Soviet Fighters:

Soviet Fighters of the Second World War Jason Nicholas Moore, 2021-07-30 The Red Air Force had just started to re-equip with modern monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union. Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes. Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin. Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters, the Soviets then settled on two main lines of development: the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7, and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters. Not only are these aircraft accurately described but experimental fighters are also dealt with. In addition, colour profiles illustrate these aircraft in terms of design, camouflage and markings. From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war, all Red Air Force fighters are covered in this comprehensive volume. [Soviet Cold War Fighters](#) Alexander Mladenov, 2017-04-20 Beautifully illustrated with many rare and unpublished photographs, *Soviet Cold War Fighters* looks at the main development periods of Soviet fighter designs and covers all the important features and developments for each of a total of four generations of fighter. From the late 1940s to the early 1980s, that witnessed the most iconic and powerful fighters such as the legendary MiG 15, MiG 21, Tu 128, Su 9, MiG 23, MiG 25, reach for the skies followed by the modern day MiG 29, MiG 31 and Su 27 which strike fear in the West for their phenomenal weaponry and blistering performance. All aircraft are described in detail with facts and figures including their weapons and instances of combat employment as well as explaining how the Cold War drastically changed Soviet fighter design to counter the West. Researched and written by Alexander Mladenov, a leading aviation journalist, this is a highly detailed testament to leading Soviet fighter design and development. **Soviet Fighters** Doug Richardson, 1989-09 [The Russian Air Force in the Eyes of German Commanders](#) Generalleutnant Walter Schwabedissen, 2017-06-28 *The Russian Air Force in the Eyes of German Commanders* by Generalleutnant a D Walter Schwabedissen is one of a series of historical studies written by or based on information supplied by former key officers of the GAF for the United States Air Force Historical Division. The overall purpose of the series is twofold: 1. To provide the U S Air Force with a comprehensive and insofar as possible authoritative history of a major air force which suffered defeat in World War II, a history prepared by many of the principal and responsible leaders of that air force; 2. to provide a firsthand account of that air force's unique combat in a major war, especially its fight against the forces of the Soviet Union. This series of studies therefore covers in large part virtually all phases of the Luftwaffe's operations and organization from its camouflaged origin in the Reichswehr during the period of secret German rearmament following World War I through its participation in the Spanish Civil War and its massive operations and final defeat in World War II, with particular attention to the air war on the Eastern Front. In World War II the Russian Air Force came of age. The

men most vitally concerned with this aside from the Russians themselves were commanders in the German armed forces The experience of these commanders then constitutes a unique source for information on an organization whose capabilities both past and future are of vital concern to the world The chief German experience with the Russian Air Force derives from World War II It was during this period that the Russians learned most from the Germans and the Germans learned most about the Russians This study exploits this broad German experience Compiled from the official records of the German Air Force and from reports written by German commanders who saw action in the Russian campaign it documents many of the Russian Air Force s achievements as well as its failures *Department of State Bulletin* ,1959 The official monthly record of United States foreign policy Department of Defense Authorization for Appropriations for Fiscal Year 1981 United States. FDR and the Soviet Union Mary E. Glantz, 2005 Throughout his presidency Franklin Roosevelt was determined to pursue a peaceful accommodation with an increasingly powerful Soviet Union an inclination reinforced by the onset of world war Roosevelt knew that defeating the Axis powers would require major contributions by the Soviets and their Red Army and so despite his misgivings about Stalin s expansionist motives he pushed for friendlier relations Yet almost from the moment he was inaugurated lower level officials challenged FDR s ability to carry out this policy Mary Glantz analyzes tensions shaping the policy stance of the United States toward the Soviet Union before during and immediately after World War II Focusing on the conflicts between a president who sought close relations between the two nations and the diplomatic and military officers who opposed them she shows how these career officers were able to resist and shape presidential policy and how their critical views helped shape the parameters of the subsequent Cold War Venturing into the largely uncharted waters of bureaucratic politics Glantz examines overlooked aspects of wartime relations between Washington and Moscow to highlight the roles played by U S personnel in the U S S R in formulating and implementing policies governing the American Soviet relationship She takes readers into the American embassy in Moscow to show how individuals like Ambassadors Joseph Davies Lawrence Steinhardt and Averell Harriman and U S military attaches like Joseph Michela influenced policy and reveals how private resistance sometimes turned into public dispute She also presents new material on the controversial military attach lend lease director Phillip Faymonville a largely neglected officer who understood the Soviet system and supported Roosevelt s policy Deftly combining military with diplomatic history Glantz traces these philosophical and policy battles to show how difficult it was for even a highly popular president like Roosevelt to overcome such entrenched and

determined opposition Although he reorganized federal offices and appointed ambassadors who shared his views in the end he was unable to outlast his bureaucratic opponents or change their minds With his death anti Soviet factions rushed into the policymaking vacuum to become the primary architects of Truman s Cold War containment policy A case study in foreign relations high level policymaking and civil military relations FDR and the Soviet Union enlarges our understanding of the ideologies and events that set the stage for the Cold War It adds a new dimension to our understanding of Soviet American relations as it sheds new light on the surprising power of those in low places

Fighter Operations in Europe and North Africa, 1939-1945 David Wragg, 2012-02-29 Fighter Operations in Europe and North Africa 1939 1945 tells the story of Allied and German fighter pilots in Europe over the Mediterranean and in North Africa during the Second World War The book starts with the early skirmishes as each side tested the others defenses moves through the Battle of Britain and then the Blitz when the emphasis switched from single engined day fighters to twin engined night fighters while increasingly fighters were used to sweep over enemy air fields and lines of communication in occupied France This overlapped with the need to provide air cover for the besieged island fortress of Malta by day and by night as well as defensive operations against Axis forces in Crete and North Africa but as the balance of power changed in North Africa the Desert Air Force was formed incorporating elements from many Allied air forces and the emphasis moved to offensive operations in support of ground forces The invasions of Italy and the South of France also called for fighter cover initially by carrier based aircraft The lessons learnt in North Africa were put to good use by the 2nd Allied Tactical Air Force which accompanied the advancing allied armies towards and eventually into Germany achieving all important air supremacy which was a major factor in the Allied victory The book also covers Luftwaffe fighter pilots as they sought to stop the RAF by night and the USAAF by day against increasingly overwhelming odds
