*Bodies and Boundaries of UK Bear Spaces*, Nick McGlynn, 2024-04-15 *Bodies and Boundaries of UK Bear Spaces* is an exploration of the spaces of the UK's Bear community and the people who are in them. The book details a wealth of existing writing and scholarship on Bears, both historical and contemporary, and uses new empirical research to demonstrate and explain the complexity of Bear in the present-day UK. Moving beyond a focus on masculine attitudes, it emphasises the importance of bodily appearance for Bear communities while also demonstrating the variety of bodies in Bear spaces and the variety amongst Bear spaces themselves. Resisting universalist accounts, the book calls for greater engagement with the conceptual instability and geographic variation of Bear. Written for both academic and non-academic readers, the book combines an engaging conversational style with excerpts from a rich qualitative dataset to help explain new ways of looking at Bears or Bear-y men. *Bodies Boundaries of UK Bear Spaces* is of value to anyone interested in Bears and/or LGBTQ spaces, particularly in the UK context. It also offers much for scholars of men and masculinities, bodies and fatness, gender studies and sexuality and queer studies. *Mapping LGBTQ Spaces and Places*, Marianne Blidon, Stanley D. Brunn, 2022-07-11 This book addresses LGBTQ issues in relation to, among others, law and policy, mobility and migration, children and family, social well-being and identity, visible and invisible landscapes, teaching and instruction, parades, arts and cartography, and mapping. A variety of research methods are used to explore identities, communities, networks and landscapes, all of which can be used in subsequent research and classroom instruction and disciplinary and interdisciplinary levels. This extensive book stimulates future pioneering research ventures in rural and urban settings about existing and proposed LGBTQ policies, individual and group mapping, visible and invisible spaces and the construction of public and private spaces. Through the methodologies and rich bibliographies, this book provides a rich source for future comparative research of scholars working in social work, NGOs

Goldberg,Genny Beemyn,2021-02-26

Transgender studies broadly defined has become increasingly prominent as a field of study over the past several decades particularly in the last ten years The experiences and rights of trans people have also increasingly become the subject of news coverage such as the ability of trans people to access restrooms their participation in the military the issuing of driver s licenses that allow a third gender option the growing visibility of nonbinary trans teens the denial of gender affirming health care to trans youth and the media s misgendering of trans actors With more and more trans people being open about their gender identities doctors nurses psychologists social workers counselors educators higher education administrators student affairs personnel and others are increasingly working with trans individuals who are out But many professionals have little formal training or awareness of the life experiences and needs of the trans population This can seriously interfere with open communications between trans people and service providers and can negatively impact trans people s health outcomes and well being as well as interfere with their educational and career success and advancement Having an authoritative academic resource like The SAGE Encyclopedia of Trans Studies can go a long way toward correcting misconceptions and providing information that is otherwise not readily available This encyclopedia featuring more than 300 well researched articles takes an interdisciplinary and intersectional approach to trans studies Entries address a wide range of topics from broad concepts

e.g. the criminal justice system, activism, mental health to specific subjects e.g. the trans pride flag, the Informed Consent Model, voice therapy to key historical figures, events and organizations e.g. Lili Elbe, the Stonewall Riots, Black Lives Matter. Entries focus on diverse lives, identities and contexts including the experiences of trans people in different racial, religious and sexual communities in the United States and the variety of ways that gender is expressed in other countries. Among the fields of studies covered are psychology, sociology, history, family studies, K-12 and higher education, law, political science, medicine, economics, literature, popular culture, the media and sports. **Forthcoming Books** Rose Arny, 2003-04

Medieval Practices of Space Barbara A. Hanawalt, Michal Kobialka, 2000. The contributors to this volume cross disciplinary and theoretical boundaries to read the words, metaphors, images, signs, poetic illusions and identities with which medieval men and women used space and place to add meaning to the world. **Subject Guide to Books in Print**, 1991

**Exploring Sex and Gender in Bioarchaeology** Sabrina C. Agarwal, Julie K. Wesp, 2017-04. Archaeologists have long used skeletal remains to identify gender. As the contributors to this volume reveal, combining skeletal data with contextual information can provide a richer understanding of life in the past. **Diverse Spaces of Childhood and Youth** Ruth Evans, Louise Holt, 2016-04-08. *Diverse Spaces of Childhood and Youth* focuses on the diverse spaces and discourses of children and youth globally. The chapters explore the influence of gender, age and other socio-cultural differences such as race, ethnicity and migration trajectories on the everyday lives of children and youth in a range of international contexts. These include the diverse urban environments of Istanbul, Copenhagen, Helsinki, Toronto, London and Bratislava and the contrasting rural settings of Ghana and England. The analyses of children's young people's parents and professionals' experiences and discourses provide critical insights into how gender and other socio-cultural differences intersect. The importance of everyday practices and performances in the formation of children's and young people's identities is revealed through, for example, friendships and everyday sociality, mobilities and movements across space in both rural and urban environments. The volume shows how discourses of childhood, particularly those associated with risk, intersect with difference. The recognition of young people's agency and participation is central to many of the chapters whilst also raising methodological questions about how discourses of childhood and youth are researched. Overall, the book provides an original contribution to geographies of children, youth and families and research on diversity and difference in global contexts. This book was published as a special issue of *Children's Geographies*. Exploring Gender and Sikh Traditions Doris R. Jakobsh, 2021-09-01. This volume gathers scholars who focus on gender through a variety of disciplines and approaches to Sikh Studies. The intersections of religion and gender are here explored based on an understanding that both are socially constructed. Far from being static as so often presented in world religions textbooks, religious traditions are constantly in flux, responding to historical, cultural and social contexts. So too is the Sikh tradition in terms of practices, ideologies, rituals and notions of identity. We here conclude that a Sikh tradition does not exist; instead, there are numerous forms thereof. In this

volume Sikhism is presented as a collection of Sikh traditions Gender studies in line with women s liberation masculine and feminist studies have long examined and have long deconstructed the patriarchy but also move to identify other subordinate dominant relations between individuals Indeed there are numerous forms of discrimination and power structures that simultaneously create a multiplicity of oppression Intersectionality has become the basis of an increasingly systematized production of contemporary discourses on feminism and gender analysis as is evidenced by the varied contributions in this volume *Exploring Gender in Vernacular Architecture* Jessica Ellen Sewell,2025-02-03 In *Exploring Gender in Vernacular Architecture* Jessica Ellen Sewell considers the gender of those who create and shape spaces how gender ideology contributes to and manifests itself in built form and what research methods make the observation of gendered experience possible She discusses single gender mixed gender and queer spaces providing a comprehensive look at how gender influences the design and construction of those spaces how those spaces are used and the relationship between gender and the broader architectural landscape In her study Sewell also provides an expansive view of how gender intersects with other categories of power and difference such as race class and age and how this intersectionality contributes to the design and use of built spaces In addition to examining the spaces themselves Sewell explores research methods for studying gendered experiences in architecture She argues that traditional research methods in vernacular architecture studies which often focus on building based fieldwork should be complemented by other methods such as letters oral histories and diaries that expand the understanding of buildings beyond their construction date and reveal how those buildings have been used and represented over time Digging into primary records Sewell posits can help challenge our assumptions about who influences architecture and urban development illuminating the roles of women and others in the building and shaping of space Thoroughly researched yet accessible for scholars new to the study of vernacular architecture *Exploring Gender in Vernacular Architecture* bridges the gap between specialized scholarship and broader public understanding Students of architectural history gender studies and cultural history will find it a valuable resource not only for examining the relationship between gender and architecture but for engaging new methodological tools that may further their own research
