implications for policymakers and for political scientists Arms Races in International Politics addresses two key questions what causes arms races and what is the connection between arms races and the outbreak of wars The Foreign Office's War, 1939-41 Keith Neilson,2022 Provides a forceful corrective to the idea that Britain stood alone until the invasion of the Soviet Union and the attack on Pearl Harbor brought about the Grand Alliance Based on extensive archival research the book demonstrates that 1939 to 1941 was a period of intensive diplomatic activity by the British Foreign Office designed to ensure that Britain's potential enemies especially Soviet Russia Italy and Japan remained neutral and that its most desirable potential ally the United States remained as friendly as possible until it could be persuaded to join in the conflict The book highlights the importance of diplomacy towards neutrals for British policy considers the complexities of the situation tying together issues such as blockade and the disposition of British forces in various theatres explores decision making within the British government examining how the diplomatic considerations of the Foreign Office played into wider debates amongst ministers and senior civil servants and discusses the various courses towards neutrals including alternatives advocated within the Foreign Office Overall the book provides a rich highly nuanced view of British policy in this crucial period

**Britain After the Five Crises** P. W. Preston,2023-11-02 The period 2008-2022 has seen the British state government embroiled in a number of full blown crises each impacting the fundamental operations of the state and demanding therefore urgent responses from the government of the day In the first case the 2008 near collapse and partial nationalization of the banking system consequent upon decades of irresponsible credit creation coupled to permissive regulation in the second the migration crisis of 2015 which saw waves of refugees moving through Europe provoking anxious responses from European Union member states and opening up related political debates in Britain thus third the 2016 referendum in regard to membership of the European Union which the London based elite clearly thought they would navigate easily before to their evident shock losing an event itself precipitating further extraordinary Westminster manoeuvring and then fourth the 2020 Covid 19 pandemic met with an initial casual sangfroid before the government its actions informed by epidemiological modelling made an abrupt shift to lockdown with dramatic social and economic consequences To these episodes whose impacts run down to the present could be added fifth the 2022 disaster in Ukraine where the British state government has chosen to involve itself by supporting one set of combatants in a conflict where presently after more than a year of fighting there is little sign of a means to the resolution of the violence This book examines the crises and tracks how each developed how state government failings in one case were rehearsed in the next and more generally how these crises have been amplified by the decades long celebration of globalization theory and finally at how following the most recent crisis the future might unfold hence the ideas of deglobalization resilience and more speculatively the possibilities of democratization **The Jews of Bielorussia During World War II** Shalom Cholawsky,2018-12-07 First Published in 1998 This study fills a gap in the history of the fate of the Jews in Bielorussia during the Holocaust The ghettos of Bielorussia were populated by a vibrant

Jewish community with its own particular traditions its own unique characteristics justifying our detailed examination of its fate In general it may be said that every region both in Eastern Europe and in other parts of the continent differed from its neighbors

**Escaping the Deadly Embrace** Andrea Bartoletti, 2022-11-15 Encirclement Andrea Bartoletti argues is an essential strategic possibility of the international system and a key trigger of major war Using historical case studies Escaping the Deadly Embrace examines how great powers try to escape the two front war problem and seek to preserve their security Encirclement is a geographic variable that occurs in the presence of one or two great powers on two different borders of the surrounded great power The surrounding great powers may not have the capacity to initiate a joint invasion Yet their threatening presence triggers a double security dilemma for the encircled great power which has to disperse its army to secure its borders When the surrounding great powers become capable of launching a two front attack the encircled great power initiates war This situation disastrous in itself can also lead to war contagion when other great powers intervene in the new conflict owing to the rival based network of alliances Combining archival work and historiographical analysis Escaping the Deadly Embrace demonstrates the efficacy of this by assessing three major wars the Italian Wars the Thirty Years War and World War I These findings Bartoletti shows have important implications for future major wars Challenging the current focus on the US China rivalry he argues that the most concerning strategic scenario is the encirclement of China by India and Russia
