The Rolling Stones Robert Anson Heinlein, 1985 When the Stone twins made up their minds to leave Lunar City in a secondhand spaceship they hadn't planned on having their whole family accompany them But the Stones were not your ordinary Lunar family no way and their voyage through the solar system sure proved it What began as a simple business expedition to Mars soon mushroomed into a dangerous situation when Grandma Stone was lost in space Then just when everything seemed to be getting better a Martian flatcat came aboard and fouled up the works But the real trouble didn't get underway until the Stones headed for the asteroid belt to take up a mining proposition they somehow couldn't refuse **The Rolling Stones** Robert A. A Static Microeconomic Model of Pure Competition Christoph Klein, 2012-12-06 This book studies a large economy It deals with a static microeconomic model of an exchange market with pure competition Instead of the sigma additive theory the finitely additive theory the general Jordan content and the general Riemann integration are used respectively By a specialized probability model the author obtains a precise interpretation strictly based on microeconomic methods of measurement In particular the meaning of an agent and of a coalition is explained and the Core Walras equivalence is deduced The author elaborates an elementary representation by broken continuous functions and the classical Riemann integral A conjecture concerning the reduction of the dynamical case onto generalized differential equations is added
