Soyuz A Universal Spacecraft:

Soyuz Rex Hall, David Shayler, 2003-05-07 Rex Hall and Dave Shayler provide a unique history of the Soyuz spacecraft programme from conception through development to its use detailed in the only English language book available on this topic Planned for publication in 2003 it will celebrate 40 years since the original concept of the Soyuz craft *Interkosmos* Colin Burgess, Bert Vis, 2015-11-19 This book focuses on the Interkosmos program which was formed in 1967 marking a fundamentally new era of cooperation by socialist countries led by the Soviet Union in the study and exploration of space The chapters shed light on the space program that was at that time a prime outlet for the Soviet Union's aims at becoming a world power Interkosmos was a highly publicized Russian space program that rapidly became a significant propaganda tool for the Soviet Union in the waning years of communism Billed as an international research cosmonaut imperative it was also a high profile means of displaying solidarity with the nine participating Eastern bloc countries Those countries contributed pilots who were trained in Moscow for week long guest missions on orbiting Salyut stations They did a little subsidiary science and were permitted only the most basic mechanical maneuvers In this enthralling new book and following extensive international research the authors fully explore the background accomplishments and political legacy of the Interkosmos program Through personal and often highly revealing interviews with many of the participants they relate the very human story behind this extraordinary but controversial space venture **Outposts on the Frontier** Jay Chladek, 2017-08-01 The International Space Station ISS is the largest man made structure to orbit Earth and has been conducting research for close to a decade and a half Yet it is only the latest in a long line of space stations and laboratories that have flown in orbit since the early 1970s The histories of these earlier programs have been all but forgotten as the public focused on other higher profile adventures such as the Apollo moon landings A vast trove of stories filled with excitement danger humor sadness failure and success *Outposts on the Frontier* reveals how the Soviets and the Americans combined strengths to build space stations over the past fifty years At the heart of these scientific advances are people of both greatness and modesty Jay Chladek documents the historical tapestry of the people the early attempts at space station programs and how astronauts and engineers have contributed to and shaped the ISS in surprising ways *Outposts on the Frontier* delves into the intriguing stories behind the USAF Manned Orbiting Laboratory the Almaz and Salyut programs Skylab the Apollo Soyuz Test Project Spacelab Mir station Spacehab and the ISS and gives past due attention to Vladimir Chelomei the Russian designer whose influence in space station development is as significant as Sergei Korolev's in rocketry *Outposts on the Frontier* is an informative and dynamic history of humankind's first outposts on the frontier of space Purchase the audio edition *Space Exploration and Humanity* American Astronautical Society, 2010-08-23 A complete history of human endeavors in space this book also moves beyond the traditional topics of human spaceflight space technology and space science to include political social cultural and economic issues and also commercial civilian and military applications In two expertly written volumes

Space Exploration and Humanity A Historical Encyclopedia covers all aspects of space flight in all participating nations ranging from the Cold War era beginnings of the space race to the lunar landings and the Apollo Soyuz mission from the Shuttle disasters and the Hubble telescope to Galileo the Mars Rover and the International Space Station The book moves beyond the traditional topics of human spaceflight space technology and space science to include political social cultural and economic issues and also commercial civilian and military applications Produced in conjunction with the History Committee of the American Astronautical Society this work divides its coverage into six sections each beginning with an overview essay followed by an alphabetically organized series of entries on topics such as astrophysics and planetary science civilian and commercial space applications human spaceflight and microgravity science space and society and space technology and engineering Whether investigating a specific issue or event or tracing an overarching historic trend students and general readers will find this an invaluable resource for launching their study of one of humanity's most extraordinary endeavors

The Rebirth of the Russian Space Program Brian Harvey, 2007-11-25 The rebirth of the Russian space program marks an important event 50 years since the first Sputnik was launched on 4th October 1957 At that time few could have imagined the dramatic events that lay ahead The Soviet Union achieved all the great firsts in cosmonautics the first satellite in orbit the first animal in orbit the first laboratory in orbit the first probe to the Moon the first probe to photograph its far side the first soft landing on the moon the first man in space the first woman in space the first spacewalk Except one the first human landing on the Moon In 1964 the Soviet Union decided to contest the decision of the United States to put the first person on the Moon The Soviet Union engaged in that race far too late with divided organization and made a gallant but doomed challenge to Apollo Undaunted the Soviet Union rebuilt its space program around orbiting stations building the first one Salyut and then the first permanent home in space Mir The Soviet Union still achieved many more firsts the first lunar rover the first soft landing on Venus the first soft landing on Mars the first recovery of samples from the Moon by automatic spacecraft

Soviets in Space Colin Burgess, 2022-08-08 A beautifully illustrated history of the Soviet Union's leading role in the space race In this deeply researched chronology Colin Burgess describes the then Soviet Union's extraordinary success in the pioneering years of space exploration Within a decade the Soviets not only launched the world's first satellite Sputnik in 1957 but they also were the first to send an animal and a human being into Earth orbit In the years that followed their groundbreaking missions sent a woman into space launched a three man spacecraft and included the first person to walk in space Six decades on from the historic spaceflight of cosmonaut Yuri Gagarin Burgess guides us through the amazing achievements of Russia's spaceflight program through to the present day introducing the men and women who have flown the missions that drive us to delve ever deeper into the wonders and complexities of the cosmos

[Walking in Space](#) David Shayler, 2004-06-03 Over the past 35 years more than 100 individual astronauts and cosmonauts have performed nearly 200 EVAs spacewalks either singularly or in teams in Earth orbit deep space or on the Moon In Walking in Space Development of

Space Walking Techniques the author Dave Shayler shows how hardware and crew members are prepared for protected and supported during every EVA He demonstrates how past experiences have led to improved training techniques and how this in turn has provided many successes and future developments

Women Spacefarers Umberto Cavallaro, 2017-03-02 This book tells the fascinating stories of the valiant women who broke down barriers to join the space program Beginning with the orbital flight of USSR cosmonaut Valentina Tereshkova in 1963 they became players in the greatest adventure of our time The author contextualizes their accomplishments in light of the political and cultural climate from the Cold War in the background to the changing status of women in society at large during the Seventies The book includes the biographies of and in some cases interviews with the sixty women who flew in space in the first half century of space history It reports their achievements and some little known details The result is a gallery of pioneering women who reached for the stars women who with exceptional skill hard work and dedication reached impressive careers as accomplished pilots researchers and engineers many are now in high level managerial positions both at NASA or in public and private organizations and all left a legacy of strength

Women in Space - Following Valentina Shayler David, Ian A. Moule, 2006-08-29 Space exploration has developed from early unmanned space probes through the pioneering years of the Manned Mercury Gemini and Apollo missions to missions that now include women in the crew as a matter of course Dave Shayler tells the story of the first woman balloonist in 1784 to their breakthrough as astronauts and cosmonauts in a range of professional roles He covers the contribution women have made to space exploration and draws on interviews with Shuttle and Mir crew members who were women These interviews detail the achievements of the first female Shuttle commander and the first female resident crew member of the International Space Station These and many other events are presented in a detailed and highly readable account that recalls the difficult path to space exploration by women

NASA's Scientist-Astronauts Shayler David, Colin Burgess, 2006-09-18 This book provides unique access to the story of how scientists were accepted into the American Space Programme and reveals how after four difficult decades the role of the heroic test pilot astronaut has been replaced by men and women who are science orientated space explorers

Life in Space Maura Phillips Mackowski, 2022-05-24 This book explores the many aspects and outcomes of NASA's research in life sciences a little understood endeavor that has often been overlooked in histories of the space agency
