in and making jamming playing out a far more enjoyable experience I love this approach and often teach it to people who don't want to practice 10 hours a day are not interested in theory or knowing the whys and wherefores of everything They just want a straightforward if you learn this and play it here it'll sound good method so that they can express themselves in a jam session solo with more than just a pentatonic scale or play out on the weekends If you have even half an hour a day to play practice guitar you can make a world of progress with your soloing by using this method *Screen Saver Noel McKeehan, 2009-11* Some fairly serious shit has happened in the last sixty years As fate would have it I was fairly close to the central point of a lot of that shit albeit in some cases only briefly shit it seems has a fairly long half life As time has passed I have found it increasingly difficult impossible really to turn off a continued remembrance of the events and places and people that inhabited the story boards of all of that shit They just won't leave me alone So I have written it and them all down One bookend of the story was my involvement in the war effort as we called the Vietnam debacle The other was the near demise of IBM Between those bookends there lurk a wide variety of people experiences and events that always seemed as they occurred to be coherently additive to the total story *Catalog of Copyright Entries* Library of Congress.
