Soviet Sociology Historical Antecedents And Current Appraisals:

Soviet Sociology, Historical Antecedents and Current Appraisals Alex Simirenko, 1966 USSR Social theory comprising a collection of articles on the development of soviet sociology includes an historical outline of social theories and a description of recent research methods applied by soviet sociologists **Soviet Sociology** Alex Simirenko, 1967

Professsionalization of Soviet Society Alexander Simirenko, 1982-01-01 *Soviet sociology, historical antecedents and current appraisals. Edited with an introduction by A. Simirenko* Alex Simirenko, 1966 **Science and Ideology in Soviet Society** George Fischer, 2017-07-28 Set within the context of an era referred to as the age of science as well as the age of ideologies this volume explores how the Soviet Union responded to the impacts and interactions of both science and ideology between 1917 and 1967 Non specialists as well as experts are apt to disagree sharply about or to be ignorant of the mutual relationship But even if the system is defunct the issues remain This book divides its attention among four different fields of science cybernetics economics philosophy and sociology The authors believe that the disciplines discuss revealing trends in Soviet science in general and its interaction with an established though not immutable ideology in particular The authors conducted a pioneering examination of the mutual influence of ideology and science and the problems and opportunities created for government by the new scientific revolution Specifically they hold that in the 1960s Soviet science or at least the disciplines covered here helped sustain the established system and its ideology rather than weaken them This volume is of historical interest and provides insight into how one may explore the ways science and ideology interact **The Politics of Knowledge in Central Asia** Sarah Amsler, 2007-04-24 Through careful historical and ethnographic research and extensive use of local scholarly works this book provides a persuasive and careful analysis of the production of knowledge in Central Asia The author demonstrates that classical theories of science and society are inadequate for understanding the science project in Central Asia Instead a critical understanding of local science is more appropriate In the region the professional and political ethos of Marxism Leninism was incorporated into the logic of science on the periphery of the Soviet empire This book reveals that science organizes and constructed by Soviet rule was also defined by individual efforts of local scientists Their work to establish themselves between Marx and the market is therefore creating new political economies of knowledge at the edge of the scientific world system *Vidyodaya Journal of Social Science* ,1987 **Bukharin and the Bolshevik Revolution** Stephen F. Cohen, 1980 This classic biography carefully traces Bukharin s rise to and fall from power focusing particularly on the development of his theories and programmatic ideas during the critical period between Lenin s death in 1924 and the ascendancy of Stalin in 1929 *Professions and the State* Anthony Jones, 2011 Unlike autonomous professionals in Western industrialized democracies professionals in a socialist bureaucratic setting operate as employees of the state The change in environment has important Implications not only for the practice of professions but also for the concept of professionalism itself This collection of nine essays is the first to survey the major professions In the USSR

Czechoslovakia and Poland The contributors investigate the implications of professional experience in a socialist economy as well as relating changes in professional organization and power to reform movements in general and perestroika in particular In the series Labor and Social Change edited by Paula Rayman and Carmen Sirianni **Russia and Eastern Europe, 1789-1985** Raymond Pearson,1989 **The Russian Revolution and Civil War 1917-1921** Jonathan Smele,2006-04-15 The Russian Revolution and Civil War in the years 1917 to 1921 is one of the most widely studied periods in history It is also somewhat inevitably one that has generated a huge flow of literature in the decades that have passed since the events themselves However until now historians of the revolution have had no dedicated bibliography of the period and little claim to bibliographical control over the literature The Russian Revolution and Civil War 1917 1921 offers for the first time a comprehensive bibliographical guide to this crucial and fascinating period of history The Bibliography focuses on the key years of 1917 to 1921 starting with the February Revolution of 1917 and concluding with the 10th Party Congress of March 1921 and covers all the key events of the intervening years As such it identifies these crucial years as something more than simply the creation of a communist state Soviet Political Scientists and American Politics Neil Malcolm,1984-05-24 This book is the only comprehensive review of Soviet specialist writing on American politics covering the period from the establishment of Arbatov's USA Institute to the early 1980s *Social Theory and Social Structure* Robert King Merton,1968 This new printing is not a newly revised edition only an enlarged one The revised edition of 1957 remains intact except that its short introduction has been greatly expanded to appear here as Chapters I and II The only other changes are technical and minor ones the correction of typographical errors and amended indexes of subjects and names *History of Humanity* UNESCO,2008-12-31 This is the seventh and final volume in this comprehensive guide to the history of world cultures throughout historical times *In Stalin's Time* Vera Sandomirsky Dunham,1990 This new edition of In Stalin's Time which brings back into print Vera Dunham's 1976 landmark study of popular fiction in the Soviet Union during the Stalin regime is updated to include new material by the author and a new introduction by Richard Sheldon Dunham describes how the middle brow or postwar establishmentarian literature of the Stalinist period was a product of a Big Deal intended to propagate values and establish an alliance between the regime and the middle class Both descriptive and analytical Dunham's complex picture of high totalitarianism not only reveals insights into the details of Soviet life but illuminates important theoretical questions about the role of literature in the political structure of Soviet society **Dedovshchina in the Post-Soviet Military. Hazing of Russian Army Conscripts in a Comparative Perspective** Françoise Daucé,Elisabeth Sieca-Kozłowski,2012-02-13 In contemporary armies violence among soldiers seems to be a universal phenomenon found in both professional and drafted armies However the comparison of violent practices in various armies around the world allows us to identify specific features linked to those countries sociological political or anthropological contexts Hazing for example seems to be more violent in the armies of transitional societies Russia Eastern Europe Latin America where social tensions

encountered by citizens in their daily lives are carried over to and sometimes intensified in the military The comparison of Russian dedovshchina with the situation in other countries makes it possible to identify universal transitional and national characteristics of military violence Contents Konstantin Bannikov on the consequences of the spread throughout society of archaic violence produced by the Russian army Anna Colin Lebedev on the perception of military violence in Russian society Anton Oleynik on informal relationships among prisoners and conscripts Kirill Podrabinek on the reasons of the prevalence of dedovshchina in the post Soviet context Igor Obraztsov on the historical roots of dedovshchina Vadim Mikhailin on the role of language in the military milieu Julie Elkner on the Committee of Soldiers Mothers Bakit Katchekeyev on hazing in the Kyrgyz army Irakli Sesiashvili on hazing in the Georgian army Hana Cervinkova on hazing in the Czech army James Wither on bullying in the British army Eduardo Paes Machado Joris Van Bladel on dedovshchina and the all volunteer force

Confronting Gouldner James J. Chriss, 2015-02-04 Alvin W Gouldner 1920 1980 was a leading sociologist of his era who provided groundbreaking analyses in the areas of industrial sociology critical sociological theory ideology reciprocity and class analysis Even as a self avowed radical sociologist Gouldner was unable to maintain allegiance to any particular theorist or theoretical school for doing so could lead to theory becoming blind partisanship leading to unreflective and sometimes destructive practices e g the problem of the communist dictator In *Confronting Gouldner* James J Chriss confronts the larger issue of the place of critical theory and specifically Marxism in framing the perspective of sociology as political activism Through this confrontation with Gouldner the author explores the implications of critical theory as it relates to social justice marriage and family religion political activism public sociology and deviance and crime *Encyclopedia of Ukraine* Danylo Husar Struk, 1993-12-15 Over thirty years in the making the most comprehensive work in English on Ukraine is now complete its history people geography economy and cultural heritage both in Ukraine and in the diaspora **Philosophy, History and Social Action** S. Hook, W. O'Neill, R. O'Toole, 2012-12-06 Two articles by Lewis Feuer caught my attention in the 40s when I was wondering as a student physicist about the relations of physics to philosophy and to the world in turmoil One was his essay on *The Development of Logical Empiricism* 1941 and the other his critical review of Philipp Frank's biography of Einstein *Philosophy and the Theory of Relativity* 1947 How extraordinary it was to find so intelligent independent critical and humane a mind and furthermore he went further as I soon realized when I looked for his name on other publications I recall arguing with myself over his exploration of Indeterminacy and Economic Development 1948 and even more when I read his *Dialectical Materialism and Soviet Science* 1949 More papers and then the fascinating sometimes irritating always insightful books His monograph on *Psychoanalysis and Ethics* 1955 the beautiful sociological and humanist study of Spinoza and the *Rise of Liberalism* 1958 his essays on *The Social Roots of Einstein's Theory of Relativity* 1971 together with the book on *Einstein and the Generations of Science* 1974 the splendid reader from the works of Marx and Engels *Basic Writings on Politics and Philosophy* 1959 which was a major text of the 60s the stimulating essays on the social formation which seems to

have been required for a modern scientific movement to develop set forth most convincingly in *The Scientific Intellectual* 1963 The Engaged Historian Stefan Berger, 2019-04-01 On the surface historical scholarship might seem thoroughly incompatible with political engagement the ideal historian many imagine is a disinterested observer focused exclusively on the past In truth however political action and historical research have been deeply intertwined for as long as the historical profession has existed In this insightful collection practicing historians analyze reflect on and share their experiences of this complex relationship From the influence of historical scholarship on world political leaders to the present day participation of researchers in post conflict societies and the Occupy movement these studies afford distinctive humane and stimulating views on historical practice and practitioners
