Spacefaring Nation Perspectives On American Space History And Policy:

Critical issues in the history of spaceflight Steven J. Dick,2018 **Critical Issues in the History of Spaceflight** Stephen J. Dick,Steven J. Dick,Roger D. Launius,2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 204 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA s goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experiences Amazon **The Historiography of Contemporary Science and Technology** Thomas Söderquist,2013-01-11 More than ninety percent of all scientific history has been made during the last half century So far however only a fraction of historical scholarship has dealt with this period Merely a decade ago most scientific historians considered recent science the scientific culture created lived and remembered by contemporary scientists an area of study best left to the historical actors themselves Frontiers for the American Century James Spiller,2016-04-29 This book compares the cultural politics of the U S space and Antarctic programs during the Cold War It analyzes how culturally salient terms especially the nationalist motif of the frontier were used to garner public support for these strategic initiatives and more generally United States internationalism during this period **SPACEFARING NATION** Martin Collins,Martin J. Collins,Sylvia Doughty Fries,1991-02-17 Eight essays from a spring 1987 conference at the Smithsonian Institute survey political and technical aspects of the US space program suggesting that it has been shaped by institutional dynamics more than by technological advances No index Acidic paper despite a claim to the contrary Annotation copyrighted by Book News Inc Portland OR Back Down to Earth Mark Damohn,2001 Innovating and challenging A bold new look at the Carter Administration and its impact on NASA and space policy Explains how Carter saved the Space Shuttle A must have for anyone interested in Jimmy Carter NASA and domestic politics of the 1970s *NASA SP-7500* United States. National Aeronautics and Space Administration, *Exploring the Unknown* John M. Logsdon,1995 Eyeing the Red Storm Robert M. Dienesch,2016-04 In 1954 the U S Air Force launched an ambitious program known as WS 117L to develop the world s first reconnaissance satellite The goal was to take photographic images from space and relay them back to Earth via radio Because of technical issues and bureaucratic resistance however WS 117L was seriously behind schedule by the time Sputnik orbited Earth in 1957 and was eventually cancelled The air force began concentrating instead on new programs that eventually launched the first successful U S spy satellites Eyeing the Red Storm examines the birth of space based reconnaissance not from the perspective of CORONA the first photo reconnaissance satellite to fly but rather from that

of the WS 117L Robert M Dienesch s revised assessment places WS 117L within the larger context of Dwight D Eisenhower s presidency focusing on the dynamic between military and civilian leadership Dienesch demonstrates how WS 117L promised Eisenhower not merely military intelligence but also the capacity to manage national security against the Soviet threat As a fiscal conservative Eisenhower believed a strong economy was the key to surviving the Cold War and saw satellite reconnaissance as a means to understand the Soviet military challenge more clearly and thus keep American defense spending under control Although WS 117L never flew it provided the foundation for all subsequent satellites breaking theoretical barriers and helping to overcome major technical hurdles which ensured the success of America s first working reconnaissance satellites and their photographic missions during the Cold War *Management, a Bibliography for NASA Managers* ,1989 *Beyond Horizons* David N. Spires,1997 **Large Space Structures & Systems in the Space Station Era** ,1992 **Management** ,1992 **National Military Establishments and the Advancement of Science and Technology** P. Forman,José M. Sánchez-Ron,2001-11-30 To some philosophers seeking to understand the human condition technology is a necessary guide But to think through the complex human phenomenon of technology we must tackle philosophy of science philosophy of culture moral issues comparative civilizational studies and the economics of specific industrial and military technologies in their historical contexts The philoso pher wants to grasp the technological factor in this troubled world even as we see it is only one factor and that it does not speak openly for itself Put directly our human troubles to a considerable extent have been transformed exaggerated distorted even degraded perhaps transcended by what engi neers and scientists entrepreneurs and politicians have wrought But our problems are ancient problems of dominations struggles survival values in conflict greed and insane sadisms To get some conceptual light on the social reality which seems immediately to be so complicated a philosopher will need to learn from the historians of technology A few years ago the philosopher Elisabeth Straker concluded that a his torical philosophy of technology is required since history and history alone provides all those concepts that form part of the repertoire of the philosoph ical analysis of technology And she added that this goes far beyond the triviality that like other cultural achievements technology has its historical development Now historical comprehension is no substitute for a logical methodology in the analysis of technological problems **The Bird Is on the Wing** James R. Hansen,2004 The airplane ranks as one of history s most ingenious and phenomenal inventions and surely one of the most world shaking How ideas about its aerodynamics first came together and how the science and technology evolved to forge the airplane into the revolutionary machine it became is the epic story James R Hansen tells in The Bird Is on the Wing Just as the airplane is a defining technology of the twentieth century aerodynamics has been the defining element of the airplane Hansen provides an engaging easily understandable introduction to the role of aerodynamics in the design of such historic American aircraft as the DC 3 X 1 and 747 Recognizing the impact individuals have had on the development of the field he conveys not only a history of aircraft technology but also a collective biography of the scientists

engineers and designers who created the airplanes From da Vinci whose understanding of what it took to fly was three centuries too early for practical use to the invention of the airplane by the Wright brothers Hansen explores the technological matrix from which aeronautical engineering emerged He skillfully guides the reader through the development of such critical aerodynamic concepts as streamlining flutter laminar flow airfoils the mythical sound barrier variable sweep wing supersonic cruise blended body and much more Hansen s explanation of how vocabulary and specifications were developed to fill the gap between the perceptions of pilots and the system of engineers will fascinate all those interested in how human beings have used aerodynamics to move among and even beyond birds on the wing **NASA at 40, what Kind of Space Program Does America Need for the 21st Century?** United States.
