Space Science, 1969 **Critical issues in the history of spaceflight** Steven J. Dick, 2018 *Forging the Future of Space Science* National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Space Studies Board, 2010-03-08 From September 2007 to June 2008 the Space Studies Board conducted an international public seminar series with each monthly talk highlighting a different topic in space and Earth science The principal lectures from the series are compiled in *Forging the Future of Space Science* The topics of these events covered the full spectrum of space and Earth science research from global climate change to the cosmic origins of life to the exploration of the Moon and Mars to the scientific research required to support human spaceflight The prevailing messages throughout the seminar series as demonstrated by the lectures in this book are how much we have accomplished over the past 50 years how profound are our discoveries how much contributions from the space program affect our daily lives and yet how much remains to be done The age of discovery in space and Earth science is just beginning Opportunities abound that will forever alter our destiny Light Elements in the Universe (IAU S268) International Astronomical Union. Symposium, 2010-05-13 IAU Symposium 268 presents an overview of the most recent observational and theoretical research on the formation and evolution of light elements in the Universe H He Li Be B and their isotopes Astrophysicists from a variety of subfields discuss recent developments that will improve our understanding of the light elements and provide important clues to stellar and galactic evolution Big Bang nucleosynthesis and cosmology Striking observational progress has been achieved recently through the advent of next generation ground and space based telescopes such as the cosmic microwave background experiments that allow the accurate determination of the baryon density of the Universe New theoretical breakthroughs in describing stellar interiors and the chemical evolution of complex systems and the remaining challenges in this field are also addressed This critical review is a useful resource for all those interested in the chemical evolution of the Universe
