## **Speeding The Net:**

**Speeding the Net** Joshua Quittner, Michelle Slatalla, 1998 Combining the hacker savvy of Tracey Kidder's *Soul of a New Machine* with the riveting drama of the first great corporate conflict waged on the turf of cyberspace *Speeding the Net* is the story of how a crew of talented computer jocks at the University of Illinois turned the computer world upside down by creating the essential tool for navigating the World Wide Web the web browser They created it for fun but after Silicon Valley visionary and entrepreneur Jim Clark showed up in the middle of a snowstorm and hired them on the spot they were soon part of one of the most dramatic initial public offerings IPOs in the history of Wall Street had built their company into a dollar 2.2 billion business and were forcing Bill Gates's Microsoft to reevaluate its entire business strategy *Speeding the Net* gives an inside account of the ensuing cat and mouse game between Netscape which held an early lead in the so called browser wars and Microsoft which has always been notorious for zeroing in on its opposition and crushing it Win lose or draw however Netscape's corporate culture of speed developing new programs and bringing them to market in under six months then giving them away for free has already transformed the way Silicon Valley does business and the way the world communicates

### **High-Speed Networks** Jorge Crichigno, Elie

Kfoury, Elias Bou-Harb, Nasir Ghani, 2022-04-18 This book provides practical knowledge and skills on high speed networks emphasizing on Science Demilitarized Zones Science DMZs The Science DMZ is a high speed network designed to facilitate the transfer of big science data which is presented in this book These networks are increasingly important as large data sets are now often transferred across sites This book starts by describing the limitations of general purpose networks which are designed for transferring basic data but face numerous challenges when transferring terabyte and petabyte scale data This book follows a bottom up approach by presenting an overview of Science DMZs and how they overcome the limitations of

general purpose networks It also covers topics that have considerable impact on the performance of large data transfers at all layers link layer layer 2 and network layer layer 3 topics such as maximum transmission unit MTU switch architectures and router s buffer size transport layer layer 4 topics including TCP features congestion control algorithms for high throughput high latency networks flow control and pacing applications layer 5 used for large data transfers and for maintenance and operation of Science DMZs and security considerations Most chapters incorporate virtual laboratory experiments which are conducted using network appliances running real protocol stacks Students in computer science information technology and similar programs who are interested in learning fundamental concepts related to high speed networks and corresponding implementations will find this book useful as a textbook This book assumes minimal familiarity with networking typically covered in an introductory networking course It is appropriate for an upper level undergraduate course and for a first year graduate course Industry professionals working in this field will also want to purchase this book

**High-Speed Networking** James P. G. Sterbenz, Joseph D. Touch, 2002-02-28 Leading authorities deliver the commandments for designing high speed networks There are no end of books touting the virtues of one or another high speed networking technology but until now there were none offering networking professionals a framework for choosing and integrating the best ones for their organization s networking needs Written by two world renowned experts in the field of high speed network design this book outlines a total strategy for designing high bandwidth low latency systems Using real world implementation examples to illustrate their points the authors cover all aspects of network design including network components network architectures topologies protocols application interactions and more **Protocols for High Speed Networks IV** G. Neufeld, M. Ito, 2013-11-11 Welcome to the fourth IFIP workshop on protocols for high speed networks in Vancouver This workshop follows three very successful workshops held in Ziirich 1989 Palo Alto 1990 and Stockholm 1993 respectively We received a large number of papers in response to our call for contributions This year forty papers were received of which sixteen were presented as full papers and four were presented as poster papers Although we received many excellent papers the program committee decided to keep the number of full presentations low in order to accommodate more discussion in keeping with the format of a workshop Many people have contributed to the success of this workshop including the members of the program committee who with the additional reviewers helped make the selection of the papers We are thankful to all the authors of the papers that were submitted We also thank several organizations which have contributed financially to this workshop specially NSERC ASI CICS R UBC MPR Teltech and Newbridge Networks

**Dynamics of Coupled Systems in High-Speed Railways** Weihua Zhang, 2019-11-25 Dynamics of Coupled Systems in High Speed Railways Theory and Practice presents the relationship between various coupled systems that can affect train operation including interaction between track and train the pantograph catenary system and train power supply system and train and airflow and train with respect to the structure and characteristics of high speed railway The overall simulation

optimization and control are achieved based on an analysis of the dynamics generated by coupled systems in high speed trains with a theoretical framework for the dynamics presented in the book Presents the first book available on the dynamics of coupled systems in high speed trains Provides a systematic view of high speed vehicle dynamics covering the issues that are especially concerned for high speed operations such as high speed pantograph and catenary aerodynamic characteristics and running stability of high speed trains Covers the optimization of dynamic performance the design of parameters the simulation of high speed train service processes and the identification of high speed train state and condition assessment

*Handbook of Paper and Paperboard Packaging Technology* Mark J. Kirwan, 2012-11-07 The definitive industry reference on the paper and paperboard packaging sector Now in a fully revised and updated second edition this book discusses all the main types of packaging based on paper and paperboard It considers the raw materials the manufacture of paper and paperboard and the basic properties and features on which packaging made from these materials depends for its appearance and performance The manufacture of twelve types of paper and paperboard based packaging is described together with their end use applications and the packaging machinery involved The importance of pack design is stressed as well as how these materials offer packaging designers opportunities for imaginative and innovative design solutions Environmental factors including resource sustainability societal and waste management issues are addressed in a dedicated chapter The book is directed at readers based in companies which manufacture packaging grades of paper and paperboard companies involved in the design printing and production of packaging and companies which manufacture inks coatings adhesives and packaging machinery It will be essential reading for students of packaging technology and technologists working in food manufacturing who are users of paper and paperboard packaging products Praise for the First Edition This book is a valuable addition to the library of any forward looking company by providing in depth coverage of all aspects of packaging which involve the most ecologically acceptable material namely paper and paperboard International Journal of Dairy Technology a welcome contribution to a field where coverage was previously limited to subject specific books or to single chapters in textbooks on broader aspects of packaging technology Packaging Technology and Science **Paper and Paperboard Packaging**

**Technology** Mark J. Kirwan, 2008-04-15 This book discusses all the main types of packaging based on paper and paperboard It considers the raw materials and manufacture of paper and paperboard and the basic properties and features on which packaging made from these materials depends for its appearance and performance The manufacture of twelve types of paper and paperboard based packaging is described together with their end use applications and the packaging machinery involved The importance of pack design is stressed and how these materials offer packaging designers opportunities for imaginative and innovative design solutions Environmental and waste management issues are addressed in a separate chapter The book is directed at those joining companies which manufacture packaging grades of paper and paperboard companies involved in the design printing and production of packaging and companies which manufacture inks coatings adhesives and packaging

machinery It will be essential reading for students of packaging technology

**Architecture and Protocols for High-Speed Networks** Otto Spaniol, André Danthine, Wolfgang Effelsberg, 2013-06-29 Multimedia data streams will form a major part of the new generation of applications in high speed networks Continuous media streams however require transmission with guaranteed performance In addition many multimedia applications will require peer to multipeer communication Guaranteed performance can only be provided with resource reservation in the network and efficient multipeer communication must be based on multicast support in the lower layers of the network Architecture and Protocols for High Speed Networks focuses on techniques for building the networks that will meet the needs of these multimedia applications In particular two areas of current research interest in such communication systems are covered in depth These are the protocol related aspects such as switched networks ATM MAC layer network and transport layer and the services and applications Architecture and Protocols for High Speed Networks contains contributions from leading world experts giving the most up to date research available It is an essential reference for all professionals engineers and researchers working in the area of high speed networks *The Phonographic Magazine* ,1910

**C# 8 and .NET Core 3 Projects Using Azure** Paul Michaels, Dirk Strauss, Jas Rademeyer, 2019-12-31 Get up to speed with using C 8 and NET Core 3 0 features to build real world NET Core applications Key Features Learn the core concepts of web applications serverless computing and microservices Create an ASP NET Core MVC application using controllers routing middleware and authentication Build modern applications using cutting edge services from Microsoft Azure Book Description NET Core is a general purpose modular cross platform and opensource implementation of NET The latest release of NET Core 3 comes with improved performance and security features along with support for desktop applications NET Core 3 is not only useful for new developers looking to start learning the framework but also for legacy developers interested in migrating their apps Updated with the latest features and enhancements this updated second edition is a step by step project based guide The book starts with a brief introduction to the key features of C 8 and NET Core 3 You ll learn to work with relational data using Entity Framework Core 3 before understanding how to use ASP NET Core As you progress you ll discover how you can use NET Core to create cross platform applications Later the book will show you how to upgrade your old WinForms apps to NET Core 3 The concluding chapters will then help you use SignalR effectively to add real time functionality to your applications before demonstrating how to implement MongoDB in your apps Finally you ll delve into serverless computing and how to build microservices using Docker and Kubernetes By the end of this book you ll be proficient in developing applications using NET Core 3 What you will learn Understand how to incorporate the Entity Framework Core 3 to build ASP NET Core MVC applications Create a real time chat application using Azure s SignalR service Gain hands on experience of working with Cosmos DB Develop an Azure Function and interface it with an Azure Logic App Explore user authentication with Identity Server and OAuth2 Understand how to use Azure Cognitive Services to add advanced functionalities with minimal code Get to
