Janis, Olimpiad S. Ioffe, 2023-08-28 **Law And Economic Development In The Soviet Union** Peter B. Maggs, 2019-03-04 In the past Soviet policymakers planners and jurists in their enthusiasm for economic and technological development devoted little attention to the often negative consequences of modernization New concerns however have become apparent in recent literature statutes and decrees In this book political scientists and experts on Soviet law address many of those concerns analyzing the legal issues associated with economic modernization in the USSR The central themes of the book are the increasingly centralized nature of the policymaking process in the USSR and Eastern Europe and the marked tendency to rely on law as a principal mechanism for managing the undesirable consequences of scientific and technological progress The authors also assess the impact of the scientific technical revolution on Soviet East European relations and East West relations emphasizing the foreign policy consequences of increased financial and technological interdependence The study does not deal with narrow legalistic issues of technical progress rather its focus on policy questions reflects the inclination of Soviet and Eastern European governments to view those questions in terms of law and legislative activity and to see law as an instrument of social engineering **Soviet Law and Soviet Reality** Olimpiad S. Ioffe, 2024-12-02 Encyclopedia of Soviet Law F. J. Ferdinand Joseph Maria Feldbrugge, Gerard Pieter Van den Berg, William Bradford Simons, 1985-04-26 The revised Encyclopedia follows the format of the 1973 edition It is a compilation of nearly 500 short factual articles on Soviet domestic and international law **The Soviet Economic System** Olimpiad S. Ioffe, Peter B Maggs, Olimpiad S Ioffe, 2019-07-11 A comprehensive analysis of the Soviet economy from a legal perspective this book discusses the Soviet theory of legal regulation of economic activity and the formal structure of economic legislation The authors argue that two contradictory tendencies characterize the Soviet economic regulatory system reform and retreat from reform Legal reform efforts usually result from the attempt to increase economic efficiency which typically involves according greater independence to lower level economic organizations The danger that political power might be undermined however eventually leads to the reestablishment of the dominance of the central authorities over lower level decisionmaking Drs Ioffe and Maggs also examine the tensions in labor law which must reconcile the needs of the economy for job mobility and high worker morale with administrative ideals of strict discipline and the legal aspects of technology transfer In addition emphasis is placed on the ways that economic legislation is developed and applied in practice the authors note in particular the progress that has been made in systemization and codification of economic legislation Encyclopedia of Soviet Law

Ferdinand J.M. Feldbrugge,William B. Simons,2024-12-30 Law and Economics of Regulation Klaus Mathis,Avishalom Tor,2021-04-24 This book explores current issues regarding the regulation of various economic sectors theoretically and empirically discussing both neoclassical and behavioural economics approaches to regulation Regulation has become one of the main determinants of modern economies and virtually every sector is subject to general laws and regulations as well as specific rules and standards A traditional argument to justify regulatory interventions is the promotion of public interests Fixing markets that lack competition balancing information asymmetries internalising externalities mitigating systemic risks and protecting consumers from irrational behaviour are frequently invoked to complement the invisible hand of the market with the visible hand of the state However regulations can lead to unintended consequences and serve the interests of powerful private interest groups rather than the public interest and social welfare In addition new insights from behavioural economics question the traditional regulatory approaches most prominently in attitudes towards consumers Furthermore digitalisation and technological innovation in general present new challenges in terms of both the type of regulation and the regulatory process Part I of this book discusses various theoretical approaches to the economic analysis of regulations while Part II looks at specific applications of the law and economics of regulation **Soviet law and economy** Olimpiad S. Ioffe,1987 **Soviet Law and Soviet Society** George C. Guins,2012-12-06 Soviet power rests on two main supports the complete economic dependence of the citizens upon the state and the unlimited political control of the government over the economic social and even cultural life History knows various kinds of despotisms dictatorships and regimentations of economic activity but the U S S R represents a unique kind of dictatorship based on the one party system and integral planning with the specific goal of realization of communism Mankind had never before known such a system Even the best of possible comparisons the analogy with the period of Ptolemies in Egypt is good only in so far as it concerns the regimentation of all kind of economic activity There was in the past no ideology pretending to be adjusted to the needs of the toiling masses no planning system on the same scale and no Communist party apparatus As concerns the modern world the comparative method is necessary for giving the most graphical characterization of the differences between the Western democracies with their ethical traditions rule of law and the principle of the inviolability of individual rights and on the other hand the Soviet monolithic state with its unscrupulous policy extremities of regimentations and drastic penalties The Emancipation of Soviet Law Ferdinand J.M. Feldbrugge,2023-08-28 The political economic and social reforms resulting from Gorbachev's perestroika have become more radical and comprehensive throughout the years Increasingly in their implementation a central role has been accorded to law The construction of a viable democratic system the establishment of

an economy in which market factors are decisive the readmittance of a pluralistic civil society all of them presuppose in the eyes of the present Soviet leadership the creation of a reliable legal foundation Legislative activity in the Soviet Union during the past few years has therefore been hectic At the same time while law was being used as an instrument of change the character of Soviet law itself was deeply affected From being the obedient servant of a totalitarian master law is becoming the core element of a new order in which its supremacy is accepted as the starting point for redesigning all the major sectors of social life In this volume a number of leader Western experts consider the practical effect of this emancipatory process on the most important branches of Soviet law and investigate its philosophical dimensions *Problems of Communism* ,1964
