Soviet Military Intervention In Hungary 1956:

Soviet Military Intervention in Hungary, 1956 Jenő Györkei, Miklós Horváth, 1999 This first detailed account of Soviet military operations is based on access to unpublished material in Soviet archives which have recently been reclassified The major contribution made by the book is its source material which reveals new information on the organization command strategy and tactics of the Soviet armed forces which invaded Hungary in 1956 Particularly interesting is the precise documentation of the irrationally large size of the forces The volume is based on research in Soviet archives and this alone makes it of unique scholarly importance **A Military History of the Cold War, 1944-1962** Jonathan M.

House, 2012-11-20 The Cold War did not culminate in World War III as so many in the 1950s and 1960s feared yet it spawned a host of military engagements that affected millions of lives This book is the first comprehensive multinational overview of military affairs during the early Cold War beginning with conflicts during World War II in Warsaw Athens and Saigon and ending with the Cuban Missile Crisis A major theme of this account is the relationship between government policy and military preparedness and strategy Author Jonathan M House tells of generals engaging in policy confrontations with their governments political leaders among them Anthony Eden Nikita Khrushchev and John F Kennedy many of whom made military decisions that hamstrung their own political goals In the pressure cooker atmosphere of atomic preparedness politicians as well as soldiers seemed instinctively to prefer military solutions to political problems And national security policies had military implications that took on a life of their own The invasion of South Korea convinced European policy makers that effective deterrence and containment required building up and maintaining credible forces Desire to strengthen the North Atlantic alliance militarily accelerated the rearmament of West Germany and the drive for its sovereignty In addition to examining the major confrontations nuclear and conventional between Washington Moscow and Beijing including the crises over Berlin and Formosa House traces often overlooked military operations against the insurgencies of the era such as French efforts in Indochina and Algeria and British struggles in Malaya Kenya Cyprus and Aden Now more than fifty years after the events House describes understanding the origins and trajectory of the Cold War is as important as ever By the late 1950s the United States had sent forces to Vietnam and the Middle East setting the stage for future conflicts in both regions House's account of the complex relationship between diplomacy and military action directly relates to the insurgencies counterinsurgencies and confrontations that now occupy our attention across the globe *Tightrope: Finland and Hungary in the Cold War* Dennis Werling, 2023-10-13 Finland and Hungary both fought on the losing side in WWII Yet the former was able to resist the overwhelming power of its Soviet neighbour while Hungary whose status was uncertain until 1947 was not Could the revolt of 1956 have been a turning point How did the Helsinki Accords contribute to the end of the Cold War , **International Law and the Use of Armed Force** Joel Westra, 2007-04-11 Since the UN Charter came into effect in 1945 there have been numerous incidents in which one or more of the five major powers at least arguably

violated the Charter's Article 24 prohibition of force. Such incidents notwithstanding, this book demonstrates how the Charter restrains the major powers' military actions. As an instrument of international order, the Charter provides a framework of legal rules restricting the use of armed force. Although these rules are subject to auto-interpretation by the major powers as a consequence of their veto, they create an expectation of compliance that subjects the major powers' military actions to international scrutiny. To reduce the likelihood of resistance from states threatened by such actions, major powers exercise prudential restraint, altering the manner and timing of their military actions in accordance with the legal arguments offered to justify those actions as consistent with the Charter and therefore not threatening to the existing international order. The book evaluates the efficacy of the Charter using large N methods and five case studies: US intervention in the Caribbean (1953-61), Anglo-French intervention in Egypt (1956), Soviet intervention in Hungary (1956), US-British intervention in Iraq (1990-98), and US-British intervention in Iraq (1999-2003). The book's extensive focus on the two Iraq cases provides a basis for timely evaluation of the continuing salience and possible reforms of the UN Charter system. This book will be of much interest to students of security studies, international law, and international relations.
