Internalism and the Limits of Twin Earth Scenarios Jan Almäng, 2025-04-01 Internalism and the Limits of Twin Earth Scenarios A Study of Phenomenal Intentionalism explores visual perceptual experiences and whether or not visual intentional content is internal or external Coming from the standpoint of phenomenal intentionalism this book assumes that phenomenal consciousness is internal to the subject of a perceptual experience Jan Almäng argues that the structure of the phenomenal character of visual experiences sets certain limits with respect to whether Twin Earth thought experiments can be successful suggesting that while Twin Earth thought experiments are successful for entities such as colours they fail with respect to more complex geometrical structures Because visual perceptual experiences represent in an analogue manner this prevents certain kinds of Twin Earth scenarios from being successful Almäng then argues that some phenomenal intentional content is internal If visual experiences have a perspectival structure that this by necessity means that they are intentional

Traveling the cosmos - Risks, rewards, and radiation! Janice L. Huff, Eleanor Blakely, Polly Chang, 2024-12-17 Space is known as the final frontier and for good reason Many of us remember looking at the stars as a kid and dreaming about going there So far only a few hundred humans have ever been in space and these astronauts have had to train long and hard for

that chance This is because space is harsh to humans things we experience on Earth like gravity an atmosphere and even each other are missing in the space environment One of the biggest issues for human space exploration is the radiation exposure astronauts will experience during a mission Radiation exposure can cause several health issues including cancer cardiovascular disease and brain and performance decrements There is also radiation exposure from sun flares that astronauts need protection for To ensure that astronauts can safely explore the cosmos and remain healthy we have to characterize the human health risks from space radiation exposure and provide prevention or protection strategies when necessary The issue of space radiation is complex and multidisciplinary It involves the range of sciences from basic physics all the way to the clinician In this collection we present articles both core concept and new discovery article types that cover this wide range of topics Space Radiation Bootcamp what is space radiation How do we study space radiation effects in Earth based labs What does space radiation mean for the human in space Keeping the astronauts safe from solar flares Cardiovascular health effects in our astronauts Brain and behavioral Effects from space radiation in our astronauts Cancer the astronaut These articles are reviewed by young minds like yourself with the same shared interests and passion for getting those spacesuit boots back onto the Moon and then forward to Mars We hope that this collection fuels that spark in you like it does in us
