**Empires** Susan E. Alcock, 2001-08-09 Empires the largest political systems of the ancient and early modern world powerfully transformed the lives of people within and even beyond their frontiers in ways quite different from other non imperial societies Appearing in all parts of the globe and in many different epochs empires invite comparative analysis yet few attempts have been made to place imperial systems within such a framework This book brings together studies by distinguished scholars from diverse academic traditions including anthropology archaeology history and classics The empires discussed include case studies from Central and South America the Mediterranean Europe the Near East South East Asia and China and range in time from the first millennium BC to the early modern era The book organises these detailed studies into five thematic sections sources approaches and definitions empires in a wider world imperial integration and imperial subjects imperial ideologies and the afterlife of empires      *Sanctuaries of Spanish New Mexico* Marc Treib, 2023-12-22 Among the oldest buildings in the United States the churches of Spanish New Mexico made of earth of stone of wood are the surprisingly fragile reminders of a unique amalgam of Spanish architectural ideas and native American Pueblo culture This book surveys the land and rivers the people and ideas that led to this compelling religious architecture it is also a guide to visiting these churches today In the ninth century the Anasazi progenitors of the Pueblo peoples constructed refined architectural complexes at Mesa Verde and Chaco Canyon Contact with the Spanish in the late 1500s transformed the world of these indigenous peoples changing their agricultural and living patterns as well as religious practices These changes were manifest architecturally in the sanctuaries the Spanish constructed as missions for the Indians or as parish churches for themselves First built roughly between 1600 and 1829 but continuing to be rebuilt into this century they were made of the very materials composing the land itself In Part I Marc Treib addresses the geographical anthropological and architectural aspects of church building in New Mexico and provides background on the church as both an institution and a building type Part II presents thirty churches in depth and discusses such topics as sitting construction in adobe and stone the use of light ornamentation and the issues surrounding restoration *Sanctuaries of Spanish New Mexico* is the only book in print to include all the major church sites still extant Richly illustrated with specially prepared plans of the churches it will be welcomed by architectural historians and anyone with an interest in the American Southwest Among the oldest buildings in the United States the churches of Spanish New Mexico made of earth of stone of wood are the surprisingly fragile reminders of a unique

Coastal Nature, Coastal Culture Paul S. Sutter,Paul M. Pressly,2018-07-15 One of the unique features of the Georgia coast today is its thorough conservation At first glance it seems to be a place where nature reigns But another distinctive feature of the coast is its deep and diverse human history Indeed few places that seem so natural hide so much human history In Coastal Nature Coastal Culture editors Paul S Sutter and Paul M Pressly have brought together work from leading historians as well as environmental writers and activists that explores how nature and culture have coexisted and interacted across five millennia of human history along the Georgia coast as well as how those interactions have shaped the coast as we know it today The essays in this volume examine how successive communities of Native Americans Spanish missionaries British imperialists and settlers planters enslaved Africans lumbermen pulp and paper industrialists vacationing northerners Gullah Geechee nature writers environmental activists and many others developed distinctive relationships with the environment and produced well defined coastal landscapes Together these histories suggest that contemporary efforts to preserve and protect the Georgia coast must be as respectful of the rich and multifaceted history of the coast as they are of natural landscapes many of them restored that now define so much of the region Contributors William Boyd S Max Edelson Edda L Fields Black Christopher J Manganiello Tiya Miles Janisse Ray Mart A Stewart Drew A Swanson David Hurst Thomas and Albert G Way

**Columbus's Outpost Among the Taínos** Kathleen A. Deagan,José María Cruxent,2008-10-01 In 1493 Christopher Columbus led a fleet of 17 ships and more than 1200 men to found a royal trading colony in America Columbus had high hopes for his settlement which he named La Isabela after the queen of Spain but just five years later it was in ruins It remains important however as the first site of European settlement in America and the first place of sustained interaction between Europeans and the indigenous Tainos Kathleen Deagan and Jose Maria Cruxent tell the story of this historic enterprise Drawing on their ten year archaeological investigation of the site of La Isabela along with research into Columbus era documents they contrast Spanish expectations of America with the actual events and living conditions at America's first

European town Deagan and Cruxent argue that La Isabela failed not because Columbus was a poor planner but because his vision of America was grounded in European experience and could not be sustained in the face of the realities of American life Explaining that the original Spanish economic and social frameworks for colonization had to be altered in America in response to the American landscape and the non elite Spanish and Taino people who occupied it they shed light on larger questions of American colonialism and the development of Euro American cultural identity *Material Culture in America* Helen Sheumaker, Shirley Wajda, 2007-11-07 The first encyclopedia to look at the study of material culture objects images spaces technology production and consumption and what it reveals about historical and contemporary life in the United States Reaching back 400 years *Material Life in America An Encyclopedia* is the first reference showing what the study of material culture reveals about American society revelations not accessible through traditional sources and methods In nearly 200 entries the encyclopedia traces the history of artifacts concepts and ideas industries peoples and cultures cultural productions historical forces periods and styles religious and secular rituals and traditions and much more Everyone from researchers and curators to students and general readers will find example after example of how the objects and environments created or altered by humans reveal as much about American life as diaries documents and texts **Acequia Culture** José A. Rivera, 2005-01-21 Conflicts between Hispanic farmers and developers made for compelling reading in *The Milagro Beanfield War* the famous novel of life in a northern New Mexico village in which tradition triumphs over modernity But as cities grow and industries expand are acequias or community irrigation ditches a wise and efficient use of water in the arid Southwest Jos Rivera presents the contemporary case for the value of acequias and the communities they nurture in the river valleys of southern Colorado and New Mexico Recognizing that water is the lifeblood of the community Rivera delineates an acequia culture based on a reciprocal relationship between irrigation and community The acequia experience grows out of a conservation ethic and a tradition of sharing that should be recognized and preserved in an age of increasing competition for scarce water resources A worthwhile contribution to the future management of water resources Professor Michael C Meyer [New Orleans Cabildo](#) Gilbert C. Din, John E. Harkins, 1996-07-01 The Cabildo New Orleans unique Spanish city government touched the life of every citizen of the city during its thirty four years of existence and its decisions often had an impact on the administration of Louisiana far beyond the confines of New Orleans itself Moreover its archival records with lavish and detailed information about every aspect of life within Spanish New Orleans are the richest of any city in the Spanish Borderlands Yet curiously until now there has been no thorough analysis of this influential institution In *The New Orleans Cabildo* Gilbert C Din and John E Harkins have filled that scholarly gap and made a significant contribution to our understanding of the Spanish hegemony in Louisiana New Orleans which had been a small isolated and insignificant town under the French grew to be a thriving center of trade communications and economic activity under Spanish rule Din and Harkins examine the offices and personnel of the Cabildo and explore its vast responsibilities in the areas of justice

medicine and health public works land grants and building regulations ceremonial and liaison duties regulation of markets and food prices and treatment of slaves and free blacks among others They also review the difficulties encountered by the Cabildo and the ways it responded to the city s and the colony s economic legal social and military problems Through careful and thoughtful utilization of documents from archives in Louisiana and Spain particularly minutes from the Cabildo meetings Din and Harkins have produced in *The New Orleans Cabildo* a model history of a complex and all encompassing institution

[The Mexican Border Cities](#) Daniel D. Arreola, 1994-02-01 From Matamoros to Tijuana Mexican border cities have long evoked for their neighbors to the north images of cheap tourist playgrounds and more recently industrial satellites of American industry These sensationalized and simplified perceptions fail to convey the complexity and diversity of urban form and function and of cultural personality that characterize these places *The Mexican Border Cities* draws on extensive field research to examine eighteen settlements along the 2 000 mile border ranging from towns of less than 10 000 people to dynamic metropolises of nearly a million The authors chronicle the cities growth and compare their urban structure analyzing them in terms of tourist districts commercial landscapes residential areas and industrial and transportation quarters Arreola and Curtis contend that despite their proximity to the United States the border cities are fundamentally Mexican places as distinguished by their cultural landscapes including town plan land use pattern and building fabric Their study richly illustrated with over 75 maps and photographs offers a provocative and insightful interpretation of the geographic anatomy and personality of these fascinating and rapidly changing communities
