Response to the Gorbachev Era, 1985-1991 Gilbert Rozman, 2014-07-14 Gorbachev's transformation of both Soviet socialism and the Cold War world atmosphere kindled a far reaching debate in Japan. Would Japan at last free itself of its secondary postwar standing? Would a new Soviet system and world order soon be established? Gilbert Rozman argues in *Japan's Response to the Gorbachev Era* that Japanese perceptions of the Soviet Union are distinctive and are helpful for understanding what will become an influential worldview. Focusing on diverse opinion leaders and the relationship between the Japanese media, policy making and public opinion, Rozman shows how long standing negative images of Soviet socialism and militarism have been reconsidered since the mid 1980s. His analysis treats burning issues such as the Northern Territories dispute, the Soviet commitment to reform and the Soviet American relationship. It also sheds light on Japanese views of Soviet history, modernization and national character. Such views reveal some of the building blocks for the emergent Japanese worldview. Turning the Tables Daniel Burstein, 2002-02-15 When the Tokyo stock market collapsed it became clear that the Japanese bubble had burst and the balance of world economic power had shifted. Now global business expert Burstein, bestselling author of *Yen and Euroquake*, explains how America can use Japan's current economic crisis to forge a new and profitable economic alliance. *Japanese-Soviet/Russian Relations since 1945* Kimie Hara, 2003-09-02 An original book that reviews the problems of political rapprochement in terms of foreign policy decision making between Japan and Russia since 1945, including the infamous Northern Territories dispute. Uses four bilateral summits as case studies to explore patterns, changes and tendencies in the decision making process. Concludes that much of the Cold War system of relations between the two states still remains in place at the end of the twentieth century. **Russian Energy and Security up to 2030** Susanne Oxenstierna, Veli-Pekka Tynkkynen, 2014-01-03 The challenges in Russia's energy sector are changing. On the demand side, Europe is seeking to limit its dependence on Russian oil and gas, with the result that China and other Asian countries are likely to eventually become growing export markets for Russian energy. On the supply side, oil and gas fields in West Siberia are diminishing and in future Russia's energy will have to come more from East Siberia and the Arctic, which will necessitate new infrastructure development and the employment of advanced technologies which may increase Russia's dependence on commercial partners from outside Russia. This book explores the challenges facing Russia's energy sector and the resulting security implications. It includes a discussion of how far the Russian state is likely to continue to monopolise the energy sector and how far competition from private and foreign companies might be allowed.
