G L. Bursill-Hall, *Speculative Grammars of the Middle Ages* By G. L. Bursill-Hall G. L. Bursill-Hall, 1971 Signs of the Early Modern David Lee Rubin, 1996 **Rhetoric in the Middle Ages** James Jerome Murphy, 1981-01-01 Follows the threads of ancient rhetorical theory into the Middle Ages and examines the distinctly Medieval rhetorical genres of perceptive grammar letter writing and preaching These various forms are compared with one another and placed in the context of Medieval society Covering the period 426 A D to 14 *On the Medieval Theory of Signs* Umberto Eco, Costantino Marmo, 1989-01-01 In the course of the long debate on the nature and the classification of signs from Boethius to Ockham there are at least three lines of thought the Stoic heritage that influences Augustine Abelard Francis Bacon the Aristotelian tradition stemming from the commentaries on De Interpretatione the discussion of the grammarians from Priscian to the Modistae Modern interpreters are frequently misled by the fact that the various authors regularly used the same terms Such a homogeneous terminology however covers profound theoretical differences The aim of these essays is to show that the medieval theory of signs does not represent a unique body of semiotic notions there are diverse and frequently alternative semiotic theories This book thus represents an attempt to encourage further research on the still unrecognized variety of the semiotic approaches offered by the medieval philosophies of language **Medieval Philosophy** Peter Adamson, 2019 Adamson offers a lively and accessible tour through 600 years of intellectual history offering a feast of new ideas in every area of philosophy He introduces us to some of the greatest thinkers of the Western tradition including Abelard Anselm Aquinas Hildegard of Bingen and Julian of Norwich **The History of Linguistics in Europe** Vivien Law, 2003-01-30 This authoritative and wide ranging book first published in 2003 examines the history of western linguistics over a 2000 year timespan from its origins in ancient Greece up to the crucial moment of change in the Renaissance that laid the foundations of modern linguistics Some of today's burning questions about language date back a long way in 1400 BC Plato was asking how words relate to reality Other questions go back just a few generations such as our interest in the mechanisms of language change or in the social factors that shape the way we speak Vivien Law explores how ideas about language over the centuries have changed to reflect changing modes of thinking A survey chapter brings the coverage of the book up to the present day Classified bibliographies and chapters on research resources and the qualities the historian of linguistics needs to develop provide the reader with the tools to go further **Encyclopedia of Medieval Philosophy** Henrik Lagerlund, 2010-12-07 This is the first reference ever devoted to medieval philosophy It covers all areas of the field from 500 1500 including philosophers philosophies key terms and concepts It also provides analyses of particular theories plus cultural and social contexts **De Ortu Grammaticae** Geoffrey L. Bursill-Hall, Sten Ebbesen, E.F.K.

Koerner,1990-01-01 The Danish scholar Jan Pinborg 1937 1982 made outstanding contributions to our understanding of medieval language study The papers in this volume clearly demonstrate the wealth of Pinborg s scholarly interests and the extent of his influence Though centered on medieval theories of grammar and language the collection ranges in time from the fourth century B C to the seventeenth century A D theories of the pronoun of mental language of supposition of figurative expressions and of mereology are among the topics discussed and the papers deal with both humble anonymous teachers of grammar and with such well known men as Aristotle Plotinus Augustine Peter of Spain Roger Bacon Robert Kilwardby Thomas Aquinas Dante William of Ockham Domingo de Soto and Suarez The papers are in English German or French

Symington,2013-05-02 Generally categories are understood to express the most general features of reality Yet since categories have this special status obtaining a correct list of them is difficult This question is addressed by examining how Thomas Aquinas establishes the list of categories through a technique of identifying diversity in how predicates are per se related to their subjects A sophisticated critique by Duns Scotus of this position is also examined a rejection which is fundamentally grounded in the idea that no real distinction can be made from a logical one It is argued Aquinas s approach can be rehabilitated in that real distinctions are possible when specifically considering per se modes of predication This discussion between Aquinas and Scotus bears fruit in a contemporary context insofar as it bears upon strengthens and seeks to correct E J Lowe s four category ontology view regarding the identity and relation of the categories **The Virtues of**
