networks primarily address the needs of multinational corporations Surprisingly however the number of small firms participating in such institutions has substantially increased over recent years But what is the reason for this new interest of SME in institutional forms of CSR Based on a qualitative empirical study of German small firms participation in the most prominent CSR institution the UN Global Compact this book explores the drivers for small firm participation The motivations are complex and do not follow the same hierarchical order associated with large business behaviour Rather reasons for institutional engagement suggest a heterarchical structure where alignment is contingent upon factors such as individual CSR perception self conception or social environment The book explains why small firms prefer to engage in sustainable development within institutionalised forms of CSR rather than act in isolation and provides recommendations on how to support and thus increase SME participation in institutionalised forms of civic engagement
