National Security Issues of the USSR Murray Feshbach,2012-12-06 LORD CARRINGTON Secretary General North Atlantic Treaty Organisation In providing a foreword to this volume I have to declare an interest I was and am still an enthusiastic advocate of the idea of having a resident Sovietologist at NATO headquarters Indeed I wondered how the work of the organisation had been done for so long without the benefit of a resident expert on a subject of such crucial interest I was therefore delighted when an American academic of high reputation Murray Feshbach joined us as our first Sovietologist I was also encouraged that he decided to organise last November a Workshop in which NATO staff could take part and which would attract prestigious participants from all the countries of this alliance I saw for myself the high level of interest created by the Workshop and judge it to have a very considerable success I hope there will be other similar events in the future There is no doubt that in the light of the series of developments and changes launched over recent months by Mr **Negotiating START** Kerry M. Kartchner, The United States and the Soviet Union have been negotiating nuclear arms control agreements for over twenty years yet radical differences remain in the two sides concept of and approaches to strategic stability and

arms control This book compares and contrasts those approaches using START Strategic Arms Reduction Treaty as a case study Throughout two decades of negotiation U S policy has been directed toward dialogue that would encourage convergence of American and Soviet thought on nuclear deterrence In Kartchner s view that hope is belied not only by continuing asymmetries in the development and deployment of their strategic nuclear arsenals but by differing U S and Soviet negotiating positions The Reagan administration viewed START as a means of repudiating SALT II restoring a measure of balance in the U S Soviet strategic competition and as a way of closing the so called window of vulnerability In contrast Kartchner analyzes the Soviets differing views of nuclear balance emphasizing their satisfaction with SALT II and a strategic equilibrium shaped by a decade of bilateral arms control Kartchner offers a detailed exposition of the major negotiating issues in START contrasting concerns of U S and Soviet negotiators Not surprisingly each side s agenda was dominated by weapon systems that figure prominently in the other s development program The author concludes by summarizing and comparing American and Soviet quests for stability and drawing up an assessment of U S efforts in both SALT and START to use arms control negotiations as a kind of classroom for instructing Soviet officials in American notions of stabilizing versus destabilizing weapon technology and America s own ethnocentric view of stability START will profoundly affect the acquisition operation maintenance and cost of U S strategic nuclear forces well into the next century The history and analysis presented here will provide an essential source to policymakers and students of military political relations for much needed further study of this treaty s implications
