Soviet Theory Of Knowledge:

Soviet Theory of Knowledge J.E. Blakeley, 2010-12-30 This book offers a complete survey of contemporary Soviet theory of knowledge. It is by no means meant to replace De Vries' excellent treatise on the same subject. Since De Vries depended mainly on the classics of Marxism and the few contemporary Soviet works which were available in German translation, his account is at best an introduction to the contemporary period. In a sense, this book is complementary to his; he presents the doctrines of the classics and criticizes them; this book recounts what came after and what is going on now. Epistemology and theory of knowledge are taken here as equivalent terms representing the Soviet *gnose%gija* and *teorija poznanija*. No attempt to justify the existence of such a philosophical discipline will be attempted here. Even outside of this question of the legitimacy of epistemology, it is not easy to delimit the domain of its purview. We have therefore taken it in a wider rather than narrow sense. This means that some questions of logic and psychology have been taken up to the extent that they overlap with the field of philosophical consideration of knowledge.

Soviet theory of knowledge Thomas J. Blakeley, 1964 *Soviet Foreign Policy 1917-1991* Jr. Fleron, 2017-07-05 The purpose of this anthology is to deepen Western understanding of the sources and substance of the foreign policy of the Soviet Union. Authoritative analysts here explore significant issues in Soviet foreign relations from the era of the Bolshevik Revolution and the Civil War to the period of reform that preceded the final collapse of the Soviet system. The volume is designed for courses in Soviet political history, diplomatic history, comparative foreign policy, and the mainstream of international relations.

Philosophy in the Soviet Union E. Laszlo, 2012-12-06 Soviet philosophy can no longer be ignored by any serious student of contemporary thought. It is the work of academic philosophers who on the whole are neither more nor less competent than their colleagues in the free world. They have, however, inherited a reputation for the dogmatic repetition of superannuated doctrines. This reputation engendered by poor work under political pressure was justified until about the mid-fifties. However, in the mid-sixties, when declining pressures make for the toleration of a wider scale of qualified opinion, it is no longer that. The present survey of Soviet thought in the mid-sixties, comprising papers by Western specialists in its major domains, gives an up-to-date account of an impressive field of philosophical endeavor which, awakened from dogmatic slumbers, rapidly gains in interest and encourages hopes of becoming a valuable component in the vast complex of contemporary philosophy. The studies on Soviet logic and atheism have originally appeared in a special issue of *Inquiry* Vol. 9, 1, devoted to philosophy in Eastern Europe and edited by the present writer on behalf of Professor Arne Naess. The other papers of this volume are reprinted from *Studies in Soviet Thought*, the only Western philosophical review entirely dedicated to systematic studies in this field. The necessary permissions by editors and publishers have been granted and are gratefully acknowledged.

Soviet Union during the most buoyant period in the country's history. Contrary to the widespread view of Russian modernity as a product of intellectual borrowing and imitation, the essays collected in this volume reveal the creative spirit of Russian thought which produced a range of original philosophical and social ideas as well as great literature, art and criticism. While rejecting reductive interpretations, the Handbook employs a unifying approach to its subject matter, presenting Russian thought in the context of the country's changing historical landscape. This Handbook will open up a new intellectual world to many readers and provide a secure base for its further exploration.

ALEKSANDR BOGDANOV On April 7 1928 the career of one of the most extraordinary figures of Russian and early Soviet intellectual life came to an abrupt and premature end. In the process of an experiment on blood transfusion Aleksandr Aleksandrovich Malinovsky better known as Bogdanov had exchanged his blood with that of a critically ill malaria victim in hopes of saving both the patient and his blood. The outcome of this may be guessed: both doctor and patient died forthwith. Although an extraordinary venture on Bogdanov's part for it was part of a search for the means to immortality, the transfusion experiment was only one of a host of startling things he had done in his thirty years in Russian politics and public life. In actuality the activities and achievement of his two years as director of the Soviet Union's first institute for the study of blood transfusion seem virtually insignificant beside the events of earlier years. It would be fair to say that Aleksandr Bogdanov stood in a singularly prominent position in the political and intellectual life of Russia from the turn of the century to 1930. Politically he had been Lenin's only serious rival for leadership among the Bolsheviks before 1917. In the early years of the Soviet regime Bogdanov stood head and shoulders above any other public figure operating outside the ranks of the Party. Only a handful of men in the

Humanistic Foundation of Criminal Law Xingliang Chen, 2023-03-04 This book uses humanity, rationality and experience and the freedom of human will as a theoretical perspective to examine the basic framework of criminal law theories constructed by the criminal classic school and the criminal empirical school. The author puts forward the principle of the duality of rationality and experience of humanity and affirms the determinism of human behavior in the ontological sense and the freedom of will in the axiological sense. From this point of view this book examines the humanistic foundations of crime and punishment legislation and justice.

The Soviet Critique of Neopositivism W.F. Boeselager, 2012-12-06 The first of the people to be thanked for their help during the composition of this work is Professor I. M. Bochenski under whom I had the good fortune to study for an extended period of time. Without his help it is doubtful that this work would have been written at all. Among the other professors who helped along the way I would like to cite in particular Professors A. F. Utz, M. D. Philippe and N. Luyten of the University of Fribourg. Many friends were present at the birth of the ideas contained in this book. By naming K. G. Ballestrin, T. I. Blakeley and M. F. Gager, I do not want to slight any of the rest. It was A. Spiekermann in Hollinghofen who saw to it that other preoccupations did not rob me of all the time needed for the study of the subject matter and to the composition of this treatise. Of particular help in getting sources from the libraries

of the world were Miss Lifschitz of the Institute of East European Studies and Mr Uldry of the Cantonal Library in Fribourg Switzerland Finally my patient typist Mrs Frey in Munster deserves special mention for her beautiful work China Learns from the Soviet Union, 1949-Present Hua-Yu Li, 2010-01-05 It is well known that the Soviet Union strongly influenced China in the early 1950s since China committed itself both to the Sino Soviet alliance and to the Soviet model of building socialism What is less well known is that Chinese proved receptive not only to the Soviet economic model but also to the emulation of the Soviet Union in realms such as those of ideology education science and culture In this book an international group of scholars examines China s acceptance and ultimate rejection of Soviet models and practices in economic cultural social and other realms The chapters vividly illustrate the wide ranging and multi dimensional nature of Soviet influence which to this day continues to manifest itself in one critical aspect namely in China s rejection of liberal political reform **the Rise of Science in Realtion to Society** Leonard M.
