## **Soviet Union And The Law Of The Sea:**

The Soviet Union and the Law of the Sea William Elliott Butler, 1971 Pre and post revolutionary doctrine and practice relating to the legal regimes of territorial waters internal sea waters closed seas the continental shelf the deep seabed and the high seas The Soviet Union and the Law of the Sea Through UNCLOS I and II Tony Allison, 1983 **International Law in Comparative Perspective** William Elliott Butler, 1980-02 **The Soviet Union and the Law of the Sea** Anthony P. Allison, 1984 **The Law of the Sea and Polar Maritime Delimitation and Jurisdiction** Alex G. Oude Elferink, Donald R. Rothwell, 2021-10-18 The climate and other characteristics of the polar regions have been major factors in shaping the legal regime applicable to the polar oceans In Antarctica states have had to grapple with the question of how to account for developments in the law of the sea while preserving the compromise over sovereignty contained in the Antarctic Treaty The Arctic also has presented challenges for the law of the sea as illustrated by the continued attention given to special rules for polar shipping The 1982 United Nations Convention on the Law of the Sea has led to substantial agreement on the legal regime of ocean spaces The present volume explores the impact the Convention has had on the polar regions in this respect including after its entry into force in 1994 To this end it looks at a number of issue areas in the field of maritime delimitation baselines maritime zones delimitation of maritime zones between neighboring states and jurisdiction environmental protection navigation and fisheries from a bipolar perspective It is strongly suggested that the legal regime of the polar oceans will be further elaborated to more effectively deal with existing activities or to accommodate new activities It is likely that the United Nations Convention on the Law of the Sea will continue to provide the basic legal framework for this exercise and that states will be careful not to unravel the delicate balance contained in it The Soviet Union and the Law of the Sea William Elliott Butler, 1984 Law, Force and Diplomacy at Sea (Routledge Revivals) Ken Booth, 2014-06-27 Law Force and Diplomacy at Sea first published in 1985 is one of the few comprehensive treatments on the subject from a strategic perspective It offers a detailed strategic analysis of the background and outcome of the Third UN Conference on the Law of the Sea and its naval implications The interplay between the interest of the naval powers in freedom of navigation and the interest of coastal states in control provides the setting for the strategic problems The sea is taking on more properties of the land it is becoming territorialised and this is presenting fresh challenges and opportunities to which navies and their national governments have to respond This study is designed for students of naval strategy for international lawyers and for students of international affairs who wish to think about the important security questions in the maritime environment *Soviet Union & Northern Water* Clive Archer, 2021-12-24 First Published in 1988 In 1986 Croom Helm published for the Royal Institute of International Affairs Northern Waters security and resource issues which included a number of contributions from the Northern Waters Study Group of the Scottish Branch of the Royal Institute This Study Group brought together academics businessmen civil servants and serving officers interested in Northern Waters and helped arrange a number of

seminars and international conferences Its members also had contacts with those in Scandinavia and North America who had a professional involvement in Northern Waters Since the establishment of the Study Group in 1979 interest in Northern Waters has flourished in Britain the United States Canada West Germany and the Nordic countries In Autumn 1985 the Centre for Defence Studies University of Aberdeen held an International Colloquium on what have probably been the main inspirations for the attention devoted to Northern Waters increased Soviet activity therein and the response of the Western powers This book reflects some of the issues dealt with at that colloquium and like the 1986 book covers jurisdictional and resource questions as well as those concerned with international security

**Soviet Ocean Activities: a Preliminary Survey, Apr 30, 1975** United States. Congress. Senate. Commerce,1975 [The Soviet Union and Northern Waters](#) Clive Archer,2021-01-26 This book first published in 1988 analyses the interests and activities of the Soviet Union in the northern Atlantic It gives particular attention to the growth in exploration and exploitation of resources and to the problems presented by jurisdictional disputes The responses of NATO the United States and the Nordic countries to the expanded Soviet military presence are examined in detail

**The Sea in Soviet Strategy** Bryan Ranft,Geoffrey Till,1989-06-18 A review of the Soviet Navy by two maritime specialists placing it in its domestic and international context assessing its present and future roles by looking at its ships submarines aircraft its exercises and patterns of deployment and by interpreting the Soviet Navy s own writings

**The Soviet Union and the Law of the Sea** John B. Britton,1980 *Hearings, Reports and Prints of the Senate Committee on Commerce* United States. Congress. Senate. Committee on Commerce,1975 *Navigational Restrictions within the New LOS Context* Alexander M. Lewis,2016-12-12 In 1986 Lewis M Alexander a world renowned marine geographer prepared for the U S Department of Defense a report Navigational Restrictions within the New LOS Context Geographical Implications for the United States Edited by J Ashley Roach the reformatted report is presented in five sections and includes 20 maps illustrating the world s international straits and major ocean navigation routes Forty three tables present the most comprehensive descriptions of the world s straits used for international navigation as well as identify various categories of maritime claims What made the Report extraordinarily valuable in 1986 and which makes it equally valuable today is the compilation of geographic data not available elsewhere describing the world s straits used for international navigation and illustrations of the chokepoints and major international shipping trade routes Roach has faithfully reproduced Alexander s seminal work by retaining the original structure and references A table of defined terms and an index have been added

**Marine Fisheries Abstracts** ,1974 [Freedom of the Seas and US Foreign Policy](#) Connor Donahue,2024-04-05 This book critically analyzes US political military strategy by arguing that freedom of the seas discourse is fundamentally unfit for an era of maritime great power competition The work conducts a genealogical intellectual history of freedom of the seas discourse in US foreign policy to show how the concept has evolved over time to facilitate American control over the global ocean space It concludes that the contemporary discourse works to establish the

high seas as an arena free from claims of sovereignty so that the United States as the presumed unrivaled naval power can intervene globally on behalf of its national interests. However, since sea control strategies depend on a preponderance of material force as the United States wanes in relative material capability, it becomes less able to support political military strategies predicated on the assumption of global naval dominance. The book provides a timely commentary on the current geopolitical competition between the United States and China and critiques the US approach toward China in the maritime domain in order to highlight potential avenues of foreign policy action that may enable the two countries to mitigate the risk of conflict. This book will be of much interest to students of naval history, maritime security, US foreign policy, and international relations. Selected Water Resources Abstracts, 1976 *Excessive Maritime Claims* J. Ashley Roach, 2021-03-01. State practice in the law of the sea has continued to evolve since publication of the 3rd edition of *Excessive Maritime Claims* in 2012. In this 4th edition, J. Ashley Roach has brought the text up to date, particularly as to the provisions relating to the balance of navigational rights and freedoms with the interests of coastal and island States. Of particular interest are the more detailed explanations of the phrase freedom of navigation, the expanded material on baselines and on the practice of archipelagic States, the revisions of the material on the continental shelf, on marine data collection, on submarine cables and pipelines, and on US Ocean Policy. A new chapter has been added on islands and other maritime features. This edition is dedicated to Dr. Robert W. Smith, the premier marine geographer. *The Law of Maritime Boundary Delimitation* Alex G. Oude Elferink, 2021-09-27. This volume presents an analysis of the maritime boundary delimitations of the Russian Federation. The focus of this analysis is the relationship between state practice and the rules of public international law applicable to the delimitation of maritime zones between neighboring states. A first part establishes the contents of the law in this field. The main part of the work concerns an analysis of the position of the Russian Federation on the rules of maritime delimitation law and the practice of this state in relation to the delimitation of specific maritime boundaries with neighboring states. The case study of the Russian Federation illustrates the significance of international law for the delimitation of maritime boundaries while, at the same time, indicating the limits of the influence of the law on state behavior. *Ocean Law Debates* Harry N. Scheiber, Nilufer Oral, Moon-Sang Kwon, 2018-07-17. The UN Convention on the Law of the Sea (UNCLOS), signed in 1982 and going into force in 1994, was the product of intensive international debates from the 1950s onward. UNCLOS continues to be the subject of vital debates on new initiatives that seek to clarify or expand the scope of the ocean regime. In *Ocean Law Debates: The 50 Year Legacy and Emerging Issues for the Years Ahead*, distinguished authors analyze the content of these debates, providing both historical perspectives and keen analyses of present-day issues. Several chapters focus on the contributions to debates over half a century's time by the Law of the Sea Institute, including the controversies involving maritime delimitation, issues of creation of marine fisheries law, and responses to the manifold challenges posed by dramatic advances in science and technology. Complementing these historical perspectives, a section of

five chapters offers critical discussion of today's movement to create a regime to sustain biodiversity in the Area Beyond National Jurisdiction. Finally, the volume offers diverse perspectives on the implementation and judicial interpretation of UNCLOS, international whaling regulation, Arctic regional issues, seabed mining problems, the geopolitics of Marine Protected Areas, declarations, and the role of the IMO in responding to climate change.
