Bowen's four year project The first was the concept that the family could be conceptualized and treated as an emotional unit The second was family psychotherapy which began as staff family daily meetings on the inpatient unit The findings of Bowen's project remain part of mainstream mental health practice today From that project Bowen went on to develop his well known eight interlocking theoretical concepts that continue to be highly influential both in mental health and business Bowen's project also significantly transformed the therapeutic relationship The psychotherapist tried to achieve a balance when working with the families by making emotional connections while staying out of intense emotional reactions They also worked diligently to avoid psychologically replacing parents This book details the story of how these transformative changes came about by highlighting the original papers of the project
