Delivering the Framework for Teaching English Michael Ross,Keith West,2001 Responding to the demands of the Framework for Teaching English Years 7 9 within the context of the revised National Curriculum the Level Best series offers a carefully structured and motivating approach to English for 11 to 14 year olds Making clear the purpose and structure of each unit and the skills being developed the books offer opening questions for discussion in small groups and provide opportunities throughout to learn in a variety of ways Encouraging students throughout to examine and explain how they reached their conclusions the series provides plenty of support in order to increase confidence and achievement It aims to guide students towards realistic targets by encouraging reflection on what has been learnt during the course of each unit before moving on to the next level The Teacher Resource Books provide extensive support including suggestions for teaching styles model answers and photocopiable worksheets Early Reading Instruction Diane McGuinness,2006-01-20 Early Reading Instruction is a comprehensive analysis of the research evidence from early writing systems to computer models of reading In this book Diane McGuinness provides an innovative solution to the reading war the century old debate over the efficacy of phonics sound based versus whole word meaning based methods She has developed a prototype a set of elements that are critical to the success of a reading method McGuinness shows that all writing systems without exception are based on a sound unit in the language This fact and other findings by paleographers provides a platform for the prototype Other elements of the prototype are based on modern research For example observational studies in the classroom show that time spent on three activities strongly predicts reading success learning phoneme symbol correspondences practice at blending and segmenting phonemes in words and copying writing words phrases and sentences Most so called literacy activities have no effect and some like sight word memorization have a strongly negative effect The National Reading Panel 2000 summarized the research on reading methods after screening out thousands of studies that failed to meet minimum scientific standards In an in depth analysis of this evidence McGuinness shows that the most successful methods children reading a year or more above age norms include all the elements in the prototype Finally she argues because phonics type methods are consistently shown to be superior to whole word methods in studies dating back to the 1960s it makes no sense to continue this line of research The most urgent question for future research is how to get the most effective phonics programs into the classroom **Official Adoption List for ...** ,1989 **Spelling Level 7** □□□,2002-10-07 *Catalog of Copyright Entries.*
