A History of American Thought 1860-2000 Daniel Wickberg, 2023-09-07 This book is a comprehensive overview of the history of modern American thought and examines a wide range of modern thought and thinkers from 1860, when Charles Darwin's *Origin of Species* was published in the United States, to the end of the twentieth century. The focus of this volume is on the destabilizing effects of modern challenges to notions of fixed order and absolute truths and the contradictory consequences for philosophical, political, social, and aesthetic thought. The intellectual response to the unprecedented changes of this era produced visions of both liberation from the hierarchies of the past and new forms of control and constraint. One of the central contradictions in modern thought was between biological and cultural ideas of social, psychological, and moral order. This is the first work to provide an interpretive vision of the entire period under consideration. Topics covered include evolutionary thought, philosophical Pragmatism, ideas of race and gender, pluralism, and cultural relativism. Cold War Liberalism, science, and religion, feminist thought, evolutionary psychology, and the late twentieth century Culture Wars. Thinkers from William James and Charlotte Perkins Gilman through Judith Butler and Cornel West are analyzed as historical figures. This volume is an ideal resource for a general audience as well as undergraduate and graduate students in the field of American intellectual history.

The Harlem Renaissance in Black and White George Hutchinson, 1995 By restoring interracial dimensions left out of accounts of the Harlem Renaissance or blamed for corrupting it, George Hutchinson transforms our understanding of black and white literary modernism, interracial literary relations, and twentieth-century cultural nationalism in the United States.

Reading Multiple Consciousness Komla M. Avono, 2024-12-15 For over a century the intellectual debate of scholars from African descent has been dominated by the idea of double consciousness spearheaded by W E B DuBois Interestingly with many years of vexatious issues of the encounter between the West and Africa many scholars approached the debate on the basis of the consciousness of the Self and the Other However this idea seems to overlook the multiplicities

of being black white Reading Multiple Consciousness Exploring the Complexity of Postmodern Identity suggests a different approach to the issue by taking more steps beyond double consciousness It enriches the debate over race literature and colonization as it offers another way of reading texts This book proposes that the complexity of postmodern identity is more accurately described by a theory of multiple consciousness This study arises out of the necessity of a more nuanced theoretical framework for a younger generation of researchers on both sides of the Atlantic a conceptual approach that does justice to the complexity of their experience A Companion to British Literature, Volume 2 Robert DeMaria, Jr.,Heesok Chang,Samantha Zacher,2013-12-13
