

# Soviet Men Of Science

**Margaret S Collins, Irving W  
Wainer, Theodore A. Bremner**

## **Soviet Men Of Science:**

*Soviet Men of Science* John Turkevich, 1963      **Soviet Men of Science** John Turkevich, 2012-03-01 Additional Contributing Editors Are A Kramer And S Strayer      Soviet Men of Science. Academicians and Corresponding Members of the Academy of Sciences of the U.S.S.R., Etc John TURKEVICH, 1963      **Tableaux de maîtres anciens et groupe en marbre**, 1860      **American Men of Science**, 1949      *Soviet Men of Science* Ivan Turkevič, 1963      Soviet Men of Science John Turkevich, 1963 Biographical directory of scientists and members of the academy of sciences of the USSR includes engineers chemists physicists biologists physical scientists etc Biographys of scientists in the ussr      **Man and Science** Sven Rasegård, 2002 Rasegard a member of the Society of Living Systems presents a report that promotes the Society s view that systems science should be seen as an overarching discipline for science political science and many other fields Examples from municipal planning and welfare systems are provided The work of Karl Popper is brought in to support the argument Annotation copyrighted by Book News Inc Portland OR      *The Afterlife of the 'Soviet Man'* Gulnaz Sharafutdinova, 2023-01-26 Almost three decades after the collapse of the Soviet Union today more often than ever global media and intellectuals rely on the concept of homo sovieticus to explain Russia s authoritarian ills Homo sovieticus or the Soviet man is understood to be a double thinking suspicious and fearful conformist with no morality an innate obedience to authority and no public demands they have been forged in the fires of the totalitarian conditions in which they find themselves But where did this concept come from What analytical and ideological pillars does it stand on What is at stake in using this term today The Afterlife of the Soviet Man addresses all these questions and even explains why at least in its contemporary usage this concept should be abandoned altogether      *The Art and Science of Making the New Man in Early 20th-Century Russia* Yvonne Howell, Nikolai Kremmentsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions

unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind *Science and Ideology in Soviet Society* George Fischer, 2017-07-28 Set within the context of an era referred to as the age of science as well as the age of ideologies this volume explores how the Soviet Union responded to the impacts and interactions of both science and ideology between 1917 and 1967 Non specialists as well as experts are apt to disagree sharply about or to be ignorant of the mutual relationship But even if the system is defunct the issues remain This book divides its attention among four different fields of science cybernetics economics philosophy and sociology The authors believe that the disciplines discuss revealing trends in Soviet science in general and its interaction with an established though not immutable ideology in particular The authors conducted a pioneering examination of the mutual influence of ideology and science and the problems and opportunities created for government by the new scientific revolution Specifically they hold that in the 1960s Soviet science or at least the disciplines covered here helped sustain the established system and its ideology rather than weaken them This volume is of historical interest and provides insight into how one may explore the ways science and ideology interact Soviet Men of Science, Academicians and Corresponding Membres of the Academy of Sciences of the USSR J.. Blanshei, D.. Lake, 1963 **The Art and Science of Psychological Operations** American Institutes for Research, 1976 *Daily Report, Foreign Radio Broadcasts* United States. Central Intelligence Agency, 1965 Science And The Question Of Human Equality Margaret S Collins, Irving W Wainer, Theodore A. Bremner, 2019-06-21 This book provides an interdisciplinary look at racism and science investigating the biological and social realities of individual and group differences The contributors examine race and racial distinctions environmental versus genetic contributions to IQ and to cognitive skill level the impact of biocultural interactions on behavior and the problems of achieving an objective appraisal of inter and intragroup differences in humans They also consider a possible model for cultural and biological evolution recommending a careful selection of models and methods of approach for sciences concerned with the study of man The book includes recent findings in the area of race and IQ documents instances of racism and classism and analyzes factors underlying these phenomena **The Biographical Dictionary of Women in Science** Marilyn Ogilvie, Joy Harvey, 2003-12-16 Volume 2 of 2 *The Situation in Biological Science* Vsesoiĭ uĭznaiĭa akademiiĭa sel'skokhoziĭa iĭstvennykh nauk imeni V.I. Lenina, 1949 **Science on Screen and Paper** Mariana Ivanova, Juliane Scholz, 2024-08-01 During the Cold War scientific discoveries were adapted and critiqued in many different forms of media across a divided Europe Now more than 30 years since the end of the Cold War *Science on Screen and Paper* explores the intersections between scientific research and media by drawing from media history film studies and the history of science From public relations material to educational and science films from children s magazines to television broadcasts the contributions in this collected volume seek to embrace medial differences and focus on intersectional themes and

strategies for the representation of science
