discusses the question of environmental performance versus corporate practices and finds that environmental considerations can have a positive effect on business *Readers' Guide to Periodical Literature*, 1927 *Gender Intentional Crop Breeding: From Integration To Institutional Innovation* Hale Tufan, Vivian Polar, Jacqueline Ashby, 2025-06-02 Significant progress in agricultural technology development has remained persistently blind to social and gender inequalities Creating agricultural research ecosystems and institutions that address gender inequality requires structural and systemic analysis One of the major areas of investment in agricultural innovation is plant breeding Integrating social welfare objectives in plant breeding is a good starting point to catalyze progress towards gender equality objectives in research for development at a global scale yet devoid of structural change these efforts risk falling short of expectations Intentionally addressing gender in plant breeding research can reshape the technical options goals and intended impact of breeding programs Improving the benefits delivered to rural women through plant breeding can be achieved through new methods and learning critically analyzing systematic barriers to equitable plant breeding research and documenting experiences that demonstrate positive change There is a wide diversity of global experiences where gender research has analyzed how gender differences influence needs preferences and potential benefits from crop varieties and crop specific traits Some of these experiences were able to successfully integrate results and learning from gender research into breeding processes and decisions while some have failed to demonstrate concrete actionable results in breeding programs Climate Change as Class War Matthew T. Huber, 2022-05-10 How to build a movement to confront climate change The climate crisis is not primarily a problem of believing science or individual carbon footprints it is a class problem rooted in who owns controls and profits from material production As such it will take a class struggle to solve In this ground breaking class analysis Matthew T Huber argues that the carbon intensive capitalist class must be confronted for producing climate change Yet the narrow and unpopular roots of climate politics in the professional class is not capable of building a movement up to this challenge For an alternative strategy he proposes climate politics that appeals to the vast majority of society the working class Huber evaluates the Green New Deal as a first attempt to channel working class material and ecological interests and advocates building union power in the very energy system we need to dramatically transform In the end as in classical socialist movements of the early 20th Century winning the climate struggle will need to be internationalist based on a form of planetary working class solidarity
