**The Soviet Union** Michael J. Bradshaw, 1993-11-26 All contributors have first hand current Soviet experience Adopts the approach of the new regional geography Examines the USSR s transformed geographics as well as contemporary problems and their likely future course Considers ways in which current regional geography of the Soviet Union contains the progress of reform and the extent to which the spatial dimensions of reform are changing the character and role of various regions

**After: the Soviet Union: a new regional geography?** Michael J. Bradshaw, 199? **The Geography of Nationalism in Russia and the USSR** Robert J. Kaiser, 2017-03-14 The Geography of Nationalism in Russia and the USSR is an important addition to the small library of essential works on the collapse of the Soviet empire The first attempt to construct and test broad theoretical propositions about place and territoriality in the making of nations it examines the critical social processes underlying the formation of nations and homelands in Russia and the USSR during the nineteenth and twentieth centuries Robert Kaiser finds that for the most part national self consciousness was only beginning to supplant a localist mentality by the time of World War I The national problem faced by Lenin was fundamentally different from the more difficult nationalist challenge that confronted Gorbachev In Kaiser s place based theory the homeland once created in the imaginations of the indigenous masses powerfully structured national processes and international relations Indigenization from below became an active competitor with nationality policies that promoted Russification resulting in the restructuring of ethnic stratification to favor indigenes in their own respective home republics and to challenge Russian dominance outside Russia The revolutionary changes occurring since 1989 Kaiser argues should therefore be seen as part of a longer process of indigenization Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Bradshaw: the Soviet Union** BRADSHAW, 1991-09

**Research and Development Management: From the Soviet Union to Russia** Christoph M. Schneider,2013-11-11 In the past intensive interest in Soviet research and development has been sporadic both in the West and in the USSR The end of the 1980s coincided with the demise of the Soviet model of economic development As a result a surge of attention has been given to the factors driving the motor of Soviet growth and development as well as R D The opening first of the Soviet and subsequently of the Russian economy finally exposed it to global standards to scientific standards The long period of international isolation with respect and technological exchanges made it difficult for scholars and policy makers at home and abroad to measure the status of Soviet advances Consequently some overrated the levels while others underestimated them Now it comes to light that although the Soviets put the first satellite in space Sputnik and developed their own hydrogen bomb these were more the exceptions of innovation from research results rather than the rule Therefore as the management of the entire economy increasingly malfunctioned so did the management of R D in contributing to economic growth and development There is no denying the incredible investment of the former Soviet state in domestic science and research The R D community was one of the largest if not the largest in the world during the second half of the twentieth century Now Russia has inherited not only this enormous resource but also the inadequate organization management and structure      **The Territories of the Russian Federation 2002** ,2002 Presents a distinctive collection of political geographical and economic information on the 89 constituent units of the Russian Federation This survey offers an insight into the often neglected regional dimension of the politics and economy of the Federation It includes Individual territory surveys Geographical historical economic and directory data Some 100 current maps Background to the Federation An essay covering the region as a whole analyzes the relationship between the territories and the Federation A chronology of Russia from the 9th century to the end of 2001 Statistics of major demographic and economic indicators Details of the Government of the Russian Federation Territorial Surveys Each territorial chapter includes A map plus geographical and demographic information Historical details followed by a description of the current political situation An economic survey presenting the latest available statistics A directory of names and addresses of the leading political and administrative officials      Russians As

The New Minority Jeff Chinn, Robert Kaiser, 2019-07-11 Twenty five million Russians live in the newly independent states carved from the territory of the former Soviet Union When they or their ancestors emigrated to these non Russian areas they seldom saw themselves as having moved abroad Now with the dissolution of the USSR these Russians find themselves to be minorities often unwelcome in new states created to fulfill the aspirations of indigenous populations Will the governments of these newly independent states be able to accept the fact that their populations are multi national Will the formerly dominant and privileged Russians be able to live with their new status as equals or more often subordinates To what extent do the new regimes policies of accommodation or exclusion establish lasting patterns for relations between the titular majorities and the minority Russians Developing the concept of interactive nationalism this timely book explores the movement of Russians to the borderlands during the Russian Empire and Soviet times the evolution of nationality policies during the Soviet era and the processes of indigenization during the late Soviet period and under the newfound independence of the republics The authors examine questions of citizenship language policy and political representation in each of the successor states emphasizing the interaction between the indigenous population and the Russians Through the use of case studies the authors explore the tragic ethnic violence that has erupted since the demise of the Soviet Union and weigh strategies for managing national conflict and developing stable democratic institutions that will respect the rights of all ethnic groups Jeff Chinn is associate professor of political science at the University of Missouri Columbia Robert Kaiser is assistant professor of geography at the University of Missouri Columbia
