Soviet Strategic Conduct And The Prospects For Stability:

Soviet Strategic Conduct and the Prospects for Stability Benjamin S. Lambeth, 1980-01-01 Throughout the past decade the Soviets have refused to entertain SALT proposals that would require the Soviet Union to become an active partner in increasing its own vulnerabilities They have also revealed a penchant for immoderate levels of arms acquisition which raises disturbing questions about their willingness to settle for a strategic posture essentially equivalent to that of the United States These features of Soviet strategic style constitute major obstacles in the path of achieving a cooperative solution to the security dilemma traditionally espoused by Western theories of mutual assured destruction If the United States is to endure as a respectable player in the strategic arms competition it will have to begin imposing measures conducive to stability through a strategy that appeals primarily to Soviet sensitivities rather than to the doubtful prospect of eventual Soviet convergence with the preferred concepts of the West

Future of Strategic Deterrence

Christoph Bertram, 1981-06-18 *European Peace Movements and the Future of the Western Alliance* Walter Laqueur, 2017-09-08 This extraordinary compendium concerns the future of the Western alliance and the development of the peace movements in Europe and in the United States The peace movement is an old phenomenon given new life by NATO decisions concerning nuclear deployment in Europe and the Soviet responses along the same lines After a long postwar marriage Europeans and Americans alike are reexamining the premises of the Western alliance The contributors provide a variety of scenarios extending from the maintenance of the status quo to the complete dismantling of the Western alliance or at least of its NATO component In a context of rapid change and new challenges to the democratic bloc the editors and authors argue for higher levels of economic integration and caution that competition might spill over into political collapse The work deals with thorny security issues in a frank and policy oriented way While each contributor expresses a unique standpoint a surprising consensus emerges The need for democratic nations to move toward a higher policy ground in order to preserve the fundamental alliance that led to the postwar consensus to begin with Some contributors feel this is still possible others that the time has passed and that national rather than regional interests will once more prevail The work contains an extraordinary array of talent from both the American and European perspectives Among the major contributors and their themes are Henry Kissinger on A Plan to Reshape NATO William G Hyland on The European Peace Movement and NATO Irving Kristol on What s Wrong with NATO Theodore Draper on The Western Misalliance Niels Haagerup on The Nordic Peace Movements Martin Ceadel on The British Nuclear Disarmers and Jeffrey Herf on The SPD and the Peace

The State of Western Research on Soviet Military Strategy and Policy Benjamin S. Lambeth,1984 This Note reviews Western research on Soviet military thought with special emphasis on Soviet doctrine and its impact on Soviet force planning and behavior It traces the evolution of the field since the 1950s examines the ongoing debate over major issues regarding the Soviet military challenge discusses problems of evidence and interpretation as they apply to Soviet military research and suggests new directions for the field It is the overall character of the Soviet threat not Soviet doctrine in isolation that inspires the most heated contention in the current national security debate Although some of this contention revolves about legitimate differences over the meaning of ambiguous data it stems for the most part from conflicting a priori assumptions about the Soviet Union Key words include Military strategy
