Spaceship Medic Harry Harrison, 1976 Space emergency The hull of this ship has been holed Follow space survival drill We are all dead men says First Engineer Holtz when the spaceship Johannes Kepler is hit by a meteorite But Lieutenant Donald Chase a young doctor on his first flight refuses to give in to despair Soon he is in charge of the damaged ship sailing off course without radio contact and heading for a solar storm Can he get it to Mars safely Back cover **Deathworld** Harry Harrison, 2005 A legendary science fiction story this trilogy brought back into print in one single volume presents hero Jason dinAlt as he discovers three separate planets dinAlt finds excitement and intrigue as he investigates Pyrrus a strange place where all the beasts plants and natural elements are out to destroy man the unknown second planet where every man has to kill other men or live as a slave and Felicity where creatures are bred for thousands of years for a single deadly purpose

Medical Benefits from Space Research United States. National Aeronautics and Space Administration, 1968 **Marginal Space Learning for Medical Image Analysis** Yefeng Zheng, Dorin Comaniciu, 2014-04-16 Automatic detection and segmentation of anatomical structures in medical images are prerequisites to subsequent image measurements and disease quantification and therefore have multiple clinical applications This book presents an efficient object detection and segmentation framework called Marginal Space Learning which runs at a sub second speed on a current desktop computer faster than the state of the art Trained with a sufficient number of data sets Marginal Space Learning is also robust under imaging artifacts noise and anatomical variations The book showcases 35 clinical applications of Marginal Space Learning and its extensions to detecting and segmenting various anatomical structures such as the heart liver lymph nodes and prostate in major medical imaging modalities CT MRI X Ray and Ultrasound demonstrating its efficiency and robustness

Medical and biological research in space United States. Congress. Senate. Committee on Aeronautical and Space Sciences. Subcommittee on Aerospace Technology and National Needs, 1976 Computer Utilization of Time-line Medical Data from Man in Space Flight Jefferson F. Lindsey, 1965 The NASA medical data program is designed to contribute to 1 the safety of the astronauts while in flight 2 the development of scientific products and 3 the standardization of in flight and ground based medical data so that they are in a standard and mutually interchangeable form for computer input and analysis A time line approach has been developed for accomplishing these purposes It involves preparing medical data both on magnetic tape and on consecutive data sheets for appropriate portions of all NASA manned space flights Each data sheet shows the physician all relevant information of interest for a specified time interval a 10 second interval during stressful periods such as exit and reentry and a one minute interval during weightlessness Data on each successive data sheet includes analog and digital indicators of astronaut beat to beat heart rate pulmonary ventilation and various spacecraft environmental as well as astronaut performance measures Identical types of data pertaining to each astronaut have been recorded for comparable time periods for each of the six manned Mercury space flights and the Gemini flights to date e g the

periods of exit and reentry and periods when identical functions were being performed Selected ground based medical data also have been prepared in this manner An ultimate goal is to develop a standardized method to record and store on magnetic tape all useful medical data on a world wide basis for immediate retrieval in connection with the solution of medical problems to benefit mankind NASA has already taken the first step in this direction The NASA approach for space medicine data has been presented in this paper It can serve as a building block and is open for review criticism revision combination with other approaches or redirection These are some of the steps by which progress can be made toward the ultimate goal
