Soviet Operational Deception The Red Cloak:

Soviet Operational Deception Richard Nolan Armstrong, 1988 The Red Army learned and practice the art of deception at all levels of warfare during World War II By cloaking various force groupings and activities Soviet military leadership particularly in the latter stages of the war created operational level deceptions that surprised German intelligence and commanders Through their empirically structured military science Soviet researchers and doctrine writers have applied deception to the tactical operational and strategic levels of war While operational level deception promotes the achievement of operational surprise its practice provides a number of collateral effects such as masking force ratios delaying enemy decisions and misdirecting the enemy's attention and commitment of forces In 1943-45 Soviet operations were consistently successful and offer historical lessons concerning operational level deception A review of these lessons and a close look at the Red Army's improved capability to produce battlefield illusions during an operation in the summer of 1944 is instructive and may prove useful to current U.S. Army initiatives exploring battlefield deception Keywords Military history Soviet army Military deception tactics

Soviet Operational Deception Richard N. Armstrong, 2004-10-01 The U.S. Army believes that deception is a vital part of military operations Field Manual 100-5 Operations acknowledges that the Soviet Army mastered operational deception in World War II While its success is widely recognized there are few published Western assessments of Soviet operational deception Soviet Operational Deception The Red Cloak by Lieutenant Colonel Richard N. Armstrong examines the role of operational deception in the Red Army's World War II victories This Combat Studies Institute special study focuses on operational level deception planning allocation of resources and deception measures used during battle in the Lvov-Sandomierz operation July 1944 Lieutenant Colonel Armstrong's insightful study demonstrates the clear connection between the wise use of deception and Soviet battlefield success Richard M. Swain Colonel Field Artillery Director Combat Studies Institute

The Operational Implications Of Deception At The Battle Of Kursk Major James E. Elder, 2015-11-06 This monograph analyzes the use of deception by the Germans and Soviets in the battle of Kursk It uses a paradigm consisting of commander's aim intelligence centralized control synchronization and operations security to determine why Soviet deception succeeded and German deception failed The analysis provides insights into the use of operational deception on the modern battlefield The conclusions of this monograph suggest that operational deception is not a separate deception activity that it can be used in the offense or defense that it can be a viable combat multiplier today and that deception is an acquired skill The study monograph shows that operational deception must organize and control the deception efforts at the tactical level and that simple battlefield deception techniques can produce an operational effect The monograph shows the critical role commanders have in establishing an appropriate course of action that sets the stage for deception The selected course of action must provide a picture of duplicity to the enemy commander by presenting two possible objectives This concept of alternative objectives allows the deception activity to flow naturally from the COA and confuse the enemy The monograph

recommends incorporation of deception into the officer corps professional development through professional reading programs in schools and practical application at the National Training Center Combat Maneuver Training Center Joint Readiness Training Center and the Battle Command Training Program It also recommends that the Army develop and field sufficient communications and non communications devices to allow Army Groups to simulate a U S Corps **Military Review**,1990 *Professional Journal of the United States Army*,1990 **Joint Doctrine for Military Deception** United States. Joint Chiefs of Staff,1994 [Stalin's Revenge](#) Anthony Tucker-Jones,2009-07-19 In the summer of 1944 the Red Army crushed Army Group Centre in one of the largest offensives in military history Operation Bagration launched almost exactly three years after the Nazi invasion of the Soviet Union was Stalin s retribution for Hitler s Operation Barbarossa Earlier battles at Stalingrad and Kursk paved the way for Soviet victory but as Anthony Tucker Jones demonstrates in this fascinating study Bagration ensured that the Germans would never regain the strategic initiative In one fell swoop the Wehrmacht lost a quarter of its strength on the Eastern Front And in a series of overwhelming assaults the Red Army recaptured practically all the territory the Soviet Union had lost in 1941 advanced into East Prussia and reached the outskirts of Warsaw As he reconstructs this massive and complex battle Anthony Tucker Jones assesses the opposing forces and their commanders and gives a vivid insight into the planning and decision making at the highest level He recreates the experience of the soldiers on the battlefield by using graphic contemporary accounts and he sets the Bagration offensive in the wider context of the Soviet war effort He also asks why Stalin s road to retribution proved to be such a long and bloody one for the Germans despite their crippling losses managed to resist for another ten months [The Evolution of Operational Art](#) John Andreas Olsen,Martin van Creveld,2011 Broadly defined as the grey area between strategy and tactics operational art spans the theory and practice of planning and conducting campaigns and major operations aimed at accomplishing strategic and operational objectives in a given theatre of operations An intermediate link between strategy and tactics has always existed but a distinct concept that encompasses a systematic and deliberate plan of campaign for major operations is a mere two hundred years old Based on country specific case studies this book describes how the concepts that underpin operational art originated how they received practical expression in various campaigns and how they developed over time The point of departure is the campaigns of the God of War Napoleon Bonaparte The book then proceeds with chapters on the evolution of operational art in Prussia Germany the Soviet Union Russia the United Kingdom United States Israel and China The final chapter deals with the future of operational art in irregular warfare Theory is critical to refining and improving existing methods of applying operational warfare and its importance cannot be overstated however to be useful theory and its accompanying vocabulary must be combined with a proper examination of historical trends and practical experience The present volume attempts to achieve that combination This book is a project of the Oxford Leverhulme Programme on the Changing Character of War [Stalin's Armour, 1941-1945](#) Anthony Tucker-Jones,2021-03-15 With over 60 photos this

look at the role of Red Army tanks in Hitler's defeat will be of interest to modelers and military historians alike AMPS Indianapolis Stalin's purge of army officers in the late 1930s and disputes about tank tactics meant that Soviet armored forces were in disarray when Hitler invaded in 1941 As a result during Operation Barbarossa the Wehrmacht's 3 200 panzers ran circles round the Red Army's tank force of almost 20 000 and thousands of Soviet tanks were disabled or destroyed Yet within two years of this disaster the Red Army's tank arm had regained its confidence and numbers and was in a position to help turn the tide and liberate the Soviet Union This is the remarkable story Anthony Tucker Jones relates in this concise highly illustrated history of the part played by Soviet armor in the war on the Eastern Front Chapters cover each phase of the conflict from Barbarossa through the battles at Moscow Stalingrad and Kursk to the massive tank led offensives that drove the Wehrmacht back to Berlin Technical and design developments are covered but so are changes in tactics and the role of the tanks in the integrated all arms force that crushed German opposition

Panzer East and West

Dieter Stenger,2017-09-01 Organized and trained during 1943 the 10th SS Panzer Division saw its first action in the spring of 1944 during the relief of an encircled German army on the Eastern Front Several months later in response to the Allied invasion at Normandy the division returned to the West in mid June 1944 Here the division engaged in a series of armored attacks and counterattacks against British and American forces The 10th SS briefly held off a few enemy thrusts but gradually had to fall back to Falaise where the division escaped the Allied encirclement with no tanks and only a fraction of its men The 10th SS Panzer Division next defended against the Allied parachute assault during Operation Market Garden in September 1944 Depleted and now a division in name only the 10th SS fought in Alsace before Hitler sent it to the Eastern Front again There east of Berlin the division participated in the final battles to enable the escape of German soldiers and civilians from Soviet captivity
