

Soviet Scientist in China

© MW Books
MIKHAIL KLOCHKO

The author was a top-ranking Soviet scientist, who received the full red-carpet treatment when he was invited, in 1948, by the Chinese Academy of Sciences to help develop their research programmes and work as an instructor. If his laboratory work was frustrated by the intensive programme of political education his students had to attend, the cause of science suffered even more when, on his second visit, in 1960, all Soviet technicians were abruptly recalled. With his wide contacts among the educated Chinese, his considerable influence inside the Soviet hierarchy and his gift for observation – human as well as scientific – Dr Klochko, who escaped to the West in 1961, has been able to write perhaps the most authentic account to date of the heyday of Sino-Soviet co-operation and of the tensions which built up to produce the rift. As an authoritative guide to the present state of Chinese science, both theoretical and applied, and as an insight such as is not available to the less privileged Western visitor into life in Chinese educated circles, this book is a unique and valuable addition to the literature on China today.

The China Paradox Paul G. Clifford,2021-12-06 In *The China Paradox* At the Front Line of Economic Transformation Harvard University based historian of modern China and business strategist Dr Paul G Clifford documents the twists and turns of China s dramatic and unforeseen rise over the last four decades He sheds light on the delicate and fragile balance of forces at the heart of the success of China s hybrid model explaining how the ruling Communist Party boldly led the nation s economic reforms as the surest way to preserve its grip on political power Five years after this book was first published much has changed within China and in its relationship with the world This second edition provides extensive fresh new material It explains how China has raised its game moving from a catch up mode to technological innovation in some areas while still languishing in technology dependence in other respects Earlier China had shown signs that its driving spirit was faltering with its sails flapping Under Xi Jinping renewed energy has been injected But at the same time Xi and his party have strongly reinforced their control across society and the economy posing the question of whether Xi s New Era in fact marks a retreat from the reforms This second edition contains two new chapters One profiles Huawei a national champion in advanced technology Another focuses on China s frictions with the world which have been fueled by a perception that its technology progress threatens US global dominance coupled with China s human rights record In addition against a background of the challenges faced by Alibaba and other firms there is analysis of this watershed in China s private sector s autonomy There is also extensive new insight into Xi Jinping s rule As it celebrates its 100th anniversary in 2021 the Chinese Communist Party displays strong optimism over its continued governance of China But that should not mask the longer term risks to China s development and stability if its hybrid model continues to unravel as reforms are abandoned in favor of heightened autocracy

The Constitutional and Legal Development of the Chinese Presidency Zhang Runhua,2014-11-05 This book investigates the legal and political evolution of Chinese presidency from the period of its forerunner in the 1930s its

establishment in 1954 to its abolition in 1975 and its restoration in 1982 and discovers that the presidency has evolved from a traditional Chinese title into a political position and then a state institution that has the constitutional appearance of a Western style semi presidency However politically it has functioned in a Stalinist party state with Chinese characteristics whose candidates have been produced according to the CCP's step by step succession rules designated by the party leaders Real political decision making power has not only been limited by these succession rules but also by the president's role and status within the CCP's collective supreme body The author weaves the themes of Chinese politics and law together and explores not only the political implications of those constitutional provisions and amendments regarding this office but also the constitutional significance of the CCP's major political practices such as Mao Zedong's power of last say his idea of two fronts his controversial abolition of the chairmanship Deng Xiaoping's idea of the nucleus of leadership and diplomacy of the head of state by Chinese presidents thus illuminating how law has been made in those unpredictable political environments and how politics has been defined by law The author concludes that the office of president is the key to understanding how power in China derives first from the CCP second from the military and third from the government loosely prescribed by laws Even more important the millennia old Confucian concept of the charismatic leader is alive and well While all eyes are on the new incumbent his predecessors have loomed large and continue to exert significant influence on him Underlining decades of constitutional evolution and shifting political dynamics have been the changing foreign influences and local demands on China With so many variables at play the office of the president will certainly continue to evolve

The Cambridge History of China: Volume 15, The People's Republic, Part 2, Revolutions Within the Chinese Revolution, 1966-1982 Roderick MacFarquhar, John K. Fairbank, Denis Crispin Twitchett, 1991-11-29 In continuing the post revolution study started in Volume 14 Volume 15 considers the developments in Mao's thoughts and how they related to China's government The most comprehensive account of this turbulent period in Chinese history

China's Military Procurement in the Reform Era Yoram Evron, 2015-06-26 The decisions that shape the policy of weapons procurement are an important area of national security policy This is all the more true for China which during recent decades has vacillated between different sources and directions of military build up This book explores the politics of military procurement in China under the successive leaderships of Deng Xiaoping Jiang Zemin and Hu Jintao It shows how China's political and military leaders have sought to adjust military procurement policy to meet China's strategic objectives to relate it to non military needs to strike a balance between the import of weapons and indigenous production and to determine the connections between hardware and other components of military power Exploring in detail five major shifts in the nation's military procurement it traces the considerations and negotiations among China's civilian and military leaderships By doing so it offers both a conceptual framework and empirical grounds for evaluating the factors that shape China's military procurement directions as well as their limitations prospects and operational implications As the first book to study comprehensively and systematically the

attributes shaping China's military procurement it will be of great interest to students and scholars of Chinese politics
