Space In Language And Cognition Explorations In Cognitive Diversity:

Space in Language and Cognition Stephen C. Levinson, 2003-03-20 Languages differ in how they describe space and such differences between languages can be used to explore the relation between language and thought This 2003 book shows that even in a core cognitive domain like spatial thinking language influences how people think memorize and reason about spatial relations and directions After outlining a typology of spatial coordinate systems in language and cognition it is shown that not all languages use all types and that non linguistic cognition mirrors the systems available in the local language The book reports on collaborative interdisciplinary research involving anthropologists linguists and psychologists conducted in many languages and cultures around the world which establishes this robust correlation The overall results suggest that thinking in the cognitive sciences underestimates the transformative power of language on thinking The book will be of interest to linguists psychologists anthropologists and philosophers and especially to students of spatial cognition

Space in Language and Cognition Stephen C. Levinson, 2003-03-20 The book will appeal to all researchers interested in the relation of language to other areas of cognition linguists psychologists anthropologists philosophers and especially to students of spatial cognition **BOOK JACKET** *Grammars of Space* Stephen C. Levinson, David P. Wilkins, 2006-09-14 Spatial language that is the way languages structure the spatial domain is an important area of research offering insights into one of the most central areas of human cognition In this collection a team of leading scholars review the spatial domain across a wide variety of languages Contrary to existing assumptions they show that there is great variation in the way space is conceptually structured across languages thus substantiating the controversial question of how far the foundations of human cognition are innate *Grammars of Space* is a supplement to the psychological information provided in its companion volume *Space in Language and Cognition* It represents a new kind of work in linguistics Semantic Typology which asks what are the semantic parameters used to structure particular semantic fields Comprehensive and informative it will be essential reading for those working on comparative linguistics spatial cognition and the interface between them *Constructions in Cognitive Contexts* Franziska Günther, 2016-11-07 In what ways are language cognition and perception interrelated Do they influence each other This book casts a fresh light on these questions by putting individual speakers cognitive contexts i e their usage preferences and entrenched patterns of linguistic knowledge into the focus of investigation It presents findings from original experimental research on spatial language use which indicate that these individual specific factors indeed play a central role in determining whether or not differences in the current and or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non linguistic behaviour visual attention allocation to and memory for spatial referent scenes These findings form the basis of a new speaker focused usage based model of linguistic relativity which defines language perception cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities **Grammars of Space** Stephen C. Levinson, David P. Wilkins, 2006

In this pioneering collection a team of leading linguists and psychologists look at how the spatial domain is structured in language Drawing on data from a wide range of languages they uncover considerable cross linguistic variation across this central domain adding to debates about the innate foundations of human cognition Semantics - Typology, Diachrony and Processing Klaus Heusinger, Claudia Maienborn, Paul Portner, 2019-02-19 Now available in paperback for the first time since its original publication the material in this book provides a broad accessible guide to semantic typology crosslinguistic semantics and diachronic semantics Coming from a world leading team of authors the book also deals with the concept of meaning in psycholinguistics and neurolinguistics and the understanding of semantics in computer science It is packed with highly cited expert guidance on the key topics in the field making it a bookshelf essential for linguists cognitive scientists philosophers and computer scientists working on natural language

The Routledge Handbook of Language and Culture Farzad Sharifian, 2014-12-17 The Routledge Handbook of Language and Culture presents the first comprehensive survey of research on the relationship between language and culture It provides readers with a clear and accessible introduction to both interdisciplinary and multidisciplinary studies of language and culture and addresses key issues of language and culturally based linguistic research from a variety of perspectives and theoretical frameworks This Handbook features thirty three newly commissioned chapters which cover key areas such as cognitive psychology cognitive linguistics cognitive anthropology linguistic anthropology cultural anthropology and sociolinguistics offer insights into the historical development contemporary theory research and practice of each topic and explore the potential future directions of the field show readers how language and culture research can be of practical benefit to applied areas of research and practice such as intercultural communication and second language teaching and learning Written by a group of prominent scholars from around the globe The Routledge Handbook of Language and Culture provides a vital resource for scholars and students working in this area

Events of Putting and Taking Anetta Kopecka, Bhuvana Narasimhan, 2012-05-09 Events of putting things in places and removing them from places are fundamental activities of human experience But do speakers of different languages construe such events in the same way when describing them This volume investigates placement and removal event descriptions from 18 areally genetically and typologically diverse languages Each chapter describes the lexical and grammatical means used to describe such events and further investigates one of the following themes syntax semantics mappings lexical semantics and asymmetries in the encoding of placement versus removal events The chapters demonstrate considerable crosslinguistic variation in the encoding of this domain as well as commonalities e g in the semantic distinctions that recur across languages and in the asymmetric treatment of placement versus removal events This volume provides a significant contribution within the emerging field of semantic typology and will be of interest to researchers interested in the language cognition interface including linguists psychologists anthropologists and philosophers

SignGram Blueprint Josep Quer, Carlo Cecchetto, Caterina Donati, Carlo Geraci, Meltem Kelepir, Roland Pfau, Markus Steinbach, 2017-11-20 We

gratefully acknowledge the financial support of COST European Cooperation in Science and Technology funded by the Horizon 2020 Framework Programme of the European Union Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability and it appears scattered in scientific publications where the description is often intertwined with the analysis In general comprehensive grammars are a rarity The SignGram Blueprint is an innovative tool for the grammar writer a full fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way and with the highest scientific standards The work builds on the existing knowledge in Descriptive Linguistics but also on the insights from Theoretical Linguistics It consists of two main parts running in parallel the Checklist with all the grammatical features and phenomena the grammar writer can address and the accompanying Manual with the relevant background information definitions methodological caveats representative examples tests pointers to elicitation materials and bibliographical references The areas covered are Phonology Morphology Lexicon Syntax and Meaning The Manual is endowed with hyperlinks that connect information across the work and with a pop up glossary The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity

Nurturing Language Gerrit J. Dimmendaal, 2022-11-07 This monograph introduces students and scholars in linguistics anthropology and intercultural communication to anthropological linguistics with a special focus on Africa Among the topics addressed are semantic fields such as kinship or colour terminology spatial orientation linguistic relativity and the link between language and cognition onomastics the ethnography of communication interactional sociolinguistics emotions im politeness strategies conversation analysis and non verbal communication Communicative Constructions and the Refiguration of Spaces Gabriela B. Christmann, Hubert Knoblauch, Martina Löw, 2022-02-15 The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Through a variety of empirical studies this volume offers fresh insights into the manner in which different forms of communicative action transform urban space With attention to the methodological questions that arise from the attempt to study such changes empirically it offers new theoretical foundations for understanding the social construction and reconstruction of spaces through communicative action Seeing communicative action as the basic element in the social construction of reality and conceptualizing communication not only in terms of the use of language and texts but as involving any kind of objectification such as technologies bodies and non verbal signs it considers the roles of both direct and mediatized or digitized communication An examination of the conceptualization of the communicative re construction of spaces and the means by which this change might be empirically investigated this book demonstrates the fruitfulness of the notion of refiguration as a means by which to understand the transformation of contemporary societies As such it will appeal to sociologists social theorists and geographers with interests in social construction and urban space **Ecologies of Participation** Zayin Cabot, 2018-04-30 In this daring debut Zayin Cabot challenges the wise homebodies of academia A

profoundly interdisciplinary approach to comparative scholarship Ecologies of Participation offers a methodology whereby we can face our shared planetary predicament It is grounded in process philosophy and asserts the importance of a new ontology of agency It traces the importance of L vy Bruhl and L vi Strauss s early work while offering new insight into the ontological turn in anthropology This book sets out to destabilize modern reductionist trends toward scientific materialism without falling into postmodern cultural constructivism It does not assume the givenness of nature or culture By advancing a multi ontology approach this work offers robust interventions into decolonial and critical studies Cabot takes contemporary scholarship in new and exciting directions offering an unstable ground from which to examine our shared worlds both human and other Throughout the last chapters of the book these threads are illuminated through a detailed ethics of comparison and participation

Spatial Expression in Caac Aurélie Cauchard,2018-07-09 In this study the author describes the linguistic expression of space in Caac an endangered and under documented Oceanic language spoken in New Caledonia from both a descriptive and theoretical perspective Part I provides a concise description of Caac grammar

presenting a first formal portrait of this language to the reader Part II describes the formal and semantic features of the linguistic resources available in Caac to encode spatial relationships Part III presents the theoretical framework based on and exploring further the vector analysis developed by Bohnemeyer 2012 and Bohnemeyer Levinson 1996 2003 Bohnemeyer Levinson not dated with an analysis of deictic expressions within a single framework Special attention moreover is given to the use of Caac absolute and deictic directionals in spatial constructions involving Fictive Motion The analysis of Caac data leads us to introduce an additional category of Fictive Motion beyond those previously recognised in the literature labelled here Anticipated Paths which in turn shed new light on the nature of vectors and the relationship between location motion and orientation

Space, Time and Evaluation in Ideological Discourse Laura Filardo-Llamas, Christopher Hart, Bertie Kaal, 2017-10-02 Bringing together a body of related research which has recently developed in Critical Discourse Analysis this book is the first to address the role of perspective in socio political discourse Specifically the contributions to this volume seek to explore from a cognitive standpoint the way in which perspective functions in three dimensions space time and evaluation to enact ideology and persuasion A range of discourse genres are analysed including political discourse media discourse and songs used as political tools Starting from the contention that discourse processing relies on the same mechanisms that support our understanding and experience of space the book finds a recurrent theme in the way in which perspectival concepts like distance and focus prompted by linguistic signs feature in our discursively constructed knowledge of social and political realities By highlighting the complex nature of perspective taking in ideological discourse the volume sets the agenda for further research in this area The book will appeal to linguists discourse analysts media scholars and political scientists and all who are interested in the relationship between language and cognition in the socio political domain This book was originally published as a special issue of Critical Discourse Studies

Thinking and Speaking in Two Languages Aneta Pavlenko, 2011-01-19 Until recently the history of debates about language and thought has been a history of thinking of language in the singular The purpose of this volume is to reverse this trend and to begin unlocking the mysteries surrounding thinking and speaking in bi and multilingual speakers If languages influence the way we think what happens to those who speak more than one language And if they do not how can we explain the difficulties second language learners experience in mapping new words and structures onto real world referents The contributors to this volume put forth a novel approach to second language learning presenting it as a process that involves conceptual development and restructuring and not simply the mapping of new forms onto pre existing meanings

The Emerging Spatial Mind Jodie M. Plumert, John P. Spencer, 2007-04-12 How does the spatial mind develop In this book Jodie Plumert and John Spencer bring together the leading researchers from the field of spatial cognitive development to examine how the spatial mind emerges from its humble origins in infancy and becomes its mature flexible and skilled adult form The work presented sheds light on how the emerging spatial mind is fostered and shaped over time by our experiences of thinking about and interacting in the space

around us Each chapter presents cutting edge research and theory that addresses the two pivotal questions of what changes in the spatial mind and how these changes come about The authors provide both conceptual and formal theoretical accounts of developmental process at multiple levels of analysis genes neurons behaviors social interactions creating a contemporary overview of the general mechanisms of cognitive change Commentary chapters show how the developmental advances discussed in these accounts fit into our understanding of not only spatial cognitive development but also spatial cognition more generally

Twenty-First Century Psycholinguistics Anne Cutler,2017-09-25 Psycholinguistics is an interdisciplinary field and hence relationships are at its heart First and foremost is the relationship between its two parent disciplines psychology and linguistics a relationship which has changed and advanced over the half century of the field s independent existence At the beginning of the 21st Century psycholinguistics forms part of the rapidly developing enterprise known as cognitive neuroscience in which the relationship between biology and behavior plays a central role Psycholinguistics is about language in communication so that the relationship between language production and comprehension has always been important and as psycholinguistics is an experimental discipline it is likewise essential to find the right relationship between model and experiment This book focuses in turn on each of these four cornerstone relationships Psychology and Linguistics Biology and Behavior Production and Comprehension and Model and Experiment The authors are from different disciplinary backgrounds but share a commitment to clarify the ways that their research illuminates the essential nature of the psycholinguistic enterprise

The Top Books of the Year Space In Language And Cognition Explorations In Cognitive Diversity The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have enthralled audiences this year. Space In Language And Cognition Explorations In Cognitive Diversity : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Space In Language And Cognition Explorations In Cognitive Diversity : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
