Workplace Jack Demick, Patrice M. Miller, 2013-05-13 Originally presented at the Sixth Adult Development Symposium the papers in this volume examine possible relationships between the fields of organizational and adult developmental psychology with particular emphasis given to the grand developmental theories of Lawrence Kohlberg Jean Piaget Lev Vygotsky Heinz Werner and their descendants On the most general level the papers on development in the workplace are organized on the basis of the authors chosen units of analysis the individual the dyad and group and the organizational culture The editors conclude by uncovering similarities and differences among the contributors theoretical approaches to development in the workplace and their own From a recent extension of Werner's organismic developmental theory they focus their suggestions for future research on such issues as unit of analysis the holistic and systemic nature of human behavior and experience broader conceptualizations of the person of the environment and of development the need for methodological eclecticism the complementarity of basic and applied research Through this lens they shed light on underlying reasons why the majority of authors have focused on the individual worker as a unit of analysis and then propose that future researchers more broadly define the basic concept of development in the workplace *The Fifth Profession [by] William E. Who Owns Psychoanalysis? Ann Casement, 2018-05-08 So who does own psychoanalysis Equally pertinent what is psychoanalysis Even before the death of Sigmund Freud psychoanalysis was splintering into different groups each convinced of their superiority to the other There was little cooperation between them plus a great deal of resentment recrimination and suspicion The status quo has been evolving slowly in recent years with increased tolerance and communication between the different factions leading to the birth of this book The result is an international and inter group collaboration of eminent psychoanalysts and scholars of psychoanalysis discussing and reflecting on the meaning psychoanalysis holds for them Their contributions have been grouped into four sections academic historical political and scientific Each paper is varied in its subject matter looking at such issues as psychoanalytic ownership the genealogy of the word psychotherapy historical perspectives on the situation whether there

can be a monopoly on psychoanalysis and the role of the brain in relation to the mind and has been grouped according to its main theme

The Last Half-Century Morris Janowitz, 1978 The Last Half Century represents the culmination of a lifetime of scholarship by Morris Janowitz In this comprehensive and systematic analysis of the major trends in American society during the past fifty years he probes the weakening of popular party affiliations and the increased inability of elected representatives to rule Centering his work on the crucial concept of social control Janowitz orders and assesses a vast amount of empirical research to clarify the failure of basic social institutions to resolve our chronic conflicts For Janowitz social control denotes a society's capacity to regulate itself within a moral framework that transcends simple self interest He poses urgent questions Why has social control been so drastically weakened in our advanced industrial society And what strategies can we use to strengthen it again The explanation rests in part on the changes in social structure which make it more and more complicated for citizens to calculate their political self interest At the same time complex economic and defense problems also strain an already overburdened legislative system making effective responsive political rule increasingly difficult Janowitz concludes by assessing the response of the social sciences to the pressing problem of social control and asserts that new forms of citizen participation in the government must be found
