Space On Earth Architecture People And Buildings:

Space on Earth Charles Knevitt,1985-01-01 *Space on Earth* Charles Knevitt,1985 In this book the author takes a fresh look at some of the successes and failures of architecture over the last hundred years He suggests that for a while architects lost touch with the society they intended to serve often with disastrous results He assesses the work of many architects who influenced the development of architecture in the 20th century and who may guide it into the next City planning conservation the failures of mass housing and the hope offered by community architecture are all discussed

Community Architecture (Routledge Revivals) Nick Wates,Charles Knevitt,2013-09-05 First published in 1987 this title was one of the first to explore the emerging popular movement of Community Architecture championed by Prince Charles which gained momentum throughout Britain in the 1970s and 1980s The conceptual framework rests fundamentally on the principle that the built environment is most effective when those who live in a particular area are actively engaged with its creation and daily administration A work that has influenced policy makers and planning legislation Community Architecture remains one of the key reference works for student architects and planners

Architecture and the Urban Environment Derek Thomas,2007-06-01 This well illustrated text forms a critical appraisal of the place and direction of architecture and urban design in a new world order at the start of the 21st century The book defines architectural and environmental goals for the New Age by analysing recent contemporary work for its responsiveness to important social and environmental issues and comparing it to successful precedents in architecture It argues that this new sustainable approach to architecture should be recognised as a new development of mainstream architectural history This practical guide illustrates current social and natural resource issues to aid architects in their approach to future design Environmental economics is presented as a potential bridge over the divide between the expectations of the business sector and the concerns of environmental lobbies Through examples and case studies an accessible analysis of carefully researched data drawn from primary sources over four continents allows the author to outline the current urgency for architects and urban designers to respond with real commitment to current and future changing contexts This book expresses a holistic vision and proposes a value system in response to the diagnosis It includes sound architectural and environmental ethics end user involvement in the design process and technological advances aimed at sustainable resource use Includes international case studies from Europe North America the Developing world including South Africa South America and Central Asia

Making Space Andrew MacLaran,2014-04-04 Making Space studies the built environment by examining the private sector forces responsible for its development and the urban planning systems put in place to influence guide and manipulate its outcomes The first part provides a theoretical context for understanding the functions of the property development sector and the state s interventions through the medium of urban planning It analyses the relationship between planning and development and focuses on the increasingly widespread adoption of more pro active entrepreneurial planning agendas as a response to a

growing disenchantment with traditional regulatory approaches The second part comprises case studies drawn from Australia New Zealand the USA the United Kingdom and Ireland which investigate the ways in which urban planning in different socio political contexts has influenced the outcomes of the property development process as well as the manner in which such planning systems have changed in order to enhance their influence Advances in Environment, Behavior, and Design Erwin H. Zube, Gary T. Moore, 2013-03-08 This third volume in *Advances in Environment Behavior and Design* follows the conceptual framework adopted in the previous two volumes see the Preface to Volume 1 1987 It is organized into five sections advances in theory advances in place user group and sociobehavioral research and advances in research utilization The authors of this volume represent a wide spectrum of the multi disciplinary environment behavior and design field including architecture environmental psychology facility management geography human factors sociology and urban design The volume offers international perspectives from North America Carole Despres from Canada several authors from the U S Europe Martin Krampen from Germany Martin Symes from England and New Zealand David Kernohan More so than any of the previous volumes they are drawn from both academia and professional practice While there continues to be a continuity in format in the series we are actively exploring new directions that are on the cutting edges of the field and bode well for a more integrated future This volume will further develop the themes of design and professional practice to complement the earlier emphases on theory research and methods *Chinese Earth-Sheltered Dwellings* Gideon Golany, 1992-01-01

Monumental Earthen Architecture in Early Societies: Technology and power display Annick Daneels, 2016-02-08 Proceedings from a session held as part of the XVII World UISPP Congress Burgos 2014 The theme of the symposium was the archaeology of earthen architecture in pre and protohistoric cultures with an emphasis on constructive techniques and systems and diachronic changes in those aspects **Geo-Space Urban Design** Gideon S. Golany, Toshio Ojima, 1996-09-03 Visit any large metropolitan area in the world and you will feel the urgent need for innovative solutions to the many problems that face the modern urban center *Geo Space Urban Design* offers a revolutionary proposal that will lead future urban growth quite literally in a different direction down Gideon Golany and Toshio Ojima clearly demonstrate that subsurface urban expansion is not only practical and feasible but also that it can reverse many of the negative effects normally associated with urban expansion They present a comprehensive and systematic plan for developing underground spaces for transportation delivery systems infrastructure residences shopping and commercial spaces and social and cultural activities The authors focus on integrating geo space with existing above ground structures and offer well illustrated examples of specific design theories and methods They also anticipate a variety of contingent issues such as land ownership legal rights and psychological adjustment to underground living and working Three case studies of Japanese projects that use underground space for shopping transportation and infrastructure explore the entire spectrum of issues surrounding the design construction and ongoing operation of the facility including form function and efficiency health safety and comfort legal issues and

special management and security considerations Geo space projects in Montreal and Paris are also examined Geo Space Urban Design appeals to a broad range of professionals all of whom have important roles to play in the creation and operation of the cities of the future For urban designers architects and civil and architectural engineers this book offers both an eye opening vision and a challenge to create viable space that will revolutionize urban life landscape architects geographers and environmentalists will find opportunities to redefine the relationship between society and the natural world and psychologists social scientists and government officials will discover new levels of human adaptability interaction and cooperation In this revolutionary book two leading figures explain how geo space design and construction will enable urban planners to cope with the most difficult challenges posed by the continued expansion of metropolitan areas including Land preservation conserving precious agricultural land in the face of rapid urban expansion High urban land prices making economical use of limited space in urban centers with soaring property values Efficient urban scale shrinking overextended and inefficient utility networks Response to stressful climate reducing energy consumption in regions subject to extremes of hot or cold weather The authors explore every facet of geo space and point out the challenges and opportunities these projects will hold for urban designers architects civil engineers architectural engineers landscape architects geographers environmentalists psychologists social scientists and government officials
