In Plato's *Cratylus*, which dates to 360 B.C., Socrates alludes to the use of signs by deaf people. In his *Natural History*, completed in 79 A.D., Pliny the Elder alludes to Quintus Pedius, the deaf son of a Roman consul who had to seek permission from Caesar Augustus to pursue his training as an artist. During the Renaissance, scores of deaf people achieved fame throughout Europe, and by the middle of the 17th century, the talents and communication systems of deaf people were being studied by a variety of noted scientists and philosophers. However, the role of deaf people in society has always been hotly debated: could they be educated? Should they be educated? If so, how? How does Deaf culture exist within larger communities? What do advances in the technology and the genetics of hearing loss portend for Deaf communities? In this landmark volume, a wide range of international experts present a comprehensive and accessible overview of the diverse field of deaf studies.

Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, 2011-05-15 Special education is now an established part of public education in the United States by law and by custom. However, it is still widely misunderstood and continues to be dogged by controversies related to such things as categorization, grouping, assessment, placement, funding, instruction, and a variety of legal issues. The purpose of this 13-part, 57-chapter handbook is to help profile and bring greater clarity to this sprawling and growing field. To ensure consistency across the volume, chapter authors review and integrate existing research, identify strengths and weaknesses, note gaps in the literature, and discuss implications for practice and future research. Key features include Comprehensive Coverage: Fifty-seven chapters cover all aspects of special education in the United States, including cultural and international comparisons; Issues and Trends: In addition to synthesizing empirical findings and providing a critical analysis of the status and direction of current research, chapter authors discuss issues related to practice and reflect on trends in thinking; Categorical Chapters: In order to provide a comprehensive and comparative treatment of the twelve categorical chapters in section IV, chapter authors were asked to follow a consistent outline: Definition, Causal Factors, Identification, Behavioral Characteristics, Assessment, Educational Programming, and Trends and Issues; Expertise: Edited by two of the most accomplished scholars in special education, chapter authors include a carefully chosen mixture of established and rising young stars in the field. This book is an appropriate reference volume for anyone—researchers, scholars, graduate students, practitioners, policy makers, and parents—interested in the state of special education today, its research base, current issues and practices, and future trends. It is also appropriate as a textbook for graduate-level courses in special education.

The Oxford Handbook of Deaf Studies, Language, and Education, Volume 1 Marc Marschark, Patricia Elizabeth Spencer, 2010-12-14 The field of deaf studies, language, and education has grown dramatically over the past forty years. From work on the linguistics of sign language and parent-child interactions to analyses of school placement and the mapping of brain function in deaf individuals, research across a range of disciplines has greatly expanded, not just our knowledge of deafness and the deaf but also the very origins of language, social interaction, and thinking. In this updated edition of the landmark original volume, a range of international experts present a comprehensive overview of the field of deaf studies, language, and education. Written for students, practitioners, and researchers, *The Oxford Handbook of Deaf Studies, Language, and Education, Volume 1* is a uniquely ambitious work that has altered both the theoretical and applied landscapes. Pairing practical information with detailed analyses of what works, why, and for whom, all while banishing the paternalism that once dogged the field, this first of two

volumes features specially commissioned updated essays on topics including language and language development hearing and speech perception education literacy cognition and the complex cultural social and psychological issues associated with deaf and hard of hearing individuals The range of these topics shows the current state of research and identifies the opportunities and challenges that lie ahead Combining historical background research and strategies for teaching and service provision the two volume Oxford Handbook of Deaf Studies Language and Education stands as the benchmark reference work in the field of deaf studies

The Education of d/Deaf and Hard of Hearing Children Peter V.

Paul, 2020-02-12 A significant number of d/Deaf and hard of hearing d/Dhh children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States and elsewhere To provide an understanding of this issue this book explores the theoretical underpinnings and synthesizes major research findings It also covers critical controversial areas such as the use of assistive hearing devices language and literacy assessments and inclusion Although the targeted population is children and adolescents who are d/Dhh contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as

children with language or literacy disabilities and those for whom English is not the home language Collectively this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d Dhh students It is clear that there is not a one size fits all concept but rather research and instruction should be differentiated to meet the needs of d Dhh students It is our hope that this book stimulates further theorizing and research and most importantly offers evidence and reason based practices for improving language and literacy abilities of d Dhh students
