The Far Horizon

H. Chris Ransford

The Far Horizon:

The Far Horizon Lucas Malet, 1906 1906 Lucas Malet was the pen name of English novelist Mrs Mary St Leger Harrison The author's first novel since *The History of Sir Richard Calmady* It begins Dominic Iglesias stood watching while the lingering June twilight darkened into night He was tired in body but his mind was eminently consciously awake to the point of restlessness and this was unusual with him He had raised the lower sash of each of the three tall narrow windows to its extreme height since the first floor sitting room though of fair proportions appeared close His thought refused the limits of it and ranged outward over the expanse of Trimmer's Green the roadway and houses bordering it to the far northwest that region of hurried storm of fierce equinoctial passion and conflict now paved with plaques of flat dingy violet cloud opening on smoky rose red wastes of London sunset All day thunder had threatened but had not broken And even yet the face of heaven seemed less peaceful than remonstrant a sullenness holding it as of troops in retreat denied satisfaction of imminent battle

The Far Horizon Lucas Malet, 2019-12-05 Lucas Malet's novel *The Far Horizon* intricately weaves a narrative that explores the complexities of human relationships against a backdrop of colonial adventure The story unfolds in the late 19th century predominantly set in the exotic locations of British India and is characterized by its rich lyrical prose and psychological depth Through evocative imagery and a focus on character development Malet navigates themes of identity isolation and social expectations effectively capturing the tensions of an era marked by both romantic idealism and harsh realities Lucas Malet the pen name of Mary St Leger Kingsley was an English novelist born into a family steeped in literary and artistic tradition Her exposure to diverse cultures and her own experiences in various parts of the world profoundly influenced her writing Malet's works often reflect her fascination with the nuances of society and the inner workings of the human mind which arguably stemmed from her extensive travels and her unique position as a female author in a predominantly male literary landscape Readers seeking a profound exploration of the human psyche alongside a vivid portrayal of colonial settings will find *The Far Horizon* to be a compelling addition to their literary repertoire Malet's masterful storytelling and deep character insights invite readers to reflect on their perceptions of distance both physical and emotional rendering this novel a timeless exploration of life's far reaching implications *The Far Horizon (Esprios Classics)* Lucas Malet, 2005

Bitterman,2012-08-04 The tall ship Sofia sank off New Zealand s North Island in February 1982 stranding its crew on disabled life rafts for five days They struggled to survive as any realistic hope of rescue dwindled Just a few years earlier

Pamela Sisman Bitterman was a naive swabbie looking for adventure signing on with a sailing cooperative taking this sixty year old 123 foot three masted gaff topsail schooner around the globe The aged Baltic trader had been rescued from a wooden boat graveyard in Sweden and reincarnated as a floating commune in the 1960s By the time Sofia went down Bitterman had become an able seaman promoted first to bos un and then acting first mate immersing herself in this life of a tall ship sailor world traveler and survivor *The Far Horizons of Time* H. Chris Ransford,2015-04-24 What is Time Assuming no prior specialized knowledge by the reader the book raises specific hitherto overlooked questions about how time works such as how and why anyone can be made to be at the very same instant simultaneous with events that are actually days apart It examines abiding issues in the physics of time or at its periphery which still elude a full explanation such as delayed choice experiments the brain s perception of time during saccadic masking and more and suggests that these phenomena can only exist because they ultimately obey applicable mathematics thereby agreeing with a modern view that the universe and everything within it including the mind are ultimately mathematical structures It delves into how a number of conundrums such as the weak Anthropic Principle could be resolved and how such resolutions could be tested experimentally All its various threads converge towards a same new vision of the ultimate essence of time seen as a side effect from a deeper reality **FAR Horizons** National Security Council (U.S.).
