Space Time And Thought In Kant:

Space, Time, and Thought in Kant A. Melnick,1989-03-31 *Space, Time, and Thought in Kant* A. Melnick,2012-12-06

The Problem of God in Modern Thought Philip Clayton,2000 It is widely believed that modern philosophers have dismissed the idea of God and opted instead for a secular humanism Challenging these stereotypes through a careful study of major philosophical texts written since the Enlightenment Philip Clayton shows how the main thinkers of the modern period have continued to wrestle with the problem of God and to make proposals for understanding the divine Following up on his award winning book *God and Contemporary Science* Clayton here explores the constructive resources that modern thought offers to those struggling with the notion of God as infinite and perfect He finds in the narrative of modern thought about God strong support for panentheism the new theological movement that maintains the transcendence of God while denying the separation of God and the world

Reading Kant's Geography Stuart Elden,Eduardo Mendieta,2011-09-01 For almost forty years German enlightenment philosopher Immanuel Kant gave lectures on geography more than almost any other subject Kant believed that geography and anthropology together provided knowledge of the world an empirical ground for his thought Above all he thought that knowledge of the world was indispensable to the development of an informed cosmopolitan citizenry that would be self ruling While these lectures have received very little attention compared to his work on other subjects they are an indispensable source of material and insight for understanding his work specifically his thinking and contributions to anthropology race theory space and time history the environment and the emergence of a mature public This indispensable volume brings together world renowned scholars of geography philosophy and related disciplines to offer a broad discussion of the importance of Kant s work on this topic for contemporary philosophical and geographical work

Kant's Anatomy of the Intelligent Mind Wayne Waxman,2014 According to

current philosophical lore Kant rejected the notion that philosophy can progress by psychological means and endeavored to restrict it accordingly This book reverses the frame from Kant the anti psychological critic of psychological philosophy to Kant the preeminent psychological critic of non psychological philosophy **Kant's Life and Thought** Ernst Cassirer,1981-01-01 Here is the first Kant biography in English since Paulsen s and Cassirer s only full scale study of Kant s philosophy On a very deep level all of Cassirer s philosophy was based on Kant s and accordingly this book is Cassirer s explicit coming to terms with his own historical origins It sensitively integrates interesting facts about Kant s life with an appreciation and critique of his works Its value is enhanced by Stephen K rner s Introduction which places Cassirer s Kant interpretation in its historical and contemporary context Lewis White Beck The first English translation well done by James Haden of a 60 year old classic intellectual biography Those readers who know Kant only through the first Critique will find their understanding of that work deepened and illuminated by a long explication of the pre critical writings but perhaps the most distinctive contribution is Cassirer s argument that the later Critiques and especially the Critique of Judgment must be understood not as merely applying the principles of the first to other areas but as subsuming the latter into a larger and more comprehensive framework Frederick J Crown The Key Reporter Kant s Life and Thought is that rare achievement a lucid and highly readable account of the life and work of one of the world s profoundest thinkers Now for the first time available in an admirable English translation the book introduces the reader to two of the finest minds in the history of philosophy Ashley Montagu **Thought, Language, and Ontology** Francesco Orilia,W.J. Rapaport,2012-12-06 The late Hector Neri Casta eda the Mahlon Powell Professor of Philosophy at Indiana University and founding editor of No s has deeply influenced current analytic philosophy with diverse contributions including guise theory the theory on indicators and quasi indicators and the proposition practition theory This volume collects 15 papers for the most part previously unpublished in ontology philosophy of language cognitive science and related areas by ex students of Professor Casta eda most of whom are now well known researchers or even distinguished scholars The authors share the conviction that Casta eda s work must continue to be explored and that his philosophical methodology must continue to be applied in an effort to further illuminate all the issues that he so deeply investigated The topics covered by the contributions include intensional contexts possible worlds quasi indicators guise theory property theory Russell s substitutional theory of propositions event theory the adverbial theory of mental attitudes existentialist ontology and Plato s Leibniz s Kant s and Peirce s ontologies An introduction by the editors relates all these themes to Casta eda s philosophical interests and methodology **Themes in Kant's Metaphysics and Ethics** Arthur Melnick,2004-05 Intended for those interested in Kant s contribution to philosophy this volume provides an overview of Kant s arguments concerning central issues in metaphysics and ethics **Kant's Model of the Mind** Wayne Waxman,1991 This book argues that Kant s transcendental idealism has been misinterpreted it denies not simply the super sensory reality of space time and appearances but their reality outside imagination as well After adducing extensive and

explicit textual evidence in its favor Waxman shows this interpretation to be essential to the Transcendental Deduction the affirmation of things in themselves and the attempt to surmount Hume's scepticism He further argues that Kant's much neglected claim that besides himself no psychologist has so much as even thought that the imagination might be a necessary constituent of perception should be construed so that even our consciousness of sensation itself visual tactile etc is impossible without imagination A compelling and original contribution to Kantian scholarship Kant's Model of the Mind will also bear close examination by students and scholars of Hume the philosophy of mind and the philosophy of science *The World According to Kant* Anja Jauernig, 2021-02-18 The world according to Kant is made up of two levels of reality the transcendental and the empirical The transcendental level is a mind independent level at which things in themselves exist The empirical level is a fully mind dependent level at which appearances exist which are intentional objects of experience The distinction between appearances and things in themselves lies at the heart of Kant's critical philosophy and has been the focus of fierce debate among scholars for over two hundred years Anja Jauernig offers this interpretation of Kant's critical idealism as an ontological position which comprises transcendental idealism empirical realism and a number of other basic ontological theses as developed in the Critique of Pure Reason and associated texts In this interpretation Kant is a genuine idealist about empirical objects empirical minds and space and time Yet in contrast to other intentional objects appearances genuinely exist which is due to both the special character of experience compared to other kinds of representations such as illusions or dreams and to the grounding of appearances in things themselves This is why Kant can also be considered a genuine realist about empirical objects empirical minds and space and time This book spells out Kant's case for critical idealism thus understood pinpoints the differences between critical idealism and ordinary idealism and clarifies the relation between Kant's conception of things in themselves and the conception of things in themselves by other philosophers in particular Kant's Leibniz Wolffian predecessors **Kant and the Mind** Andrew Brook, 1997-04-13 A comprehensive overview of Kant's discoveries about the mind for non specialists **Kant's Theory of Mind** Karl Ameriks, 2000 This text presents a survey and evaluation of Kant's theory of mind It focuses on Kant's discussion of the Paralogisms in the Critique of Pure Reason and examines how the themes raised there are treated in the rest of Kant's writings **The Revolutionary Kant** Graham Bird, 2013-12-01 The Revolutionary Kant offers a new appreciation of Kant's classic arguing that Kant's reform of philosophy was far more radical than has been previously understood The book examines his proposed revolutionary reform to abandon traditional metaphysics and point philosophy in a new direction and contends that critics have misrepresented conflicts between Kant and his predecessors Kant Bird argues was not a flawed innovator but an advocate of a new philosophical project one that began to be appreciated only in the twentieth century Space, Time, and the Origins of Transcendental Idealism Matthew Rukgaber, 2020-11-21 This book provides an account of the unity of Immanuel Kant's early metaphysics including the moment he invents transcendental idealism Matthew Rukgaber argues that a division

between two worlds the world of matter force and space on the one hand and the world of metaphysical substances with inner states and principles preserved by God on the other is what guides Kant's thought Until 1770 Kant consistently held a conception of space as a force based material product of monads that are only virtually present in nature As Rukgaber explains transcendental idealism emerges as a constructivist metaphysics a view in which space and time are real relations outside of the mind but those relations are metaphysically dependent on the subject The subject creates the simple now and here thus introducing into the intrinsically indeterminate and infinitely divisible continua of nature a metric with transformation rules that make possible all individuation and measurement
