Onizuka who had already been the first Asian American astronaut in space But the highlight of the mission was to be the NASA Teacher in Space Project in which a civilian teacher would give teaching lessons to his or her class while onboard the space shuttle The winner of the competition was Christa McAuliffe a high school teacher in Concord New Hampshire who wrote a winning essay and had to undergo a year of astronaut training before that fateful day It was a beautiful morning and many spectators came to the Kennedy Space Center to watch the launch including McAuliffe's parents and her students Several news networks were carrying live broadcasts of the launch including live shots of McAuliffe's parents as they watched the Challenger liftoff Mission Control's transmissions to the Challenger were being blared over loudspeakers to give spectators a play by play of the shuttle's ascent Ascent seemed to be going normally during the first minute but about 75 seconds into the ascent a plastic O ring used to seal a joint in one of the solid rocket boosters failed causing a breach of hot gas That gas spread to the other rocket booster and the external fuel tank causing an explosion When the spectators saw the explosion many of them started cheering unaware of what was really happening But Mission Control quickly announced that there had been some sort of problem and the crowd became confused and then panicky as the space shuttle fuel tank and rocket boosters all broke apart and flew in opposite directions Some cameras fixed on the falling debris as it fell to the ocean while others stayed focused on McAuliffe's parents The entire crew was killed in the explosion and investigations concluded that they may have survived until crashing into the ocean After the Challenger

The Challenger Thomas Streissguth, 2003 Portrays the space shuttle Challenger the events that led to its destruction and the effects of the disaster on the space program *The Tragedy of the Space Shuttle Challenger* Henry M. Holden, 2004 Space flight is the ultimate adventure The astronauts that volunteer to explore the frontiers of space are both courageous and highly skilled Their missions into the unknown are exciting and groundbreaking as well as very dangerous From famous astronauts such as the legendary John Glenn and Sally Ride to disasters such as Apollo 13 and the fatal Challenger accident each book in this series captures the dream the excitement and the risk of space exploration Book jacket **Report to the**

President by the Presidential Commission on the Space Shuttle Challenger Accident United States. Presidential Commission on the Space Shuttle Challenger Accident, 1986 **After the Challenger** Robert Marsh, 2009 At school in Cocoa Beach Florida 15 year old Dustin Martinez watches the Challenger space shuttle launch He's always been interested in the space program but this launch is even more exciting For the first time in history a schoolteacher will be flying aboard the shuttle Apollo 1 and the Space Shuttle Challenger Charles River Editors, 2017-02-08 Includes pictures Includes accounts of the disasters and government reports about them Includes online resources and a bibliography for further reading The Apollo space program is the most famous and celebrated in American history but the first successful landing of men on the Moon during Apollo 11 had complicated roots dating back over a decade and it also involved one of NASA's most infamous tragedies Landing on the Moon presented an ideal goal all on its own but the government's urgency in designing the Apollo program was actually brought about by the Soviet Union which spent much of the 1950s leaving the United States in its dust and rocket fuel In 1957 at a time when people were concerned about communism and nuclear war many Americans were dismayed by news that the Soviet Union was successfully launching satellites into orbit On May 25 1961 President John F Kennedy addressed Congress and asked the nation to commit itself to achieving the goal before this decade is out of landing a man on the Moon and returning him safely to the Earth Given America's inability to even put a man in orbit yet this seemed

like an overly ambitious goal and it isn't even clear that Kennedy himself believed it possible after all he was reluctant to meet NASA Administrator James E Webb's initial funding requests As Apollo 11's name suggests there were actually a number of Apollo missions that came before many of which included testing the rockets and different orbital and lunar modules in orbit In fact it wasn't until Apollo 8 that a manned vehicle was sent towards the Moon and back and before that mission the most famous Apollo mission was Apollo 1 albeit for all the wrong reasons There were no delusions regarding the dangers of manned space travel but they were brought home on January 27 1967 when all three astronauts were killed by a fire that ignited in the cabin during a launch rehearsal To this day there is still debate over what ignited the fire but the disaster made clear that the modules being used by NASA had a series of fatal flaws In the decades after the Apollo program American space shuttles flew over 130 missions and successfully completed over 98% of them but unfortunately the two most famous missions were the ones that ended tragically aboard the Challenger and Columbia The Space Shuttle Challenger was the most heavily used space shuttle in the three years it was operational carrying the first minority astronaut and woman astronaut into space Challenger was also the first space shuttle to complete a landing at night On the morning of January 28 1986 the Space Shuttle Challenger launched for the 10th time beginning mission STS 51 L Space shuttles had already successfully completed 24 missions and no American spacecraft had ever failed to reach orbit during an official mission Ascent seemed to be going normally during the first minute but about 75 seconds into the ascent a plastic O ring used to seal a joint in one of the solid rocket boosters failed causing a breach of hot gas That gas spread to the other rocket booster and the external fuel tank causing an explosion When the spectators saw the explosion many of them started cheering unaware of what was really happening But Mission Control quickly announced that there had been some sort of problem and the crowd became confused and then panicky as the space shuttle fuel tank and rocket boosters all broke apart and flew in opposite directions Some cameras fixed on the falling debris as it fell to the ocean The entire crew was killed in the explosion and investigations concluded that they may have survived until crashing into the ocean After the Challenger disaster the space shuttles were grounded for about two years and a commission issued findings that would be used in an effort to prevent similar tragedies

Space Shuttle Challenger Ben Evans,2007-07-05 Ironically the loss of Challenger in January 1986 fired my interest in space exploration more than any other single event I was nine years old My parents were at the time midway through moving house and luckily the TV was one of the few domestic items still to be packed I watched the entire horror unfold live on all of the network stations Admittedly my fascination with rockets and astronauts stars and planets had begun several years earlier but Challenger s destruction turned it from an occasional hobby to a fascination which has remained with me ever since In September 1988 aged 11 I came home from school to watch STS 26 return the Shuttle fleet to orbital operations Five years later I gave a speech on the STS 51L disaster to my teacher as part of my GCSE English assessment Another decade passed and now a teacher myself I returned to my school one cold Monday morning to explain to my pupils what had happened to Challenger s sister ship Columbia a few days earlier In some ways the loss of Columbia affected me more deeply than Challenger
