Regulation of Network Utilities Claude Henry,Michel Matheu,Alain Jeunemaître,2001 Propelled by deep technical economic and cultural changes network utilities have in the last twenty years entered a new era Since competition has been widely introduced and promoted we have experienced a radical change in the structure of the industries and the role of the state authorities Their role in managing monopolies has evolved into regulating new forms of markets which has resulted in the creation of independent regulatory authorities These new public bodies work with governments to try and reconcile the needs of competition and public service missions This suggests the use of recent developments in economic theory to handle complex problems This volume offers an exploration by scholars and regulators of the new regulatory regimes across Europe The first part presents the pioneering experiences of the United Kingdom and Sweden The United Kingdom has quickly chosen to establish powerful and independent individual regulators Reforms in Sweden have been more gradual and regulators have in the first instance acted mainly as mediators Part two is devoted to second wave developments that took place in various European countries i e France Germany Italy and Spain countries where the legal tradition is less conducive to the concept of independent regulators There the regulators are often but not always less powerful and meet more obstacles in their efforts to prevent either the formation of oligopolies or the resistance of incumbent monopolies In Germany another problem has emerged as the federal tradition prevents the creation of independent regulators in certain key sectors The contributions in the third part of the volume throw some light on the problems of coordinating national regulations One can observe the continuous emergence of modes of cooperation between national regulators as well as European authorities Faced with certain categories of problem the European authorities are themselves led to act as common regulators The countries of central and eastern Europe which are progressively converging towards the general economic model of the West are more and more concerned with the accompanying regulation problems Last but not least the Internet raises worldwide problems of regulation that are beginning to be seriously considered **Spanish Fiction in the Digital Age** C.
