Presents a revolutionary new theory that bridges the divide between science and spirituality Discloses the ramifications of non localized consciousness and how the physical world and spiritual experience are two aspects of the same reality Includes contributions from Jane Goodall Ed Mitchell Stanislav Grof Ralph Abraham and Christian de Quincy among others What scientists are now finding at the outermost frontiers of every field is overturning all the basic premises concerning the nature of matter and reality The universe is not a world of separate things and events but is a cosmos that is connected coherent and bears a profound resemblance to the visions held in the earliest spiritual traditions in which the physical world and spiritual experience were both aspects of the same reality and man and the universe were one The findings that justify this new vision of the underlying logic of the universe come from almost all of the empirical sciences physics cosmology the life sciences and

consciousness research They explain how interactions lead to interconnections that produce instantaneous and multifaceted coherence what happens to one part also happens to the other parts and hence to the system as a whole The sense of sacred oneness experienced by our ancestors that was displaced by the unyielding material presumptions of modern science can be restored and humanity can once again feel at home in the universe

*Tantric Wisdom for Today's World* Peter Wilberg, 2007 The Tantric Tradition known as Kashmir Shaivism bore within it the understanding that God is not a being with awareness Instead God is awareness pure and unbounded This pure awareness is like a stainless mirror invisible in itself in which all experienced realities are not only reflected but actively and continuously manifested The New Yoga of Awareness is not merely a commentary on or an explanation of this tradition but the most comprehensive and original contribution to it since its synthesis by the great 10th century teacher and tantric adept Abhinavagupta It unites religion science philosophy and theology psychology and metaphysics in a way that truly makes it not just a new yoga but THE New Yoga an entirely new school of tantra evolved from and for today's world Tantra does not separate religion and science It is yogic religious science The aim of The New Yoga is to make this new and highly practical religious science known to the world in order that it can begin to work for it It does so by challenging the foundations of both Western science and the Abrahamic religions Judaism Christianity and Islam along with the monotheism of money Marx and the godless science that is its religion Peter Wilberg's wide ranging writings on tantra introduced in this book constitute a new and highly practical body of theosophical and religious scientific knowledge of the sort that alone can help bring an end to today's rising ocean of religious and scientific ignorance and to the ecological devastation economic inequalities and global mayhem that go with it Above all they offer a way of accomplishing this world transforming aim not through jihad violence or war but through learning to experience that pure and Divine Awareness Shiva which pervades all things and the Divine Power Shakti of Awareness that manifests them all Kashmir Shaivism Jagadish Chandra Chatterji, 1986-01-01 On the Advaita Shaiva philosophy of Kashmir called the Trika system **Hinduism** Panikkar, Raimon, 2017-06-15 *Kashmir*

*Shaivism* J. C. Chatterji, 1986-10-31 J C Chatterji's book is a brief introduction to the nature of ultimate reality and the manifestation of the universe according to the Trika System. It also covers briefly the history of this advaita Shaiva philosophy of Kashmir. First published in 1914 as the first book in The Kashmir Series of Texts and Studies, it is still the clearest introduction to the Tattvas of the Trika. Since the lower twenty-five of the thirty-six Trika Tattvas represent the entire universe from the Samkhya point of view, here also is a very clear exposition of the Samkhya Tattvas. The only difference is that while the Purusha and the Prakriti are the final realities for Samkhya, they are but derivatives according to the Trika, which carrying the analysis further recognizes eleven additional Tattvas above the Purusha.

**Selected Writings on the Awareness Principle** Peter Wilberg, 2007 If people get lost in thought or in their emotions in their work or chores or in any element of their everyday activity and experience, then they may be conscious but they are not aware. Awareness of the different elements of our conscious action and experience frees us from restricting attachments to them from a confining identification of ourselves with anything we think, feel, or do. This Awareness Principle is both a liberatory life principle and a life practice of a sort long recognised in yogic philosophy. As well as being a healing and freeing life principle and practice, the Awareness Principle is also a new foundational principle for the sciences and religion, offering the sole possible philosophical basis for both a new Theology and a truly scientific Theory of Everything. For the most fundamental scientific fact is not the objective existence of a manifest universe of bodies in space and time, but awareness of that universe. In contrast to all current pseudo-scientific attempts to explain awareness or consciousness, however, the Awareness Principle is the recognition that awareness cannot in principle be explained by or reduced to any thing whatsoever that we are aware of, whether it be matter, energy, or the human body and brain. Awareness is neither a by-product of our bodies and brains, nor the private property of any being or beings, human or divine. What we call God is neither Being with a big B, nor some Supreme Being with awareness. Instead, God is awareness and the entire universe its manifestation. And just as there can be nothing outside space or before time, so there can be nothing outside or before the absolute and divine Awareness that is God. Neither the Big Bang of physics, the Big Being of philosophy, nor a Supreme Being of the sort worshipped in the Abrahamic faiths, all expressions of The Being Principle, can explain the fundamental nature of God and the Universe. The Awareness Principle can, based as it is on the recognition that The being of all things that exist in awareness in turn depends on awareness.

Abhinavagupta Peter Wilberg's writings on The Awareness Principle, collected for the first time in this volume, reaffirm and rearticulate in a new and clear-cut way a centuries-old understanding of Indian tantric philosophy, namely that the 1st Principle of the universe is not matter or energy, but the innate potentials and power, Shakti, of pure awareness, Shiva.

The Triadic Heart of Śiva Paul Eduardo Muller-Ortega, 1989-01-01 This book explores one of the most explicit and sophisticated theoretical formulations of tantric yoga. It explains Abhinavagupta's teaching about the nature of ultimate reality, about the methods for experiencing this ultimate reality, and about the nature of the state of realization, a condition of embodied

enlightenment The author uncovers the conceptual matrix surrounding the practices of the Kaula lineage of Kashmir Shaivism The primary textual basis for the book is provided by Abhinavagupta's *Paratrik Laghuvrtti* a short meditation manual that centers on the symbolism of the Heart mantra SAU

**Integral Biomathics** Plamen L. Simeonov, Leslie S. Smith, Andrée C. Ehresmann, 2012-07-13 Perhaps the most distinct question in science throughout the ages has been the one of perceivable reality treated both in physics and philosophy Reality is acting upon us and we and life in general are acting upon reality Potentiality found both in quantum reality and in the activity of life plays a key role In quantum reality observation turns potentiality into reality Again life computes possibilities in various ways based on past actions and acts on the basis of these computations This book is about a new approach to biology and physics of course Its subtitle suggests a perpetual movement and interplay between two elusive aspects of modern science reality matter and potentiality mind between physics and biology both captured and triggered by mathematics to understand and explain emergence development and life all the way up to consciousness But what is the real potential difference between living and non living matter How does time in potentiality differ from time in reality What we need to understand these differences is an integrative approach This book contemplates how to encircle life to obtain a formal system equivalent to the ones in physics Integral Biomathics attempts to explore the interplay between reality and potentiality
