NASA Historical Data Book: NASA launch systems, space transportation, human spaceflight, and space science, 1989-1998, 1988 Space Safety is No Accident Tommaso Sgobba, Isabelle Rongier, 2015-06-04 Includes the proceedings from the 7th IAASS Conference Space Safety is No Accident held in Friedrichshafen Germany in October 2014 The 7th IAASS Conference Space Safety is No Accident is an invitation to reflect and exchange information on a number of topics in space safety and sustainability of national and international interest The conference is also a forum to promote mutual understanding trust and the widest possible international cooperation in such matters The once exclusive club of nations with autonomous sub orbital and orbital space access capabilities is becoming crowded with fresh and ambitious new entrants New commercial spaceports are starting operations and others are being built In the manned spaceflight arena a commercial market is becoming a tangible reality with suborbital spaceflights and government use of commercial services for cargo and crew transportation to orbit Besides the national ambitions in space the international cooperation both civil and commercial is also gaining momentum In the meantime robotic space exploration will accelerate and with it the need to internationally better regulate the usage of nuclear power sources Space bound systems and aviation traffic will share more and more a crowded airspace while aviation will increasingly rely on space based safety critical services Finally most nations own nowadays space assets mainly satellites of various kinds and purposes which are under the constant threat of collision with other spacecraft and with the ever increasing number of space debris Awareness is increasing internationally as solemnly declared since decades in space treaties that space is a mankind asset and that we all have the duty of caring for it Without proactive and

courageous international initiatives to organize space we risk to negate access and use of space to future generations

The International Space Station Robert C. Dempsey, 2017 Looks at the operations of the International Space Station from the perspective of the Houston flight control team under the leadership of NASA's flight directors who authored the book The book provides insight into the vast amount of time and energy that these teams devote to the development planning and integration of a mission before it is executed The passion and attention to detail of the flight control team members who are always ready to step up when things do not go well is a hallmark of NASA human spaceflight operations With tremendous support from the ISS program office and engineering community the flight control team has made the International Space Station and the programs before it a success

Global Issues Surrounding Outer Space Law and Policy Kim, Doo Hwan, 2021-04-23 The United Nations currently has five effective international space treaties namely the Outer Space Treaty of 1967 Space Rescue Agreement of 1968 Space Liability Convention of 1972 Space Registration Convention of 1975 and Moon Agreement of 1979 However with recent competition and movements to mine and exploit natural resources from such entities as the moon asteroids etc these outdated treaties no longer address current advancements It is imperative that new research is undertaken to urge and progress new space laws and policies that strengthen international cooperation and joint undertakings into the exploitation of natural resources from outer space Global Issues Surrounding Outer Space Law and Policy grants a general understanding for the current issues and methods of solution in the field of outer space law and policy in the global society It suggests a revision of the five international space treaties and presents a new International Space Agency ISA that would use international cooperation and an International Court of Air and Space Law to promote the speed of work and fairness in trials of air and space law cases Additionally solutions for the cooperation of the global community towards joint undertakings and exploitation of natural resources in celestial bodies is explored This book is ideal for lawyers professors government officials space agencies academicians researchers students and anyone looking to understand the complicated problems and methods of solution in international space law and policy
