The Soviet Union and Terrorism Roberta Goren, 2024-04-12 The Soviet Union and Terrorism 1984 examines the extent of Soviet involvement in international terrorism and the aims and objectives of Soviet foreign policy It looks at the evidence of changing Soviet attitudes to terrorism from 1917 to the 1980s evidenced in official and semi official pronouncements and it brings together evidence from the field of terrorist operations which points to a high degree of Soviet involvement The Soviet Union is shown to be playing a dangerous game sponsoring activities which it cannot hope to control and leading to effects which it cannot predict Nevertheless it continues to play because it gains from the political and military disruption to the countries affected by terrorist activities

Strategic Terror Beau Grosscup, 2013-07-18 Presenting a global history of aerial bombardment this book shows how certain European powers initiated aerial bombardment of civilians after World War I and how it was an instrument of choice in World War II Beau Grosscup shows that such methods used initially as a means of terrorizing native populations in Africa and the Middle East have become the primary form of terrorism in more recent decades While such strategic terror is not classed as terrorism in the West this reflects an unwillingness to confront the human costs and immorality of aerial bombardment Grosscup argues that if terrorism is to be diminished the role of aerial bombing in sustaining global violence must be recognized

The Darkest Sides of Politics, II Jeffrey M. Bale, 2017-10-04 This book examines a wide array of phenomena that arguably constitute the most noxious extreme terrifying murderous secretive authoritarian and or anti democratic aspects of national and international politics Scholars should not ignore these dark sides of politics however unpleasant they may be since they influence the world in a multitude of harmful ways The second volume in this two volume collection focuses primarily on assorted religious extremists including apocalyptic millenarian cults Islamists and jihadist terrorist networks as well as CBRN chemical biological radiological and nuclear terrorism and the supposedly new nexus between organized criminal and extremist groups employing terrorist operational techniques A range of global case studies are included most of which focus on the lesser known activities of certain religious extremist milieus This collection should prove to be essential reading for students and researchers interested in understanding seemingly arcane but nonetheless important dimensions of recent historical and contemporary politics

troubling continuities that characterized Soviet military thinking during the early 1990s *The Soviet Bloc And World*

punishment Stephen Sloan,1986 **Action Directe** Michael York Dartnell,1995 This study examines the nature and effects
of terrorism by focusing on the ideology and activities of an extreme left revolutionary faction France s Action directe AD The
author then explains how a violent group could appear in a stable Western society such as France The author argues that the
term terrorism cannot account for varying degrees and intensities of political violence Despite the often cited and allegedly
strong association between terrorism and menace to society and government AD was generally more threatened than were
French society or institutions The motives for its increasingly lethal violence are explained by reference to French political
traditions in which violent protest frequently signifies ideological struggle against political rules AD s goals and
preoccupations had many similarities to previous post 1789 extreme left protest groups The organization based its rationale
for political violence on gauchisme and May 1968 In the late 1970s the ideals of gauchiste radicals from groups such as
Gauche proletarienne lived on in fringe anarchist and Maoist groups A potent ideological cocktail spiked with anarchism and
Maoism was thus transmitted to AD AD itself continued to change as a result of ideology In the 1980s internal disagreements
split the organization into two groups Action directe nationale ADn and Action directe internationale ADi ADn and ADi
subsequently developed separate appeals to their largely mythical political clientele ADn focused on French current affairs
business and politics ADi analysed global conditions and justified its assassinations as part of a struggle against imperialist
projects The case of these twogroups illustrates the importance of ideology in explaining French extreme left political
violence AD reacted to the consolidation of an ideological consensus in France during the 1980s producing an ideology that
both contained traditional political themes and anticipated later mainstream preoccupations AD s fatal obsession was its
pursuit of violent revolution at a time when mass based anti regime protest was absent The group mixed millenarianism
workerism and nihilism in a violent but futile assault on a stable advanced industrial democracy **Soviet Strategic Arms**
Policy Before SALT Christoph Bluth,1992-03-12 In this book Dr Christoph Bluth presents an original analysis of the build up
of Soviet strategic forces from the death of Stalin to the SALT I agreement The author is able to demonstrate how domestic
priorities and internal power struggles account for the seeming inconsistencies of Soviet military and foreign policy

contemporary jihad as a cult of violence and power All jihadi groups whether Shiite or Sunni Arab or not are characterized by a similar bloodlust Murawiec characterizes this belief structure as identical to that of Europe s medieval millenarians and apocalypticism arguing that both jihadis and their European cousins shared in a Gnostic ideology a God given mission endowed the Elect with supernatural powers and placed them above the common law of mankind Although the ideology of jihad is essentially Islamic Murawiec traces the political technologies used by modern jihad to the Bolsheviks Their doctrines of terror as a system of rule were appropriated by radical Islam through multiple lines of communication This book brings history anthropology and theology to bear to understand the mind of jihad that has declared war on the West and the world
