The Rise and Decline of the American "Empire" Geir Lundestad,2012-03-08 The Rise and Decline of the American Empire explores the rapidly growing literature on the rise and fall of the United States The author argues that after 1945 the US has definitely been the most dominant power the world has seen and that it has successfully met the challenges from first the Soviet Union and then Japan and the European Union Now however the United States is in decline its vast military power is being challenged by asymmetrical wars its economic growth is slow and its debt is rising rapidly the political system is proving unable to meet these challenges in a satisfactory way While the US is still likely to remain the world s leading power for the foreseeable future it is being challenged by China particularly economically and also by several other regional Great Powers The book also addresses the more theoretical question of what recent superpowers have been able to achieve and what they have not achieved How could the United States be both the dominant power and at the same time suffer significant defeats And how could the Soviet Union suddenly collapse No power has ever been omnipotent It cannot control events all around the world The Soviet Union suffered from imperial overstretch the traditional colonial empires suffered from a growing lack of legitimacy at the international national and local levels The United States has been able to maintain its alliance system but only in a much reformed way If a small power simply insists on pursuing its own very different policies there is normally little the United States and other Great Powers will do Military intervention is an option that can be used only rarely and most often with strikingly limited results

Arsenals of Folly Richard Rhodes,2008-11-04 Pulitzer Prize winning author Richard Rhodes delivers a riveting account of the nuclear arms race and the Cold War In the Reagan Gorbachev era the United States and the Soviet Union came within minutes of nuclear war until Gorbachev boldly launched a campaign to eliminate nuclear weapons setting the stage for the 1986 Reykjavik summit and the incredible events that followed In this thrilling authoritative narrative Richard Rhodes draws on personal interviews with both Soviet and U S participants and a wealth of new documentation to unravel the compelling shocking story behind this monumental time in human history its beginnings its nearly chilling consequences and its effects on global politics today

A History of Russia and Its Empire Kees Boterbloem,2018-06-26 This clear and focused text provides an introduction to imperial Russian and Soviet history from the crowning of Mikhail Romanov in 1613 to Vladimir Putin s new term Through a consistent chronological narrative Kees Boterbloem considers the political military economic social religious and cultural developments and crucial turning points that led Russia from an exotic backwater to superpower stature in the twentieth century The author assesses the tremendous price paid by those who made Russia and the Soviet Union into such a hegemonic power both locally and globally He considers the complex and varied interactions between Russians and non Russians and

investigates the reasons for the remarkable longevity of this last of the colonial powers whose dependencies were not granted independence until 1991 He explores the ongoing legacies of this fraught decolonization process on the Russian Federation itself and on the other states that succeeded the Soviet Union The only text designed and written specifically for a one semester course on this four hundred year period it will appeal to all readers interested in learning more about the history of the people who have inhabited one sixth of the earth s landmass for centuries The Routledge Companion to Cross-Cultural Management Nigel Holden,Snejina Michailova,Susanne Tietze,2015-04-24 This Routledge Companion provides a timely and authoritative overview of cross cultural management as an academic domain and field of practice for academics and students With contributions from over 60 authors from 20 countries the book is organised in to five thematic areas Review survey and critique Language and languages moving from the periphery to the core Cross cultural management research and education The new international business landscape Rethinking a multidisciplinary paradigm Edited by an international team of scholars and featuring contributions from a range of leading cross cultural management experts this prestigious volume represents the most comprehensive guide to the development and scope of cross cultural management as an academic discipline **The Anthropological Turn** Jacob Collins,2020-04-24 A close look at post 1968 French thinkers Rgis Debray Emmanuel Todd Marcel Gauchet and Alain de Benoist In The Anthropological Turn Jacob Collins traces the development of what he calls a tradition of political anthropology in France over the course of the 1970s After the social revolution of the 1960s brought new attention to identities and groups that had previously been marginal in French society the country entered a period of stagnation the economy slowed the political system deadlocked and the ideologies of communism and Catholicism lost their appeal In this time of political cultural and economic indeterminacy political anthropology as Collins defines it offered social theorists grand narratives that could give greater definition to the social by anchoring its laws and histories in the deep and sometimes archaic past Political anthropologists sought to answer the most basic of questions what is politics and what constitutes a political community Collins focuses on four influential yet typically overlooked French thinkers Rgis Debray Emmanuel Todd Marcel Gauchet and Alain de Benoist who from Left to far Right represent different political leanings in France Through a close and comprehensive reading of their work he explores how key issues of religion identity citizenship and the state have been conceptualized and debated across a wide spectrum of opinion in contemporary France Collins argues that the stakes have not changed since the 1970s and rival conceptions of the republic continue to vie for dominance Political and cultural issues of the moment the burkini for example become magnified and take on the character of an anthropological threat In this respect he shows how the anthropological turn as it figures in the work of Debray Todd Gauchet and Benoist is a useful lens for viewing the political and social controversies that have shaped French history for the last forty years **Globalization on the Margins (2nd Edition)** Iveta Silova,Sarfaro Niyozov,2020-01-01 Reflecting on almost three decades of postsocialist transformations the second edition of Globalization

on the Margins explores continuities and changes in Central Asian education development since the dissolution of the Soviet Union in 1991 with a particular focus on the developments that took place since the production of the first edition in 2011. Rather than viewing these transformations in isolation, the authors place their analyses within the global context by reflecting on the interaction between Soviet legacies and global education reform pressures in the Central Asian countries of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. This new edition, in addition to a revised introduction and a newly added conclusion, consists of four thematic sections, each reflecting a key theme in the educational life of the Central Asian states. These thematic sections, introduction and conclusion, collectively update our understanding of the recent developments and challenges in education of the five Central Asian states. They, however, go beyond mere information update so as to complicate, re-engage, re-form, and re-define the margins, taking up margins as a conceptual, geographic, cultural, and geopolitical construct. Notwithstanding the diversity of local and international authors' variety of theoretical perspectives, methodological approaches, and conceptual lenses, the essays reveal the complexity and uncertainty of the post-socialist education transformations. Instead of portraying the transition process as the influx of Western ideas into the region, *Globalization on the Margins* provides new lenses to critically examine education as a contested field of diverse perspectives, competing forces, and multidirectional flow of ideas, concepts, and reforms in Central Asia.

ENDORSEMENTS

Hindsight famously brings clarity. And much of what happened after the fall of the Berlin Wall and the collapse of the Soviet Union has now been correctly handed over to historians. Nonetheless, we ignore that history at our peril. The contributors to this volume show that carefully textured and historically attuned education research generates deep insights into ongoing transformations and the political, cultural, social, and economic structures, relations, and practices that do the work of producing margins and centers in the first place.

Noah W. Sobel, Loyola University Chicago

Globalization on the Margins and at the epicentre of the battles of the Great Powers. Two excellent educators, Sarfaroj Niyozov and Iveta Silova, compiled a timely and long-awaited scholarly work based on empirical research in societies which had similar history close to three decades ago. All the contributors are prolific educators who know the education system from within and without, who either hailed from the region or have spent a considerable amount of time to know the systems well. The book contains remarkable stories of education through the ups and downs of historical evolution. It is a must-read primer for anyone interested in learning about high-quality research in the field of education in Central Asia. It is a huge contribution to educational research with an impact on research and teaching for years to come.

Duishon Shamatov, Nazarbayev University, Kazakhstan

The challenge of moving Central Asia from the borders of the Soviet Empire to the world's center is the focus of the discussions in *Globalization on the Margins*. The transition to the Western models of education was happening in the context of a major paradigm shift which entire humanity was experiencing and which could be described as the arrival of the new post-industrial civilization. During this process, Central Asian countries have been pushed to the margins because their

contribution to the wealth of the new world know how was much less pronounced than that of their Western neighbours
Therefore investment into the research that contributes to local knowledge production seems a natural solution to the
problem All the contributors to this book have a vast experience in the region and many of their observations are thought
provoking This is a very insightful and much needed book Elena Lenskaya Moscow School of Social and Economic Sciences
