Klein,2012-09-10 This new study considers military space strategy within the context of the land and naval strategies of the past Explaining why and how strategists note the similarities of space operations to those of the air and naval forces this book shows why many such strategies unintentionally lead to overemphasizing the importance of space based offensive weaponry and technology Counter to most U S Air Force doctrines the book argues that space based weapons don t imbue superiority It examines why both air and naval strategic frameworks actually fail to adequately capture the scope of real world issues regarding current space operations Yet by expanding a naval strategic framework to include maritime activities which includes the interaction of land and sea the breadth of issues and concerns regarding space activities and operations can be fully encompassed Commander John Klein United States Navy uses Sir Julian Corbett s maritime strategy as a strategic springboard while observing the salient lessons of other strategists including Sun Tzu Clausewitz Jomini and Mao Tse tung to show how a space strategy and associated principles of space warfare can be derived to predict concerns develop ideas and suggest policy not currently recognized This book will be of great interest to all students and scholars of military and strategic studies and to those with an interest in space strategy in particular *Space Warfare* Nordin Yusof,1999 **Strategic Defense And The American Ethos** Michael Vlahos,2019-07-23 The concept and utility of strategic defense should be evaluated in an embracing cultural context defined by the values attitudes and worldview of society its ethos The Strategic Defense Initiative SDI responds both to changes in the American ethos and to shifts in the balance of power Together these changes have undermined the basis of U S **Department of Defense Authorization for Appropriations for Fiscal Year 1986** United States. military history and global security *Monthly Catalog of United States Government Publications*, 1992 **China's Assertive Nuclear Posture** Baohui Zhang, 2015-02-11 China's nuclear capability is crucial for the balance of power in East Asia and the world. As this book reveals, there have been important changes recently in China's nuclear posture: the movement from a minimum deterrence posture toward a medium nuclear power posture; the pursuit of space warfare and missile defence capabilities; and most significantly, the omission in the 2013 Defence White Paper of any reference to the principle of No First Use. Employing the insights of structural realism, this book argues that the imperatives of an anarchic international order have been the central drivers of China's nuclear assertiveness. The book also assesses the likely impact of China's emerging nuclear posture on its neighbours and on the international strategic balance, especially with the United States. The book concludes by examining China's future nuclear directions in the context of its apparent shift toward a more offensive-oriented international strategy.

The Navy in the Post-Cold War World Colin S. Gray, 2010-11 *The Navy in the Post Cold War World* is the first book to invite the reader to think strategically, explores the strategic relationship among sea, land and air power with particular attention to the course of a conflict viewed as a whole, and ventures boldly into the region of the meaning of space strategy for maritime power and the relevance of that power in the still emerging post Cold War security environment. *The Navy in the Post Cold War World* is unusual because it is written by an internationally recognized general strategic theorist and analyst rather than by a long-standing naval writer. Gray is thus better able to view naval issues in proper perspective. Gray delves deeply into the role of sea power as an enabling agent and team player in the overall enterprise of national and international security. He provides the most current assessment of what sea and space power mean for each other, as well as envisioning the future of maritime-oriented defense.

Laser Weapons In Space Keith B. Payne, 2019-03-04 This is the first comprehensive examination of the issues surrounding the potential development by the United States of a space-based laser weapons program. The authors assess the implications of arms control agreements for a satellite-based laser program, including discussions of recent Soviet space-related arms control initiatives and the forthcoming ABM treaty review. They outline likely Soviet responses to a U.S. space-based laser system, address criticisms of the proposed program, and consider its future in light of developments in U.S. defense strategy and doctrine.

Deep Space Warfare John C. Wright, 2019-11-14 Since the Cold War, outer space has become of strategic importance for nations looking to seize the ultimate high ground. World powers establishing a presence there must consider, among other things, how they will conduct warfare in orbit. Leaders must dispense with Buck Rogers notions about operations in space and realize that policies there will have serious ramifications for geopolitics. How should nations view space? How should they fight there? What would space warfare look like, and how should strategists approach it? Offering critical observations regarding this unique theater of international relations, a military professional explores the strategic implications as human affairs move beyond Earth's atmosphere.
