A New Measure of Competition in the Financial Industry Jacob Bikker, Michiel van Leuvensteijn, 2014-08-27 The 2008 credit crisis started with the failure of one large bank Lehman Brothers Since then the focus of both politicians and regulators has been on stabilising the economy and preventing future financial instability At this juncture we are at the last stage of future proofing the financial sector by raising capital requirements and tightening financial regulation Now the policy agenda needs to concentrate on transforming the banking sector into an engine for growth Reviving competition in the banking sector after the state interventions of the past years is a key step in this process This book introduces and explains a relatively new concept in competition measurement the performance conduct structure PCS indicator The key idea behind this measure is that a firm s efficiency is more highly rewarded in terms of market share and profit the stronger competitive pressure is The book begins by explaining the financial market s fundamental obstacles to competition presenting a brief survey of the complex relationship between financial stability and competition The theoretical contributions of Hay and Liu and Boone provide the theoretical underpinning for the PCS indicator while its application to banking and insurance illustrates its empirical qualities Finally this book presents a systematic comparison between the results of this approach and all existing methods as applied to 46 countries over the same sample period This book presents a comprehensive overview of the knowns and unknowns of financial sector competition for commercial and central bankers policy makers supervisors and academics alike

Financial Performance Measures and Value Creation: the State of the Art Daniela Venanzi, 2011-12-01 The choice of financial performance measures is one of the most critical challenges facing organizations The accounting based measures of financial performance have been viewed as inadequate as firms began focusing on shareholder value as the primary long term objective of the organization Hence value based metrics were devised that explicitly incorporate the cost of capital into performance calculations Despite the increasing emphasis on these value based measures no definitive evidence exists of which metric works better than others and on the extent to which any of them is superior to traditional accounting measures In this scenario the objective of this book is contributing to the ongoing dialogue on the appropriateness of different financial performance measures by providing a systematic and updated review of the major value based measures by highlighting their respective strengths and weaknesses and by comparing the main international empirical evidence on their effectiveness
