questions that bear on the topic of extra terrestrial liberty During the last forty years an increasing number of nations have developed the capability of launching people into space The USA Europe Russia China and soon India have human space exploration programs These developments raise the fundamental question of how are humans to be governed in space This book follows from a previous volume published in this series which looked at the Meaning of Liberty Beyond the Earth and explored what sort of freedoms could exist in space in a very general way This new volume focuses on systems of governance and how they will influence which of these sorts of freedoms will become dominant in extra terrestrial society The book targets a wide readership covers many groups including Space policy makers interested in understanding how societies will develop in space and what the policy implications might be for space organisations Space engineers interested in understanding how social developments in space might influence the way in which infrastructure and space settlements should be designed Space scientists interested in how scientific developments might influence the social structures of settlements beyond the Earth Social scientists political philosophers ethicists etc interested in understanding how societies will develop in the future *The Nexus Beyond: Unbound Horizons of the Digital Frontier* Pasquale De Marco, 2025-04-27

Dissent, Revolution and Liberty Beyond Earth Charles Cockell, 2016-03-10 This volume provides an in depth discussion on the central question how can people express and survive dissent and disagreement in confined habitats in space The discussion is an important one because it could be that the systems of inter dependence required to survive in space are so strong that dissent becomes impossible John Locke originally said that people have a right to use revolution to overthrow a despotic regime But if revolution causes violence and damage that causes depressurisation with the risk of killing many people is it even permissible to have a revolution How then are people to express their liberty or dissatisfaction with their rulers The emergence of structures of dissent and disagreement is an essential part of the construction of a framework of liberty in space revolution is just the extreme example and thus the topic deserves in depth and immediate attention Even today the way in which we assemble organisations and corporations for the government and private exploration of space must take into account the need for mechanisms to allow people to express dissent
