early childhood education clinical social work speech and physical therapy developmental psychology behavior therapy and public health *Advances in Special Education Research and Praxis in Selected Countries of Africa, Caribbean and the Middle East* Kagendo Mutua, Cynthia S Sunal, 2012-06-01 This edited volume explores various issues pertaining to the education of children with disabilities in Africa the Caribbean and Middle East As a group persons with disabilities have been subjected to social cultural and educational exclusions of various forms and for various socially scripted reasons In education for instance individuals with disabilities have been altogether excluded from educational participation in many parts of the developing world or they have been excluded from pursuing meaningfully beneficial higher levels of education in developed countries like the United States One of the social responses remedies to the widely acknowledged exclusionary practices experienced by learners with disabilities has been the widespread implementation of inclusive practices in the education of individuals with disabilities across countries in the west and the developing regions of the world A distinctive marker of difference in the way inclusive practices have been enacted in western countries versus those in the developing world has primarily stemmed from the fact that majority of western countries operate under funded mandates that also regulate the provision of education to persons with disabilities While the ideal of inclusion has been highly desirable many of countries in the developing world have floundered in their implementation due to lack sound legislative framework to guide implementation coupled with socio cultural factors related to negative perceptions of disabilities and limited funding sources Chapters in this volume explore inclusive education from a variety of perspectives **Standards and Special Education Needs** Michael Farrell, 2001-10-01 Amidst all of the bureaucracy and policy concerning special educational needs SEN it is easy to lose sight of the role of standards in the education of pupils with SEN This book places the role of standards at the centre of the stage showing what is meant by standards how they are measured how they can be improved what pitfalls need to be avoided Topics include legislation identification of SEN target setting benchmarking value added inclusive education and resources The book focuses on UK education systems but includes frequent and sustained comparison with USA There are also references to Canada New Zealand and South Africa **The Routledge International Handbook of Disability Human Rights Hierarchies** Stephen Meyers, Megan McCloskey, Gabor Petri, 2023-10-31 Disability is defined by hierarchy Regardless of culture or context persons with disabilities are almost always pushed to the bottom of the social hierarchy With the advent of the Convention on the Rights of Persons with Disabilities 2006 disability human rights seemingly provided a path forward for tearing down ableist social hierarchies and ensuring that all persons with disabilities everywhere were treated equally Despite important progress the disability human rights project not only remains incomplete but has often created new hierarchies among persons with disabilities themselves or across the human rights it promotes Certain groups of persons with disabilities have gained new voices while others remain silenced and certain rights are prioritized over others depending on what states international organizations or advocates want rather than what those on the ground need most

This volume was inspired both by the continued need to expose human rights violations against persons with disabilities but to also explore the nuanced role that hierarchies play in the spread implementation and protection of disability human rights. The enjoyment of human rights is not equal nor is the recognition of specific individuals and groups rights. In order to change this situation inequalities across the disability human rights movement must be explored. Divided into five parts: Who counts as disabled, Political, social and cultural context, Which rights on top whose rights on bottom, Pushed to the periphery in the disability rights movement, Representations of disability and comprised of 34 newly written chapters including case studies from the Anglophone Caribbean, Bangladesh, Bosnia Herzegovina, China, Ghana, Haiti, Hungary, India, Israel, Kenya, Latin America, Poland, Russia, Scotland, Serbia and South Africa and other countries, this book will be of interest to all scholars and students of disability studies, sociology, human rights, law and social policy.
