biography of the South Carolina writer and winner of the Pulitzer Prize follows her pioneering work as a chronicler of the collapse of Southern plantation life and its effect on African Americans UP *Darlington County* Mary Anne Hamblen, 2008 To lure settlers into the wild backcountry of Darlington the British colonial government offered two large tracts of land to a group of Welsh Baptists from Delaware in 1736 The land of dense pine forests still bearing the footprints of the Cheraw tribe of Native Americans welcomed the Welshmen and they located on a bend in the Pee Dee River that came to be known as Welsh Neck Eventually German Swedish Scotch Irish English and French Huguenot settlers came too creating more communities and towns and a few entrepreneurs made their fortunes on the fertile land along the river s banks The railroads came in the 1850s and industry joined agriculture as a way of life In 1950 the new Darlington Raceway celebrated America s love affair with the automobile Today Darlington County presents a mingling of vintage architecture with the contemporary This is Darlington County at once historic and thoroughly modern *Gullies of My People* John Lane, 2023-11 While scouting sites for geology field trips poet and naturalist John Lane encountered deep gullies created between the Civil War and the 1930s contributed to by his mother s tenant farming family and their rural neighbors in Piedmont South Carolina This brush with the poor farming practices of the past leads Lane into an exploration of his own family s complicated history and of the larger environmental forces that have shaped the region where he chooses to live With his sister as guide Lane descends into the gully of his own childhood to uncover memories of a loving but alcoholic mother and a suicidal father Back and forth the narrative progresses from depictions of the land particularly the overgrown and neglected places that hold stories and mysteries of the region to Lane s ever deepening search He wonders how he a college professor and husband settled into middle class life has emerged from the chaos of his family s past Along the way we meet heroic Depression era geologists fascinating colleagues and troubled ancestors Lane s extraordinary ability to weave personal history together with explorations of the natural world will remind readers of the works of Loren Eiseley and Terry Tempest Williams **Never for Want of Powder** C. L. Bragg, 2007 Lavishly illustrated with seventy four color plates and fifty black and white photographs and drawings *Never for Want of Powder* tells the story of a world class munitions factory constructed by the Confederacy in 1861 the only large scale permanent building project undertaken by a government often characterized as lacking modern industrial values In this comprehensive examination of the powder works five scholars a historian physicist curator architectural historian and biographer bring their combined expertise to the task of chronicling gunpowder production during the Civil War In doing so they make a major contribution to understanding the history of wartime technology and Confederate ingenuity Early in the war President Jefferson Davis realized the Confederacy s need to supply its own gunpowder Accordingly Davis selected Col George Washington Rains to build a gunpowder factory An engineer and West Point graduate Rains relied primarily on a written pamphlet rather than on practical experience in building the powder mill yet he succeeded in designing a model of efficiency and safety He sited the facilities at Augusta Georgia because of the

city's central location, canal transportation, access to water power, railroad facilities, and relative security from attack. As much a story of people as of machinery, *Never for Want of Powder* recounts the ingenuity of the individuals involved with the project. A cadre of talented subordinates including Frederick Wright, C. Shaler Smith, William Pendleton, and Isadore P. Girardey assisted Rains to a degree not previously appreciated by historians. This volume also documents the coordinated outflow of gunpowder and ammunition and Rains's difficulty in preparing for the defense of Augusta. Today, a lone chimney along the Savannah River stands as the only reminder of the munitions facility that once occupied that site. With its detailed reproductions of architectural and mechanical schematics and its expansive vista on the Confederacy, *Never for Want of Powder* restores the Augusta Powder Works to its rightful place in American lore.
