 benton frank The Genesis of Technoscientific Revolutions Venkatesh Narayanamurti, Jeffrey Y. Tsao, 2021-11-16 Research
 powers innovation and technoscientific advance but it is due for a rethink one consistent with its deeply holistic nature
 requiring deeply human nurturing Research is a deeply human endeavor that must be nurtured to achieve its full potential As
 with tending a garden care must be taken to organize plant feed and weed and the manner in which this nurturing is done
 must be consistent with the nature of what is being nurtured In The Genesis of Technoscientific Revolutions Venkatesh
 Narayanamurti and Jeffrey Tsao propose a new and holistic system a rethinking of the nature and nurturing of research They
 share lessons from their vast research experience in the physical sciences and engineering as well as from perspectives
 drawn from the history and philosophy of science and technology research policy and management and the evolutionary
 biological complexity physical and economic sciences Narayanamurti and Tsao argue that research is a recursive reciprocal
 process at many levels between science and technology between questions and answer finding and between the consolidation
 and challenging of conventional wisdom These fundamental aspects of the nature of research should be reflected in how it is
 nurtured To that end Narayanamurti and Tsao propose aligning organization funding and governance with research
 embracing a culture of holistic technoscientific exploration and instructing people with care and accountability Federal
