Spacing Of Planets Solution Of 400 Year:

The Spacing of Planets Alexander Alan Scarborough, 2000-11 In this revolutionary work Scarborough takes us from the Copernican idea of our sun centered Solar System to the recent discoveries of giant exoplanets as he seeks to do no less than rebuild the foundations of knowledge of the origins and evolution of planets A retired researcher he offers new answers to questions that have puzzled philosophers for centuries How did Planet Earth come into being How and why did the planetary orbits of our Solar System form in a mathematical pattern The answers will cause scientists to rethink beliefs about the origins and evolution of planets Scarborough addresses these profound questions with powerful substantive evidence that voids the need for speculative uncertainties now common in current theories of planet formation The book opens with an insightful and startling account of his solution to the new Fourth Law of Planetary Motion explaining how the nebulous planetary masses attained their orbital spacing around the sun With Kepler s Three Laws of Planetary Motion the Four Laws reveal the explosive dynamic origin of our Solar System some five billion years ago and thus challenging the modified Laplace accretion concept of planet formation The author then gives definitive insights into how and why each planet evolves through five common stages of evolution in full accord with size Origins of Universal Systems Alexander Alan Scarborough, 2008-09-19 When the right answers are found they will be simple and beautiful Einstein Paraphrasing Thomas Kuhn in his Structure of Scientific Revolutions there can be no change in direction of scientific thought unless there is a viable alternative Now after 35 years of persistent research the author s plethora of substantiated evidence offers science a valid alternative to the Big Bang the LB FLIN BEC model of universal origins one that fulfills Einstein s prediction and meets Kuhn s criteria In fulfilling both predictions the new model reveals a plethora of impossibilities comprising the Big Bang myth while forming powerful arguments for relegating the Big Bang to the ashes of history The revolutionary model a macroscopic theory of everything is ideal for a microscopic Theory of Everything Thomas Huxley stated it best The microcosm repeats the macrocosm a connection placing science in a favorable position for attaining the long sought Theory of Everything As long as the Big Bang Accretion hypotheses remain in vogue comprehending universal origins and functions will remain impossible In sharp contrast the new model alternative opens floodgates to definitive evidence of universal origins and functions Why in the Big Bang perspective substantiated solutions to universal anomalies will always remain unattainable while in the LB FLIN BEC perspective substantiated solutions to universal anomalies are readily attainable Three simple and beautiful examples out of many The dynamic fiery geometrical spacing of planets in elliptical orbits Why Pluto was originally the tenth planet in our Solar System and now is the ninth planet Why extra solar systems are weirdly different from our geometrically spaced Solar System *Answer Book* National Geographic Society (U.S.), 2009 Covers everything from earth sciences to astronomy from climate and habitats to human arts and cultures from ancient history to cutting edge technology and descriptions flags and statistics of all the countries in the world **Simple Solutions for**
